

and signed this away by
Prof. Henry.

The N. W. Boundary is
almost too far north for
comfort. Yet the work must
be done only in the fine season.
There is a good deal to be
done in that way there. I if
indeed I should like you to
provide a fair status
can be got for you, & fair pay,
Engine of Baird.

Had you only verbal leave from
Ruggold to buy the books - or
in writing.

Have your pill-bustering friend
ever repaid your loans on
the 20th inst? Yours cordially
I suppose his passport
Jenny has got home by this.

Cambridge Monday
20th

Dear Wright,

I was afraid you
would 'put your foot in to
it; and then for to prevent
it I wrote to your port
Wrote.

There was a just claim
against Adams & Co for
the damages - which I
fear you have spoiled,
and am very sorry - Adams'
express should have been made
to pay the difference between
the cost of the books, & what
they would now bring if
sold off hand.

If the Smithsonian would

Take the books it would
relieve you - But it is
a pity you should have
to keep them - except the
Walspas - which, if you
also have St. I. & R., would
always be useful.

Well, I did all I could,
and must leave the matter
in your hands -

As to Cuba - it seems
to me that if you were
to winter in that mild
climate, it would help you
to throw off the rheumatism
better than any thing else -
- you could be kept advised of
movements at Washington, and

could return in the spring
if an appropriation is got -
which could not be before 1st
March, - & you would not
be wanted before May or
June - or later even.
However that is for you to
consider. -

If decided on, Baird
should have the season direct
your journey explained
to the Spanish Minister
at Washington, & a
passport got from him,
or countersigned by him.
He will then have a
proper recommendation
for you turned into Spanish

Cambridge Massachusetts. Lang. 1848

Dear Friend

That I ought to have replied to your letter of the 19th Nov. - to say nothing of that of Sept. 21, & June 18. there is no doubt. The latter I have carried in my pocket a good while, hoping to catch a moment somewhere & sometime to write to you, especially as the time approaches in which I may be sending a parcel to Mr. Akins for you - But I have not had an hour leisure not demanded by letters of immediate pressing consequence, or in which I was not too tired to write.

There are many correspondents whom I have neglected almost as much as I have you. I have worked like a dog, but my work laid out to be finished last July is not done yet.

But from about the time of your last letter a providential dispensation has prevented me from doing what I would, namely the sickness, by typhoid fever of a beloved brother (a Junior in College here) who required every leisure moment from the time he became seriously sick up to the 9th inst - a week ago - when it pleased the

Oversee Disposer of events, to whom I bow, to remove him to a better world. - and I am but recently returned from the momentary journey to Canby to the paternal home (from Western New York) his mortal remains. This has somewhat interrupted the printing of the last sheets of my Manual of N. Botany, - which, with all my efforts at condensation, has extended to almost 800 pages!! (12th including the Introduction. It will be difficult to get the vol. within covers. A year's hard labor is bestowed upon it. I hope it will be useful & supply a desideratum. As a consolation for my parent faithfulness in making it tolerably thorough, and so much larger than I expected it would prove, it is now clear that I shall get nothing or next to it for my year's labor. - that at the price to which it must be kept to get it into our schools &c. there is so little to be made by it that I cannot induce a publisher to pay the heavy bills, except upon terms which swallow up all the proceeds - at the very last I may get \$200. if it all sells - a year or two hence.

Meanwhile I have paid the expenses principally incurred on the 1st vol. of Illustrated Genera - which I can't print & finish till the Manual is out. - have run heavily into debt. - in respect to these works,

which were merely a labor of love for the good of the science & an honorable ambition - and now I am going to get thrash I cannot well see. I am also responsible for heavy bills for my late brother.

I should despair greatly if I were not of a cheerful temperament. To crown all, I expect to marry in the Spring; but then my wife will aid me in my heavy correspondence; so you may get letters often.

I wish I could write to you as you wish, all about Botany &c. - I wish I could aid you as I desire, but I fear it is impossible. I must have rest & less anxiety. Two more years like the last would probably destroy me. If I had an assistant or two, ~~to take~~ to take details off my hands I might stand it; as it is I cannot.

Caray spent 3 months with me last season, and was to study & tick off your Texas coll. in my hand - take a rest for his trouble, and Mr. Snell & Mr. J. T. Caray would take what they needed & pay for them, so that I could pay your book bill at Howell's. The utmost Caray found time to do was to throw the coll. into order - There they still lie, in the corner! There perhaps they had best, now till the coll. of the past season reaches me, when I will try to study them altogether, along with Linnaeus's Collections - a set of which still wait for me to study them. Will you wonder that I am a little disappointed, when, in spite of every effort, I

make so little progress. — And in 6 weeks I begin to
lecture in college again. — and in April the garden will
require more time than I could give it. Such are
nearly some of the things on my ~~hand~~ hand. — some of
my cares. Still I am interested in you, and in your
collections, will do what I can. Collect, so that
(with the specimens now on hand from you) I can make
sets of 2 or 3 of each species — at least for a good
number (besides a good set for myself) — and or at least
3 or 4 or 6. — I shall sometime study & arrange them —
will eventually dispose of them for your benefit. I
shall try to have Carey come on again from New York
and help me in this & such like matters.

Then if you will continue to send seeds (pretty
largely) also bulbs, Cacti, turtles &c. — now in early
spring. (not root cuttings of some vines) — taking pains that
they are sent in a direct way, so as to come alive
in May, &c. — I will get an appropriation allowed from
the Garden for you. Don't try other live plants
till we have better communication with Texas.

We have much money in this already & had to
give it up as to Lindheimer. But seeds & shells
do well. For a microscope, you don't
want a Compound microscope (properly so called)
but (what I use) a French Simple microscope
with doublets. I used to import them for about

\$25. - An offician in Boston has ~~one~~ one but
asks \$35. & I think it has not the higher powers
either. I will see what I can do, but perhaps I
shall not be able to get one for you till summer.
I have not the money to pay for it, & cannot get it
from the Garden in advance.

You know I have for you a small parcel from your
sister. By the end of this month (I hope a little sooner) I
shall have copies of my manual bound. I will then send that
parcel, with a copy of Manual - and a simple microscope
if I think I can get one (at least I will give you a new
hand glass) - ~~for~~ New Orleans (through Mr. Lowell) to
the same office where I sent the Spanish Dictionary.
I forget where, but will write at the time and tell you
where. As soon as I get the Gazette out I will send that,
in same way.

— Pack bulbs, tuber's roots, in nearly dry leaf-moss,
close - so as not to make about - or in nearly dry moss -
in a tight box - so that rats do not get in and eat
them.

That Berberis (B. trifoliata, Mexican) was once sent by
Lindheimer, but died on the way. Perhaps you could send
good root-cuttings.

— The box of Cryptogams from Sequin has not come.
If you could send really a copious set of Lichen's
& of Musci & Hepaticae. There happens to be the very
things that I could cash immediately for you, through
Tuckerman, & Sullivant. A good collection of Mosses,
Lichen's &c. will bring the microscope you wish. But
Tuckerman is not a man to make advances for any one; and as

to Sullivan - he is so generous that I have already laid him
under contributions as fully as I have the face to ask.

In yours of Sept. The 'Campsite plant' is my
Linopsis Texana. The "Gratiola" is *Mimulus Lemmonii*
Torr. (which I did not know from Texas. The climbing plant
of Scrophular. is *Maurandia antiochiiflora*.

The other plant is *Kallstroemia maxima*.

I find no specimens in your letter of June 17.

Forgive my lay neglect: accept my apologies. I'll see if
I can do any better hereafter, when I have a wife to
write letters for me.
Yours sincerely, A. Gray

Cambridge March 10. 1848.

My Dear W.

I received yesterday your favor of the 8th Feb. enclosed to Mr. Haule. - and am annoyed and surprised that you have not received my letter written about the middle of January, shortly after the decease of my brother, in which I explained to you, as well as I could the cause of my delay in answering your letters. I do not know ~~then~~ whether I addressed it to Rutersville - but I have a kind of impression that I addressed it to Sequin. If it has not come to hand, write to the office there and ask for it. Wait till I am married in May, and then, if I had not time myself, my wife shall answer your letters, at my dictation, the next day after they come. Besides all the rest, the Academy's correspondence presses hard on me. I have written 24 letters for the steamer of to-morrow. Fairly to keep up my correspondence and answer all my letters would take full two hours every day of the week except the Sabbath. So have mercy, and long patience.

After writing to you in January. - about the close of that month, came in a man, I forgot his name, from Texas, with the package of seeds from you.

He said he was going back in about 6 weeks and would take a parcel to you. So I wrote to your sister to apprise her that the small package she sent had safely reached me, and asked her to tell you that I would send ~~them~~ by him to you at that time. I feel sure that the Manual would be out (if I helped the Glenn) by then. — Well he has not made his appearance. — Meanwhile not long ago I received yours of Jan. 10. from Boston. Well I felt easy, supposing that you must by that time have received my letter which crossed yours. — and would soon receive my message through your sister also. — But now comes yours of Feb. 8 to say that you have not heard a word from me.

Meanwhile my Manual is out. — but not published till 10th February. What can you expect from a man who takes up a job in Feb. 1847 to finish in May or June, certain. — but who though he works like a dog, and throws by every thing else, does not get it done till Feb. comes round again. — So it is only now that I have any thing to send you. I am now printing off my General Illustrated the text for 100 plates. — mean to have it out in a month; but

I will not wait any longer for fear. So I have packed up for you the things from Wethersfield (which I took apart to go into the parcel letter) — a copy of my Manual, and a copy of Tuckermans Lichens of N. States. — have addressed it to you at Austin, Texas — and I take it into Boston to send to Mr. Lowells agent at New Orleans — ("to be sent for.") Now I forget his address. but I will add it as a P.S. to this letter. Mr. Bancroft — a sort of relative of mine he will be — & a brother in law of Mr. John A. Lowell, is the agent there except in summer, when he comes home. but a clerk remains. Through that address you can send to me most surely putting on your parcels or boxes "Care of John A. Lowell, Boston." Notify them by mail as you send to them. — the agents there will pay all charges and forward promptly to me. To that address, when out I shall send you a copy of my General Illustrated. Will you not now send me seeds, as fast as possible, that they may be done this spring. — I should like to make the

Berberis trifoliolata, Moricand, growing here —
and many other things. If you can get such
arrangements as that you can send boxes of live
plants, bulbs & promptly to New Orleans another
time — (Mr. ~~late~~ just about a year hence, or
bulbs & such things early this autumn — to reach
here as soon as November) I will see that they come
on from there early. — & so you can aid me
with the fine plants I want; and I can aid you from the
garden, at the rate of \$50 or more a year — to our
mutual advantage. But I began that too soon
with Lindheimer. — His boxes came to hand over & again
6 months & a year after they were sent. — with very
heavy chaps & sprights — all dead. After losing 60 or
70 dollars so. I told him to send nothing more
alive! Let that explain my want of promptness in
acceding to your request. But, when the war is over,
I think I see the way clearer to do this hereafter.

I have not yet had time to study & name
your plants here — so as to supply Mr. Lowell
with a list, and so pay Mr. Fowler's bill. I wish
I had the rest of your collections — so as to do all
at once. Spare time, which is valuable — I hope you
will send me, soon as possible, that I may do it.
I will then make something for them. I have told
Fowler that I will be responsible for your bill, and
pay it whether or no — on the 1st June. — But I
am poor, — and in debt already much in carrying on my
publications, and cannot advance now. — nor can I just yet
get time to study & name your plants accurately, which I must do
before I can offer them to any body. I'll do my best!

I thought I had named all your plants sent
in letters, but I find not. ~~Two~~ 2 letters of
yours were mislaid. - The one is this

Lycopodium apodum
" *Selaginella apur.*
(See Manual)

The another is "Calandrina" right - the species yet undetermined.
" *Hedyotis* " = *H. Boerh.* sb.

A little pedate-leaved *Convolvulus* - which I
can't name.

A little "Euphasia *humboldtides* Nutt.

& A small linear-leaved "Malva" which is
new to me. I suppose I shall find good
specimens in your collections -

Then I will name all. -

Now give me credit for doing as well
as I can. I believe me to be sincerely
your friend

A Gray

 The letter is to be sent to you in the
 future.

Cambridge, August 23. 1849.

My Dear Mr. Wright

Since your letter of July 10. reached me (about a week ago) the Scientific meeting has been in progress here and I have had no time to write.

I am glad to see that your last is in a cheerful strain, and infer from it that all is going on well.

In answer to your last previous letter, I wrote (as you directed) enclosed to Dr. Baker under cover to Dr. Devine, San Antonio, informing you that I should accept the draft of \$150 in favor of Dr. Baker, to pay in Oct. M. & that would do. But the draft has not yet been presented to me.

Now I have the pleasure to inform you that Prof. Henry, the Secretary of the Smithsonian Institution, is now with me, and on representing to him the great importance to Science to keep you in the field you are now entering on, he has promised to consider you, as it were, under the patronage of the Smithsonian Institution, to publish the results of your sufficient interest, in the Smithsonian Contributions, and to subscribe \$150, payable in January next, and to be reimbursed by an equivalent share of your present collections. If satisfactory, he will probably repeat the subscription another year, if you will ~~earn~~ collect in such regions as we direct. This, when I get it will replace the \$150. I am to advance for you.

Under cover with this I have written a line to
Capt. Franch, letting him know that we all feel a
great interest in your welfare and scientific success.
I trust that the letter will show to Capt. Franch
that any kindness to you will not be thrown away, but
will be gratefully appreciated by us.

Prof. Huxley will write & enclose in this a letter in
your favor to Major Van Horn or Maj. Henry.

As to your returning with the return train
to St. Antonio this autumn, you must decide.

perhaps it would be best, as you would thus escape a
long winter at El Paso. But I would advise

you to come no farther than Galveston, at farthest,
but dispatch your boxes as directly & promptly as
possible to me at Boston. Besides the expense of

the voyage back and forth, there will be the expense
of living through the winter, for Mr. Gray's health
is still so delicate, and an invalid cousin is to spend
the winter with us. So that we shall not be able to have

you as a guest, but must continue to keep our family as
small as possible.

I will see to distributing your plants into
pots, however.

I shall be glad to send any publications
to Capt. Franch, which may be worth his acceptance.

But in the present uncertainty of anything reaching
him I will not now send by mail. But hereafter I
will gladly gratify him in such respects; and I
will manifest my gratitude for any facilities he may
afford you.

The plant enclosed is like a *Tragia*. I will examine it
some time. Glad you find *Stymeranthus gnaphalopsis*.

Wishing you every success, and hoping for many new
and curious things. I remain Yours faithfully

Asa Gray

Mrs. Gray sends best regards.

23 Aug 1898
1898

Mr. Charles Wright

Portland

Care, Capt. French.

Cambridge 24 Nov. 1849.
Dear Mr. Wright.

Two or three days ago I had
the pleasure to receive your letter of
Sept. 13th from Camp at El Paso. It
was pleasant to hear of your safe arrival
and good success. - but I regret to learn
that you have received none of my letters.
I have written 3 or 4. - announcing that
the draft would be paid when presented,
& addressed them all as you directed.
The last was enclosed for direction to Dr. Baker.
It contained Prof. Harris's letter commanding you
to Major Van Hise in the office - as under the
patronage of the Smithsonian Institution - and
gave you intelligence that Prof. H. will, after
the first of January, repay the \$150 that
I have advanced on your draft in favor
of Dr. Baker. I hope you have
received the proceeds of this from Dr. Baker.
Then you will have funds enough. Every one
of my letters has informed you that the draft
would be paid, on presentation. The letter which

contained it, some have got mislaid at the
Boston P. O. - so that - though I ~~tried~~
tipped Mr. Baker to find it, it was
not actually discovered & presented until late
in September - when it was paid, & I held
it as a voucher of my advance to you.

As soon as you get your plants into
order I shall be glad to study &
name them & publish in Smithsonian
contributions - if Henry should be ready.

If you come north you can distribute
your specimens yourself - If you stay in Texas
I will do it - though time is very scarce
with me this winter. As to your
passing the winter with me - I wrote you
last June that that will not be practi-
cable. As you will get north late in Jan'y
& I suppose will go north again, you will I presume
desire to spend a great part of your time with your
family in Connecticut. But I shall be glad to
have you spend a month with us. You may rely
upon my kindness and assistance & can render.
And, if your collection is fine & pleases Henry, I
shall hope for a new appropriation from him, &
better government facilities obtained through his interest.

for future operations.

I hope you explained as thoroughly as your
short time would allow - the mountains at El
Paso. They ought to furnish novelties.

You will probably increase your collection
& get many seeds for on your route back.
I hope we shall be able to distribute
25 sets at least 15 of them containing
1000 numbers. But I shall now save
some of your return. - Yours very truly

A. Gray

I send your letter to your father, as
you desire. -

Cambridge Jan. 2, 1850.

My Dear Friend

I have yours of 28 Nov. announcing
your arrival at San Antonio. I expected you
postmarked Dec 7. in fact) & at the same
time your Catalogue (postage \$1.40), which you
had better have put in the box, to come with the
plants, as it can be of no use till they come)

You do not say what letters of mine
you have received. I hope you found one
at San Antonio, written when you had El Paso
arrived. Yet you speak as if you were not
aware that the \$150 Draft had been & by
paid by me. - This it is plain that Dr.
Baker was apprised of it. Now do you
tell me where to address you now - and inform
that I should write to Austin.

I am sorry that you should be kept
long with your collections in Austin. San Antonio
I think that you should have to leave them to
Tom Dick, or Harry to send a. to L. L. L.
You should find some merchant at San Antonio
take his receipt for forwarding to Port L. & see
if you cannot take that they are shipped to

1. M. - par freight to N. Y.
I let you know to whom the consignment -
have shipped for Boston (not New York)
well.

It is all important
to you that the collection should
come to hand early to me. I can
not distribute it. - As I am to get
ready to be off for Europe to study Expt.
Expt. Plants, in June. & a word of thanks to
Dr. before that.

Also until I
get the collection in my hands I look
it over. I can not ~~propose~~ ask Small
to try to make any advance for a
new exploration.

See at once to all
these points by all means. I want
probably have saved money to go down to Pat
L. with your boxes by Stage coach - rather
than to wait on high board at San Antonio.

I read with interest your narrative
of your journey - your trials & struggles.
But I wish you had sent a scientific
sketch of the country travelled over its features
& its life.

asked me for a set of Meplat, that he might
lay before his board. I cannot send your
letters, on account of the private personal matters entered.

I must say that I think you behaved
very well indeed under the provocations of Dr. P.
And I do not blame you for striking
him!

As to Francis's cool request, that
you should give away two sets of your plates
to Smithsonian & National Inst. as a token of
your gratitude to him, I do think it be-
comes you. I am glad you promised him if you came
at all.

For I will see him in
the north. - Texas before I make any such disposition.
In the preface it is right & proper to
speak gratefully of his & Babers good offices - yet
in fact, much has been ingenious. Has
done nothing to what he might do.

Having taken as full a set as can be
of your plates, & pays for them in advance.

Your Catalogue runs up to a
quinty number 1404. - But I suppose
that there is a goodly number over & over & many

in two fair specimens to distribute. —

Then as to distributed sets, we have, it
seems, to cut off 300 nos from the beginning,
for it was no part of our plan to collect
from Galveston to San Antonio — the very
ground that you & especially Lindheimer dress
you over before — Lindheimer's whole
sets of these plants, fully supply the
market at \$8. — as we cannot
put them into yours for \$10. — per hundred.
There will be enough of the same species naturally
in those collected on the proper excursion from
San Antonio to El Paso, — I should do you
more harm than good to the sale of the plants
by putting them into the sets (nos 1-308)
excepting where they are not in Pl. Linch.

I shall note your wants, as expressed
in your late letter, — books, &c. — & make the
needed arrangements. I shall send to
you also when I can have things put into
Mr. Bancroft's hands with perfect safety.
You must have them called for there,
I have for your arrangements for a further
exploration. Give me no light as to

Your particular plan for next summer.
I am sure you will find a way to give you
more of the good things.
On your table what is before you
to be sure your plan is important.
Your success must depend on your help.
After the report at the distribution this is
at the account of the collection. I am sure
you will get for them. I can
be with you for a full year for you,
and I am not able to make advances
of money. I have \$100 and
shall not get back from the
of the land on their side please Mr. Smith
who will give you a receipt for a full year
and I will be able to give you \$100
perhaps I see in the 100
for the cause of the poor. I have
I am sure of sale of plates. I am sure
to receive it once. I am sure I can pay -
this should suffice to make the profit. &
pay for the things you want. I am sure
will receive. I am sure the things
for a few more will soon give
me what I need for the plates.

For the slow & very limited sale of

XX
Charles Wright
Care J. J. Kyle

London Mass
Texas.

Cambridge, 18th Feby. 1851 -

Dear Mr. Wright,

In my last, sent 8 or 10 days ago, I told you that I meant to send you paper &c. - by the Bark R.M. Holt which is up for Galveston - to sail on the 26th -

I have made arrangements so to do, & send on board to-morrow, addressed simply "Chas. Wright, Galveston, Texas."

4 bundles containing 15 Reams of paper - as per enclosed bill. - with 2 quires strong wrapping paper - & 8 pieces binders board - the packages well wrapped in Manila paper, after being protected with the board - (which will serve for pres. board - I have chosen good paper, for driers, & 1 ream thin for delicate plants, - also for holding plants when dried - This is more than you asked for - If you want more, it can be sent next time. I have ordered it wrapped in such a way that no injury can occur in the voyage - or on waggon to Austin. Please have it cared for at Galveston.

Also I send with the birds a bag, addressed like the rest, containing - your hammock -

a copy of Pl. Handl. of Nuttall's (Thursday)
I Dana's abridged Mineralogy - which I happened to
have - Ahlendorffs, Spanish Grammar & Hillman's
Chemistry - bought (\$2.87). 2 good magnifying glasses
(\$1.00). One knife with saw - the only one I could
find - (\$1.00) 2 yards India Rubber cloth (\$1.50) & one
large India Rubber Camp Blanket - cotton - lined inside.
\$3.50. - I hope you will think I have done
pretty well, considering. - Since I began to make
preparations - my wife's cousin has been very sick
in the house, where her coffee room lies.

On Saturday I got your favor of Jan'y. -
enclosed in Mrs. McBlives - of 17 Jan. from Boston.

I wrote to-night to New York to have the books &c.
asked for purchased & sent by mail to him. &
will charge the amount to me. Hope they
will reach safely. - I could not get them
here, or I would have sent by ship. -

I have not yet had time to open the
3 remaining packages of your collection, - hope to
do so soon. I have engaged a young man to
come over fr. New York to help me I wish to take them
into N.Y. -

As soon as Pl. Lindb. names are printed off I shall

send you a copy.

I still wait anxiously to hear your
plan for next campaign - I do not hear from
Prof. Hany yet. He could save you better if he knew
what region you will next explore. - I - I tell
us.

My opinion is that I could do little in
telling friends Mexican plants. The proper region
now is between El Paso & California & the Great
interior Basin. - There will doubtless be explorations
the coming year between New Mexico & Mormon territory,
& that is a route of high promise -

Trusting that this will safely &
kindly reach you. I remain Yours ever
A. Gray

P.S. I send your queries
about Deer-Skin Dressing to Prof.
Sturges.

William is in Europe - as I
wrote before.
I wish you were all at home
from me.

Cambridge. March 4th. 1857

Dear Mr. Wright,

It is rather more than a week-
ago that I wrote to you at San Marcos, to apprise
you that I had despatched to the Banque Tré-
vise for Galveston, packages of paper, &c. for you -
I have written to New York to have the papers &c.
forwarded to your friend Mr. Taylor at Boston -
You declined - But I have not yet heard from Mr.
Torrey or Mr. Bolton on the subject.

I told you also that I have received your
plants in very good order - I have been over them, &c.,
& am now distributing them into series.
very good specimens, but the numbers will not hold out
nearly as high as you thought - In my next letter I
can probably tell you how many of the sets I have.
I hope that the 5 first sets may amount up, & I special
I like out with the Rio Grande & the collections of 40 when
I can.

Professor Henry has taken an active interest in
your affairs, & is ready to assist your labors for the
next two years.

the super field to work in; is from the
westward & northward, & into the valley of
the Great Salt Lake if possible - That must be a
year's business - When we know your movements
we will make arrangements to send for paper &
other necessities for next year -

I told you before that Mr. Dowell goes abroad this
spring for two years. But before going he has placed \$100.00
in my hands ^{his subscription} for you during that time - I want you
to let me know how to remit this & any sums I may
collect from your plants to you -

Professor Henry has also authorized you to draw on
my "bag" for this year & will be willing to
allow the same next year. I think you had best take
all the funds you need for immediate expenses, & draw
on Mr. Henry when you are actually in the field as
you can easily then negotiate bills on Wash. D. C.

Professor H. has interested himself & made application
for you to the Secretary of War - But received in reply
that it was impossible for him to give orders that either
your transportation or rations should be furnished so
that I have sent this letter recommending you to the
offices of the Office, which is one of the same
from the Smithsonian Institution, & enclose. I
am & which you will probably find some benefit.

I gave your shells & fossils to Professor Agassiz, he was
very glad to have them, & would like to have you collect
the fossils, petrefactions & shells that you can, (not minerals)
he will take all your collection; he is now gone South,
but said that on his return he should be willing to
subscribe something for your expedition - The only
thing he would give you, is this & sent to Mr. Smith
& sends, which I forward to you - He sent also
two specimens collected by him which I have no means of
sending - He was to write you a letter of directions, but
was so much hurried before his departure - He will
probably write from Washington, & when I receive the
letter I will send it.

Yrs. H. desires his regards.

Pray let me know to what post-office I shall
address you - I have directed to San Marcos the
last times -

Yours very truly,

A. Gray

4 March 1872
Spring

union letters as you see, are written in that confusion.
I enclose one to one of the great people in Worcester
to which came after my last letter was sent; &
which you will probably find very useful - It is
the most interesting region you could want to visit, & most
likely a pleasant place -

You should correspond with Mr. Sullivan while I
am away he will forward your letters or the substance
of them to me - He will give you directions as to what
you should do with mosses - as to lichens I can
say nothing about them till Mr. Tuckerman returns.
Mr. Sullivan wrote that he was in communication
with you, & I shall interpose - I will rather in your
behalf, & request him to do what I could do for you
while I am away -

I am having a new copy of "Flora" bound for you -
and shall send it.

I am having to collect all the seeds of plants I wish
to send, should please Sir Thos. Hooker more than
I need to be sure to new species & distributions,
especially any thing new -

Dr. Torrey has no idea of making a full set of
plants for the Barber he has given me a list of
one in distributing, to lay aside for him as far as possible
the things he will want ^{without interfering} with the list.

Is a full set to be kept for Torrey?

No more Flora published - Nor Fendler either
with the Flora I shall have one or two books
to send

Yours truly

Wm. D. B.

12th March 1935
Lyon

2

My dear Mr. Grant I have paid some of the London
2nd. Vol. But I have not yet sent it to you. I
begin to hope to see it in the next 40 before I
go. It is in English. I have also sent this letter
to the printer. I have also sent it to the printer.
I have also sent it to the printer. I have also sent it to the printer.
1850

I believe I have a letter of
yours unacknowledged. - but I can not
stop to look it up. I look it over this
evening. at a late hour. but still am
anxious to have no time in letting you
hear from me.

Last month I had to go on to
Washington - to arrange & pack up
the plates of the Expt. Expt. for taking
abroad.

On my way, I met Mr. Grant at
work at getting those publications for your
friend (which I may have neglected) They
are got before this. I have paid for
them. & I left with them a copy of
the Scientific Annual of Scientific
Discovery for the year past. just out before

also a copy of Alma Anderson - ~~Letter~~
bound (so called - I give you the book, if you wish)
- all put up to send to you, under cover
to Messrs. Fuller & Hinkle. Port Lavaca
Texas by a ~~the~~ Na. ship vessel up for
that port. - Please to instruct your
correspondent as to forwarding to you.

As I came back from Washington,
I saw by the papers that St. G. W. C.
Clemens had been ordered to the Boundary
Survey, & that he was to leave Washington
on the 12th May & go to El Paso.
Via Texas I presume. - I had written back
to Henry to apply to Clayton to have leave
for you to join the party for collection across
to El Paso. I only learn that Clayton
refers the matter to Genl. Ewing. I have
not yet seen anything. Meanwhile I learn
that there is yet much doubt what movements
are to be made about the Boundary Survey -
"See little and can be got out of the
Government. If any thing I will let
you know at once. After I am gone please

to communicate ^{directly} with Prof. J. Henry,
Secretary of the Smithsonian Institution.
Washington. I enclose to him letters to
me. Also write to Wm. J. Sullivan, Esq.
Columbus, Ohio. - who will look after you.
I had much pleasant talk with Sumner,
a fine fellow. He agreed that the best place
now to botanize is Nth of Santa Fe - I. e. of
Utah Lake &c. But how to get
there!

If I do not soon hear of your
having drawn upon me I shall send
you by mail a certificate of deposit
to your credit in a Boston or New York
Bank - which they say will be readily
cashied at par in Texas - or a Treasury
note if I can get one - for the amount due
you. I shall soon finish dis-
tributing the collection of plants, & then
I will furnish you with an account.
I shall then know the price of the sets
of plants I am putting up for Herbert & Ewing
& H. S. G. The latter I pay for the other

Can collect in England, also from British
Museum & Natl. - etc of which I hope will
take a set. I hope Drury will - but can't
tell yet. Smith's miss & Smell, & Green's are
paid for in advance. Mr. Haney ab. took
a set for William University, the same.

For 2000 \$ I have collected \$20
for the same. I hope for quite as
much for 10000 for the half he had.

I am putting up a set, as full as it will
run, of the plates for the bundle - as you
suggested I have added a set for the same
set me 4 years before also from the parcel
of plates collected last fall - which has just
reached me (charges \$3.38) ; these are plates
are now only good for this purpose. I have this to
be made - I ask him to furnish a set of
the *Prodrum* for you - I hope to see him in
July, or August - & to further this exchange.

Do not take trouble to collect specimens
bacteria. The garden can pay so little
that it is not worth while. (by deposit here)

I should have wanted you \$100 & but I
fear you may have drawn on me. -
If you do not draw I shall visit a cabinet
of deposit. & afterward - what I may get for you
I will send to Sullivan or to Haney - to be paid to him
at. Mrs. Haney is sick & feeble. - an accident in
the room. - Mrs. Haney

Cambridge 21st May. 1880.

Dear Wright,

Mr. Bartlet, the new Commissioner for Mexican Boundary, Prof. Henry writes me is an intimate acquaintance of yours.

With Ewing's general recommendation, I hope he will be able to procure general good offices & aid. I got the enclosed to-day.

And wrote to Henry at once to learn if he can pay over \$150 to the Commissioner to be paid over to you in Texas.

Putting across to El Paso with the Boundary Survey party, you could catch a good chance of getting into Mex., or into the region between El Paso & California —

I will ask Prof. Henry to endorse the Commission to pay over to you, his appropriation for this year. If you get fairly into the field.

Collect especially seeds of Pines, and other trees. I will write again in a few days.

Yours cordially

A. S. Gentry.

(Copy)

Department of the Interior
May 15 1850

Sir

I have your favor of yesterday, and
will request the W. S. Commissioner to afford
such protection as may be in his power to W.
Wright, the Agent of the Smithsonian Institution.

I am, Sir

Very respectfully
Your Obedt Servant
T. Ewing

Signed

Thos. J. Henry

Smithsonian Institution

Botanic Garden Cambridge May 30/45.

By mail I have
sent Pl. Linch. pt. 2.
Ag.

My Dear Mr Wright

A few weeks ago I
wrote you that I had just heard of the
appointment of Mr. [?] as Commissioner of
the United States Survey of the boundary line
between Mexico and the United States. I have
to inform you that I have since then
for you a situation in this party. I will
forward to you the Secretary of the Interior's letter which
did not amount to much. I have sent the
original letter of the Commissioner himself which you
see is very satisfactory and offers all the facilities
that can reasonably be expected. On receipt of this letter
I trust you will make no attempt to start before the
Commissioner's party arrives at Mexico. As to the
money, I wrote to ask whether the Commissioner would take what I have
for you. If you have not already drawn upon me to make
attempt to draw, I will forward, either, the full or
a certificate of deposit in the Washington or New York banks
by the Commissioner. You will go with that party to El Paso
and then direct your movements according to circumstances.
If you explore further west on the boundary line which will be
well you must have a good understanding with Dr. [?]
who you will remember was surgeon and botanist under Emory.

As we dare not collect for subscribers there will be no difficulty in this. By going on west to the boundary of California you might get an opportunity of reaching the Great Salt Lake through a more direct route next Spring. I think the distribution of your sets to the highest number is 828; this runs through my set to Lowell's on Smithsonian's. The others which I pay for is 680, Harvey's 620, Hooker's 650, Hildings' 644, D.D. Greene's 631, (as he advanced 50¢ the leaves only 138 coming from him). Britton, Munson 519 - Webb 453 (These two last are not engaged but I hope they will take them, I shall carry them abroad for the purpose). A set I have offered to Durand contains 498. As he bought a former Texan collection from you which contains many of the same things and has also Lindheimer's. I have written to him offering this set for 40¢. Should he decline I shall try to dispose of it abroad for 50¢ but there will be some expenses. In the distribution I have used those collected between San Antonio where they held on well, also I have used the Rio Grande plants and ^{other} the old collection. Hereafter do not send those collected in Texas or any formerly collected as they deteriorate your sets every one of our subscribers have them from Drummonds and Lindheimer's ~~before~~ before. It was not well thought of to send that Texan bundle, as they are of no use, except that I have used a few to make out other sets. For the rest - Torrey's set 433 specimens, when the species ^{new} are short his are always scraps; those go against his paper &c. To Engelman I have sent a number of supernumeraries and plants which I want him to study. DeCandolle's set amount to 410 specimens, these I have offered to him as you proposed in exchange for the Prodrôme. I shall bundle up the other Texan plants remaining here and send to

DeCandolle with them. I have no time to do the other now but must do that at intervals of time while I am at Geneva this Summer. The above enumeration to the whole your collection. Supernumeraries of interesting plants are thrown into my set from which 2 specimens can be taken hereafter for yourself. If Durand, Webb, and H. Britton take the set I have for them they will all be off our hands at once. I sent by private hand some of the earlier numbers of the set and have to Ben them and have 20 1st returns of the Leguminosae, which I asked him to elaborate; they have much novelty and interest. I have little time to reply to your letter of April 10th; you cannot fail to get the paper and the flowers now. Before you can answer this I shall be across the water, but you can continue writing to me by enclosing to Professor Joseph Henry Secretary of the Smithsonian Institution at Washington as he knows your address and will forward time. While you are in the field you can send small parcels, such as seeds &c. through the Commissioner to Washington where Prof Henry will forward to me by the Express bag to the American Minister in London. It will probably be better to write through Henry than through Sullivan; and all the funds which I shall get in London, which I can't advance you before I go, I will send to him for you. I hope to get new subscribers abroad for you. Things for Sullivan would reach him from Washington or from New Orleans perhaps better; He should write you, do not depend too much on Agassiz. It is quite impossible to get him to give names and drawings of shells &c. which you send to him, he is overwhelmed with work. Sullivan, I think, must have written to you, but whether or not you can always depend on him; he will always be useful.

when they come to hand I have sent him all the money of the
 last collection, very few indeed; also I have sent all the Lichens
 down to Turckermans room; he is quite a broad
 copy of account as it now stands in my book.

Dr.

Cr.

May 5, 1849.

Having done that now with him,

1st

in the house

you on to New Mexico with the Barnard, he
I then into Great Salt Lake basin. If you have
not, & still remain in Texas, you must I think
have given up entirely the idea of further work
which perhaps will be insisted for but are
promised here for collecting plants

With all my desires, I fear I cannot do
you as you want unless I certainly I can
give no such a great change of the white man
in a short time.

You will have heard from Dr. May, that
your boxes reached him safely & that
he had given to Dr. E. W. Short, Louisville
Kentucky who would be with a small party
on a tour for exploring & collecting plants

Yours very truly,

A. N. S.

It is not worth your while

to collect, except when you can get 8 or 10 sets

I am as I collect the winter from the rest I shall
be able to pay the balance due you. I have done
some more work than I have paid for to you.

I feel very uncertain how & when this letter
will reach you. Because I suppose you have

23 Oct 1951

W. Charles Wright

One of Col. Kyle

San Marcos

184000

Cambridge, Jan; 23^d, 1852

Dear Wright

I received a few days ago your welcome favors of Nov. 30. & Decr. 8. and to-day Dr. Torrey (who has recently been here on a visit) sent me yours of Nov. 29 to Dec. 18th. — Glad to have so much news of you.

I got some former letters from you & Col. Graham. Shortly after I got home, in Sept. I got home Sept. 4.

I wrote you on the 11th Sept. enclosed to Col. Graham. "El Paso, via Independence, Missouri, & Santa Fe!" as you directed.

I believe I have written once since. This before your collections arrived. They came Dec. 4th via Indiana — in very good order, and many nice things, some new, some completing what we had imperfect before.

You may be sure I shall look well after your interest about them. I do not anticipate much difficulty, as you collected a good part of them before you were employed by Col. Graham; and as he has been recalled and as the Govt pays little. I shall fight hard before I let more than a single set go to Government. & that I hope to Smithsonian. — They rest, after taking toll myself, are to be turned to your advantage. I have written to Dr. Hook, who is a good & reasonable man, and assured him that his interests shall be secured as far as in our power. & he will be very content. I am printing on Monte Mihtianse — the 1st part of which (as I work in so much general matter, especially Geo. Mexican, to the

Composita. will make 225 pages or more. with 10 plates.
- the most important memoir I ever wrote - & will
indelibly fix our names on the Texas-Mexico Flora.
I mail you herewith sheets numbered 3, 4, 5. and when
I go down to the Printing office will send 2 or 3 more.
- the rest as they come off. You will see that
I work in novelties from the new collection.

Band (with Henry) Torrey, & I will all look out
for you. As you receive pay (when you get it) as mine,
now Emory will have a claim on no more than one set of
your plants for Government. And Emory's collections -
with all go to Torrey - and as Graham consigns to me.
Torrey and I - working cordially together - can arrange the
matter between us - & shall have the good new plant
mostly published from your collections before Thunberg or
Bigelow can begin with them.

I mean to write to you frequently. I trust
you will yet get my letter of Sept. 11. & - for
will not repeat details except to say that your
collections are much prized abroad - that I have
a complete set of DeCandolle's Prodromus for you -
from DeCandolle - and that, as I wrote you particulars
of, I have \$175 dollars of yours in my hand. - I
will soon communicate with your brother, and pay over
him, as you direct.

I'll now send via San Antonio, as you
request (instead of Independence)

I have just found a letter of Sullivants, dated May

27th 1850, in which he says "Send me by all
means. Wrights Texas Mones & Hepaticae. - I have have
written him punctually, directed to San Antonio
(as instructed) proposing to him to collect Musc. & Hepat.
for me. I have ready for botanicals, pt. 3. a
Litchfield's, received from him by letter thru you."

Poor fellow - as I wrote you before he lost his
wife while I was away, & was overwhelmed, as she was
every thing to him, and as good a muscologist almost as
he. I sent you & Emory a pamphlet
(bot. literature mostly) of mine - via Independence. I now
send another, via San Antonio. I will send all that
turns up.

You are in a fine field. Hold on & keep a good
heart. I long to see what bot. Graham is
now bringing on to me.

Mrs. Gray, who is quite well & strong, would send
her kind regards - but she has been called up to
Litchfield, Conn. to attend the funeral of a great
uncle. -

Yours very cordially

A. Gray

(Cambridge. June 5. 1852

Then, My Dear Wright,

I consider myself very much
of a gentleman! For your favor of the 12th April
reached me only this afternoon, and now, before the
sun has gone down I am answering it! Your
letter came very opportunely too. For, the Major Col.
Graham has been back so long, it is only yesterday
that I got the collection he brought home with him
to Indiana (the seed); and to-day I opened it &
had looked over only two bundles. And I was
saying to myself, now, if I only had Mr. Wright's
list, with localities, I should do very well. And
when my letter came from the office, yours with
said list enclosed, was among them. The plants
look well; but I have only pressed into them yet.
I am glad if you have found *Amorimia malacifolia*
but I have not yet put upon it.

My former letter will have told you that Col. Gra-
ham has behaved very well. He asks, if I remember,
merely for one set of plants for Government, & desires
that after taking one myself, the rest may be turned
to account for your benefit. I shall try to get
a promise that the Government set goes to the
Smithsonian, and then it will cause no subtrac-
tion from your store, since the Smithsonian is en-
titled to a set any way.

I think I shall distribute thus:
1. All set saved up for yourself.

2. Dr. Short.

3. Dr. Gray - selection what he will need.

Could better spare. Do take care of yourself -

The letter (my first) inclosed to Graham, has doubtless got back to you by this time. My enclosing could not saddle him, nor Ed. Emory, with postage, as I always prepay. Letters not prepaid cost double, and pamphlets do not go unless prepaid.

Surely your former lists & labels said Limpia.

But I will hereafter write Limpia, if you say so.

Well, I did not mean to cut your knowledge as to the biennial fructification of Zizyphus - I will make it right when I get the next chance. Also about Lonchocarpus - which seems queer, and is ~~perhaps~~ altogether new to me.

Among the little plants in your letter some are very interesting indeed. e.g. 87, 48, 134.

Send me little specimens in letters. I will name all I can, and will write you promptly.

Mrs. Gray is quite well - thanks you heartily for your kind remembrances, and wishes you a good time.

(Yours very truly) Asa Gray

P.S. I will make the Gardener pay something for the seed just received. H.

Specimens in letter.

No. 30 is a new Streptanthus, if the same as one with mostly entire leaves in the former collection. I can not compare them at this moment. That one is like S. stuebelianus Hook., but with rather shorter pods. I have a plant of it up from a seed taken from the pod.

85. Astragalus Nuttallianus. Var. near that on p. 52 Pl. W.

31. Galium virgatum var. diffusum. Pl. W. an sp.?

64 & 92. ⁴⁴² Eriogonum cinereum var. = E. divergens var. Pl. W.

56. Aphanotephus humilis, or dwarf A. Arkanensis.

51. Hedeoma - cannot name yet.

19. Lepidium Wrightii, n. sp. in

66. Dipsosappus encoides. var. Nuttallii

4. Townsendia strigosa young.

20. Draba cuneifolia.

38. Rhithra - n. sp. & Aphanotephus.

87. Entirely new to me. Labellaceae?

no number. Rhithra marginata? too young.

53. Malacothrix sordida.

47. (Probably Malacothrix (too young) n. sp. but too young for little of it.

48. Arisaema. Probably a new species of my genus.

Arisaema in Bot. Soc. Am. Nat. Hist. But I must

not yet find the only head. I hope you are getting plenty of it.

83. Trilaginopsis young.

134. Stylocline (n. sp.) n. sp.!! but plenty of it!

4. Mr. Lovell: especially those he has not before
 5. Hotter -
 6. Mr. Boissier - who had none before still very well
 7. Engelmann - especially his favorite families -
 8. Mr. Carey - if he will subscribe & pay.
 9. Britton. I shall take home for him.
 10. Some one of the foreign subscribers.
- H. L.

I am still very busy with the college-work - for a month longer - and with the Garden - And the Exploring Expedition work has been pressing me, & still will. But I shall soon have distributed your 1857 coll. very soon - name them up to the end of Bonpland - & in the course of the summer determine many of the Monopetalous families. I have already named ~~several~~ a few of these & some Apocynaceae to please Col. Graham, & named a new Pentstemon after him (which I have growing too); which compliment seems to gratify him.

By this time you will have received the Index & plates of Planta Wrightiana. Copies are already in England - and I am about to despatch many to France, Germany, &c.

(You are indeed an invaluable collector - tho' you do like to grumble now & then - and I hope the Indians won't catch you. If they must take a scalp, or a head, there are others I

Cambridge 11th Sept. 1832

Dear Wright

Yours of the 9th has just reached me this morning. I heard from Engh. and you had got there, & from Jorsey that Sunday boxes had come to him, supposed to be from you - but which he could not open for want of keys. - & he was waiting to see you. You should be at New York, the end of the week to find him, I suppose, for he is part of the week at Princeton.

Jorsey writes me that Mr. Emory requires the late coll. to be home over to him: yet he

shall at once hand them over
to me, only desiring a set
for himself - & he will furnish
me duplicates of Perry's MSS. (old)
coll. -

You had better bring them
on from New York directly
here. For you must come
& make me a visit, and
we will talk over matters.
I long to hear your views.

As Graham's own Report
will not be printed for perhaps
a year, I am going (as
soon as I get your present
coll. to ~~print~~ print a Pt. III
part 2. Coll. of 1851 & 1852 up to
the end of Conpointe. I have
the 1851 coll. all going up to
Conpointe and am in them, hope
to have done them by the
time your coll. 1852 is in my hands.
Then we will distribute sets.

Dr. Hunt is now in New York.

As to the seed your
letter with me that he did
not care for them. Very few
are showing enough. But
here they are useful. &
I have got 10 dollars from
the Garden for its part of
them.

When Tracy wrote me last
he had got no letter yet from
you.

Bring on the things from
Engelmann when you
come. Yours very cordially

Asa Gray

Cambridge, Oct. 28, 1882
My Dear Wright

I got home yesterday.
I received your letter of the
26th to-day - which I
answer immediately - to say

(Ringgold's) Expedition is
just the thing! I am glad
you acceded to it so promptly
for there will be plenty of
applications for the place.
Sardich Island is a fine
field. You know I am
working up S. I plants in the
Apple Exped. I trust it
will go well.

Neither have I heard

from Emory. I would
remain quiet where you are
at present.

I shall write to Emory
again by this day's mail.

No word of M. Wright
yet. I shall ask
after it soon.

In haste. Yours truly,

Albany

Nov 19

Cambridge Nov. 17. 1852

Dear Wright

Glad to hear of your
appointment. all right.

(Unless I raise it, you will
have to wait till after the 1st
Monday in Dec - (near by) before
I shall have any cash for you.

I will then remit, unless there
should be some urgency -

It would be well to have
Endlicher's Genera. Try if
Bridges has got it.

I want to talk with you
about Sandrich Island Botany
and show you some things -
Your principal novelties will
come from there

Get from Bridges (H. Bailine)
that part of Seemann's Botany
of the Herald which has got the
Botany of N. Arctic America - the

Charles Wright Esq

Wethersfield

Connecticut.

Part 1. He will charge
to me. —

You had better make me
a visit, at your convenience, before
you go. — I care not when —

If our chambers should be
occupied with some relatives expected.
I can colonize you for lodgings
in the room at Cavanagh's left
by the Blacks — who have
gone South — with Agamir.

I write to Torrey, that
Sullivan had sent on a parcel
of Mokes named for you.

About Mokes you will do very
much for him on the other side.

They are immensely fine & abundant
there, especially in Arizona —

Yours very truly, Allen

2
C. L. D. D., Dec. 1872

My dear Mr. D.,

I got a letter from

you about the same time. I have
the quantity of paper I have
depends very much on circumstances.
It will be well to send as much as
you will let you. I will let you know
the quantity I will let you know.
You will find before, with the
of the specimen will be sent to
it will be better to let you know
we can get it here. When you come on,
I have some more sent
I have some more sent
I have some more sent
I have some more sent

Cambridge, Dec. 6. 1882

Dear Thignt

I received your favor this morning.

I will in a day or two send a check for \$50 to your
brother - I hope to - invar.

I will tomorrow get a check from my bank
in Boston I draw it payable to ^{you} Henry's
order - whose name on the back will make it go at
once at Washington - for the amount of the fare.

Why did you go on to Washington before you
were ordered by the Secretary, or Capt. Hingford?
Then your travelling expenses would have been
paid! Ask Baird to look after this.

I have received from B. D. Greene \$ 44.60

The plates I sent to Buchanan = 40.00.

I hope you will receive from Boston 24.00.

+ from ... I have, - nearly 100 -

I will send you \$50. now - Your brother \$10
and you shall have more as soon as you say you
want it.

Perhaps you will get your Boarding money from
at Washington now.

The Navy department advices pay to officers to
going on a cruise. But you must have a
month's pay already due, which you have not.
I am in great haste.

Nothing parcels ready for Mr. Loring to take to
Europe this week.

I send herewith a bill of small charges against
historian amounting to \$14.¹⁰/₁₀₀ which I have
received and ask Prof. Henry to pay over to you
to save sending a small amount by letter.

Please receive it from him.

Yours ever

A. Gray

at Lapan. & Sandwich Island

I sent you a letter of his
written after the 20 batch was
received.

After reading please enclose
it to Mr. Torrey, as once with
a man, to return it to me
along with 2 others of mine he
still retains in his hands.

Yours ever

Albany

I will mail you a copy of
to W. W. Wetters here

JH

Cambridge. 23^d Feb 1853

Dear Wright

So you are to be delayed
yet sometime in sailing. - a pity.
Well, you can get what looks
you want all ready, I shall
the more so.

Torrey must be very busy with
the new collections, & with Parry -
for he owes me 3 or 4 letters, even
most business letters are unanswered.
I suppose he will write after his
lectures are through.

Do you saw the Commissioners
& any body at Washington, did
you get your back pay?

How do Graham, Bartlett, Emory
&c - get on together there, but will
Graham get any appropriation for
printing now.

Pl. Wrightianae is in the birds

hands. I shall get copies on
Saturday. Among those I send
to Washington. I will inevitably
address one to Conway & meet
Graham. I trust you will
be satisfied.

Where is Thacker this place.

I have delayed sending ~~pay~~
the package to Paris till
M. W. was out, and could
go with them. So I have
not drawn yet. When sent
however, I shall at once draw
through Boni & Co.

Before you go you may
want to use up the principal
part in books &c.

When he gets returns from
the draft, we will settle
up with him, & he will pay

over the balance. It is not
proper he should do so before
he gets it, or even the draft,
which is not yet made.

All of course keep you
well supplied with all I
write in Hillman or else-
where.

I can send you a copy
of Hillman while you are
in. if you will remember to
give me a proper address.

I have something in the
forthcoming no. on Agoutagines

I am busy as ever, after
the 10th visit. Expt. Expt.
principally.

He has written at the time
how much he was pleased with
the 1st parcel of your plates,
& hopes you will do real things.

San Diego, Calif. 1873

My dear Wright

Are you still sailing yet?
I am so glad to hear of a letter from
which I may write to you at the
San Diego. I have where, especially
a Harriet and Marie, there is much
to which your attention should be directed.

The money just received from Dr.
Engelmann. He wrote me to pay
you \$100 and that he would like to
have you send him place from San Diego
I have to be happy. I will be a week
or two ago in a room that you could not
dispose of any part of your collection in the
in this Expedition: but that, as to the
families he looks at, no doubt in the time
he would see them, or get a set, gratis.

I told him it was not necessary to
send to you more than the \$83. —

But if he does, I shall of course send
it to you, or your brother, if you are gone.

He is now collecting his yearly bills,
and will be in London in a week or two.
He is in London now.

I am sure you a good person. I fear if
which I have got a part is deposited
in London, where I am now for it. I
shall make you a visit and the 1st day
of next month. - unless you want it
now, when I will bring it for you.

and we have said of you.

Pl. Sept. is done & the index printing
is now finished. I shall send abstracts of
papers in Volume 1, & in next Vol. etc.

Yours very truly

W. H. Miller

San Diego 7th March 1880

Dear Mr. [unclear]

Enclosed, please find
check for \$27.00. The balance
in your favor will be paid in
next check.

I have not yet received pay for
the [unclear] for [unclear] to the [unclear]. Please
be [unclear] [unclear] but I have not [unclear]
with the [unclear] [unclear] [unclear] [unclear].

Yours [unclear]

I am [unclear] for [unclear] for I have
not yet [unclear] the [unclear] [unclear] [unclear]
them [unclear] [unclear] [unclear] [unclear] [unclear] [unclear]
the [unclear] of [unclear] [unclear] [unclear] [unclear] [unclear]

for the [unclear] [unclear] [unclear] [unclear] [unclear]

I send you a copy of H. M.
[unclear] [unclear] [unclear] [unclear] [unclear]

Yours [unclear]

Cambridge, 23rd March, 1853

My Dear Wright

I thought I had sent you
the little article on Myelazine
I send it with this, to Dr. Sney's
care.

The Doctor informs me that you
are aboard, and likely to sail
at the end of this week. News I
did not expect, from the last account.

A pleasant voyage, and a proper
distance be you, - and fine bot-
anizing. There is a great deal
in the Sandwich Island yet. Most
of the specimens I have to work with
are poor & incomplete. Every thing
you get there will be good.

How shall I communicate with
you? Shall I send my letters to
the Navy Department, to be
forwarded?

When will you be likely to be
at the Sandwich Island?

The rest of matters that will come

Charles Wright, Esq

in for you. I shall send to your
brother, Mr. John G. Wright.

I write you lately, that
I had a letter from Mr. Graham:
who expressed himself well
satisfied with what I had done
in the publication of M. Wright's.

College work has begun, and I
am very busy; but ere long I
shall be at continuation of M. W.

As you want Pillsbury's Jour-
nal sent to you while away.

If you please only to give me
directions where I shall have it
sent; then addressed, and I will
have the Editor send it to you.

With renewed good wishes for
a prosperous voyage ^{in which Mrs. Gray desires to join} I remain

Yours most cordially

A. A. Phelps

Cambridge 24-March. 1855

Dear Wright

The enclosed check came
from Dr. Engelmann to-day, with direc-
tion to pay the same to you -

Check on Atlantic Bank Boston
for one-hundred dollars (\$100)

I have encased it and sent to you -

I wrote to you last evening -

—

Tell Dr. Fenn, I had to-day a
letter (very pleasant) from Carey

Now that his proof of Davis is done
I will return it to him - no time
lost.

Yours, &c.

Asa Gray

Dear Wright

Yours of the 4th is this evening received.
 Enclosed is my draft on Leitham & Co for
 \$53. the rest from Boissier, which will
 be paid you on presentation, accompanied by the
 enclosed receipts, which they want to retain.

Brit. Museum has not paid yet. Booth
 says - always dilatory.

Endlicher's *Coniferae* will be of little or no use
 to you. I hardly know what you can have
 to fill in part the gap you mention.

Agardh's *Alga* it would be well to have.
 I would take it if I were you, & it not too dear.

Call on Mr. Putnam, ^{10. Park Place,} who will
 give you a copy of the new ed. of Bot. Trust
 Book, if it is yet bound up, as is most likely.

I shall send you men's about Sandwich
 Island plants to those I had & proofs of
 plates if I can get them.

I have just written to Bigelow again, &
 sent him Pl. W. 1st & 2^d - I am sure
 won't gladly send for prices -

The new 1/2 part of Hooker's Species
Filicum contains a Cheilanthes Wrightii,
Lindheimii, Gardneri, aspera. & all in
your collection. In Bot. Mag. to Hooker
has signed the note about Arthrochloa
from your specimens, I think.

I will write to you at length.
In haste Yours very truly

Alway

London, 1st May 1841
Dear Sir

I have for your
letter of the 24th ult.

receiving that your agent,
has written me to say that
you will be in the country
in the month of June, & that
the same will be the case.

I have to say that
I shall be the same
as well as the things which
have been.

I am, Sir, your obedient
servant
I think it would be better
to be your agent, as the same
will be the case.

what was left of the ship

If you go by the traps
you will find a number
there now that were in the
large the ... are in the
"hands"

I suppose you think that
you have among the different
varieties.

I'll look for you after you
get all work. When I shall
not it appear. I will see that
you have facilities, buying the
you some more quarters.

If you get instructions
I shall send you through
the ... department. I shall
expect you will of course.

... will write to you
again.

but ... at all.

The ... is but a ...
a ... a ...
... expect to
... at ...
... call ...

Cambridge, Saturday
May 21, 1873.

My Dear Wright

Yours of the 17.th is at hand,
apprizing me of your arrival
at N. York, & the bad sailing
of your vessel - a great pity.
- that which I am cannot make
a vessel that will go -

I hope you will not be detained
long. Accommodations, I suppose
will improve - after a while.

But your paper ought to be
shoved away, all but a ream -
~~away~~ ship stores. till wanted.

I have already read proofs
of 80 pages of Exploring Exped.
Botany - only going however,
to the beginning of Violaceae.

The latter part of that family
has something to interest you, as the

Sandwich Islands, I will send
you proofs before you are off.

I expect to be able to send you
sheets of the m.v. - or at least of
all that will interest you, to meet
you at the Sandwich Islands -

But give me an address.

I enclosed your letter to Capt.
Ringgold, informing him that
I wished to send you Sill. Ar.
while you were away - asking
for manner how. As
to reply, yet.

The degree I conferred on
you, is like to be ratified, or rather
Gale will receive you ad examin.

If I have to pay the J. S. it will
be a good lesson for making such
a mistake. - That I am not sorry,
as A. M. looks well!

I shall send your diploma to you

rather, if it comes to me.

The garden is beginning to
look pretty.

Many of your new plants have
been kept well through the
winter - and are now blatted out.

Mrs. Gray is better, but hardly
well. - She sends her best regards
to you.

There will be a good many things
to direct your attention to at the
Sandwich Ids -

The Kunle Island will be a
fine field; and I hope you can
do much among them. Collect
some specimens of every thing you
see there.

I think I will run over to New
York, next week - the day after
Inauguration, and see Tracy - as we
have a vacation of a week.

Yours cordially, Albany.

London, Dec 1/3

Dear Mr. St.

This morning I have
a letter from John Barry Jr.
saying that he will send the
copy of the Sticker's General to
London for you with pleas-
ure. That is all
arranged. I suspect that
you never write to
him.

I've left your umbrella
here after all.

If D. Earl's bill against
you for \$6 which I shall
send in a day or two,

Yours ever
J. Barry Jr.
balance for 1800.
\$30,80.

Cambridge. Feb. 19th 1854

My Dear Wright

Sinner that I am. I have 4 letters of yours unanswered; the last from Lima's Bay, Nov. 4th. The fact is - I do not find time to write half the letters I ought, and those, like yours, which are not to be despatched on some particular day, I am sure to postpone and neglect interminally.

It seems so vague, too, to be writing to a man, you know not where - somewhere on the other side of the world, and you know not when the epistle may reach him. - Say 6 months hence.

Now is it easy to reflect and remember what I have been doing, so as to tell you. This however is pretty simple. Excepting one or two little articles, and the preparing of 2 popular lectures, my whole time since you left has been devoted to the Botany of the U.S. Expl. Expedition - of which I have just finished the MSS. for the Umbelliferae. I expect this month to finish also the rest of *Hyptalaceae* (viz. *Straliaceae* & *Comaceae*). It will make a 4th vol. of 740 pages, of which 512 pages are already printed, and the rest is getting set up pretty fast. I have read proofs up into the *Urticaceae*. There will be 90 lith. plates to the vol. - but only $\frac{2}{3}$ are yet drawn by Sieber, and hardly $\frac{1}{4}$ yet engraved. So that the text will be out a good while before the Atlas of *Hyptalaceae*. As soon as the letter-press is all printed - say in 6 or 8 weeks I

mean to send you a copy of the sheets - wright-brown
especially in view of Sandwich Islands Botany - in which
you will see there are yet many points to be cleared up.
I suspect it will be ready & forwarded to the Sandwich
Islands against your arrival there. Then, I have
written out for Torrey an account of Emory's (Parriss) Cali-
fornia Compositae, and have to do the same for
Miss New Mexican ones. Emory expects to bring out
a Report soon, in which these things will go.
Through Torrey, Emory solicited that I would wait
a while before going on with Pl. Wright. - on the
ground that when I did it would pick up almost
all they had that was new. As I had es-
says come after them as before them, I intimated that
I would delay awhile. - more by taken Ex. (Ex. p. 100) work
pressed so tight that I had not a chance for much
else. Meanwhile, I am trying to get my plants
in better order - by arranging & laying out plants
at evening, which Miss Hayden gives the next
day.

I forgot to tell you, too, that Thurber called
on me and offered his plants collected under Bartlett.
I have written out the greater part up to the end of
Compositae - my old sticking place. - a number
of new things - mostly from deeper down in
Sonora than you went, and in S. M. Californias
Beyond Torrey will work up a part. I shall
nearly finish characters & bot. remarks to Thurber
& let him do all the rest of the talk. Bartlett

Still in hopes that the Senate will print a great
Report for him - I greatly doubt if they do. If
Dr. Thurber's Botany will go as an appen. If not,
he will make a preface for the things up to Com-
positae, and the striking things beyond, and after-
wards I may pick up the rest in the general
continuation of the Wrightian etc.

I have heard nothing from ^{bl.} Graham for a long
while, not since you went away. I do not think now he
will get any Report authorized.

Meanwhile the U. S. Minister at Mexico has
been making a treaty - now before our Senate
for buying a further slice of Chihuahua & Sonora -
to take in Lake Guzman & the Sonora country
some way S. of where you went, i. e. below San Pedro.
So there will have to be a new survey, if this
treaty is ratified, and a chance of more Botany.
I wish you were to be here to attend to it; - only
you have already taken off the cream of that
country, and can now do more, & find more novelty
in some of the countries you are going to.

From ~~Gov.~~ Stevens party - from Minnesota
to Washington Territory - ~~(south of Oregon)~~ S. of
Oregon, bundles of plants are sent home to Baird
& by him forwarded to me. Watched specimens,
- and nothing new among them!

After a long while, Torrey got out last fall.
His Pl. Fremontianae, 60 plates, his Bates, 1 plate,
& Darlingtonia - Pitcher Plant of California - 1 plate.

Hearing he had forgotten to send them to you, I have sent ~~them~~ a copy of each, - along with a copy of Lincoln's Journal Correspondence by the late A. R. Garrison printed here by me, an account of M. Gen. Expt. & of my wife & a pamphlet by Wendell on new Modes of Expt. by J. S. Mass. - I sent all to Baird for him to forward the parcel, as he said he could, thro. the Navy Department. He had it early this month.

Mr. Baird sent me the \$86 you sent thro.
Mr. Ames (who did not come here, when I would have welcomed him
gladly). - But, on settling my account with
Geo. Bridges at the end of the year, I found that
there was a good handsome balance due you by
me. - even \$186.23
- 18.50
\$167.73 - { I at once remitted the sum (you sent
to your brother - to be used for you - that interest be not
lost, along with a part of this balance.

I have now, it appears \$128. of yours. I mean at once to pay over half of it to your brother. The rest will be abundant, I think, for all books &c you will want me to get for you while away.

me to get for you while away.
At the time the \$86. was sent, I had no advices
from you as to what books you wanted. Your letter of Nov.
14 has at length apprised me, and I immediately ordered (they
are put in the counter) the 9 vols. of Walpers, Müller's Spec. Museum
Hooker's Genera Filicum, Bl. Præk. vol. 14 (not out yet) & Lindbergs
Ochidaceæ. When they come, they shall be sent on.

Orthidaced. I hope you get the no. of Silliman's Journal, - which the
Publishers inform me they send on, as directed by Mrs. Ringgold -
as fast as published. (Perhaps I may soon
think of something else to get for you -

Captains at sea are very apt to get a little crusty, - which should be minded just as little as possible. I expect to hear, that after getting well settled and at home in the Vincennes, you find yourself comfortable & all pleasant. Gentlemanly conduct and devotion to one's pursuits, will at length make any one respected - anywhere.

When you return, I trust you will yourself prepare the Botanical Report of your cruise.

I hope so - for your own sake, both scientifically & because your doing so will keep you on pay, some years longer on shore. I will aid you, if I live, most willingly, over kindly points. - perhaps would like to do certain families, - further than that, but, if you will take hold of it yourself - as you ought to do -

I suppose you will have found nothing new at the Cape: though the vegetation there must have been novel to you. It will be pleasant, in the long cruises, to study yourself the plants collected at the last port. Did you get any nice Algae? Look out for them hereafter.

When you are on surveying ground, you may probably be transported back to the steamer again. -

Presently your letters will be coming to me via
California. I hope to continue to hear such
good accounts of your health and activity - Do
not measure my interest in your letters by the
number I myself write. - though I mean to write
often in future. No news here, scientific or
other. Mr. Carey, you know, has gone
back to England to live. & has married a
young wife there moreover.

May made us a pleasant visit at Christmas.
He is very well - as is his family.

My wife, Miss Pierce (Aunt Mary) & Miss
Hayden all write in sending their best regards

Ever, my dear Wright
Yours faithfully

Asa Gray

Cambridge (Harvard University) July 19th 1884
A. L. ...

Cambridge July 17. 1854.

My Dear Wright

I have your kind letters from Sydney, & from Hong Kong; the latter of the 9th April; and am glad to hear that on the whole you have got on so well, through trying circumstances. I expect that these difficulties will grow less, and that as you get into your real field of labor you will have better facilities and a more comfortable time generally, as you direct.

I will send this letter to Hong Kong, and, to have it reach you the sooner (& make up a little for former dilatoriness) I forward it to a friend in England to be sent (post paid) by the overland mail.

You use books on ship-board more than I thought you would. As soon as I got your letter ordering certain books I set about getting them for you. The Walpers came in fasciculi; and I got them neatly & strongly, full bound. I should have sent all off to Baird at Washington, to be forwarded to you by the official - some weeks ago. But I have waited till I could add to the package the 1st vol. of my Botany of Expl. Expedition, which contains many Sandwich Island plants that will interest you and aid you when there. That is now out, some copies just bound up - of the text - (the Atlas, & 100 plates owing to Sprague's slow working is yet behind very much); and now the package is to be forwarded at once - through Baird, who has promised to put it into the custody of the Despatch Clerk at W.

— I have been interrupted - 6 or 7 hours. It is now midnight. To-morrow is Commencement, & house full of company. I have to go into Boston to-morrow very early - mail the return to Commencement. I regret that I did not

begin to write earlier. I must now despatch only a hurried and shabby note. But I will write again soon.

About the account enclosed, I will spare to fulfill the Requisition if Hon. Ringgold will authorize the purchase for the Expedition. Or, I will send the separate original bills if needed - tho. they are mixed up with some other books for myself.

Of course, if Uncle Sam does not take care for them, this Botany M.S. Expedition is to be a presentation to you from me.

I have not yet seen young Storey. He has not called. But I have heard about it from Sanford. Pity that a little trifling authority should spoil people. But, as I said before, I think it will be better, and that you have been very judicious, and that you will reap the advantage of it in the respect of all, even the most ignorant.

I am glad you saw Macleay. I will write to him, and see if I can contribute to his collection.

No news here. A long and busy term is just over. & now I can go to work again at Botany. As I told you I had deferred M. Wright, & in deference to Emory, but now shall go at it again. Emory (who was lately here) tells me that Emory will probably go out to survey the new

Mex. Territory, which runs right through that part of Arizona where your most interesting collections were made - and that his great Report will not go to press, probably till after his return. So I shall go on with M. Wright (conjointly with Flora & N. America) and hope to do much this year.

Your old friend Wilson went across the country with Whipple to California - has brought back good plants, some of which Emory has already sent me - nearly all got in California & Mexico, - not many from the eastern part of Mexico.

Parry is married. So is Schott (to a German lady - I see).

Mrs. Gray has been to Nevada for 3 weeks - has just come home, with her father - this evening. I have hardly seen her yet. (He sends warm regards).

I will write again to you positively without delay. Excuse this!

Ever Yours very truly

Asa Gray

No time to read over a word. Guess you will find it will take you a season to make it out.

Mr. Marshall

Charles Wright Esq.
Walter & William Pacific Aqueduct

United States Ship Vincennes
Tom. Wright

Hong Kong

Cambridge; 20th Sept. 1854

My Dear Wright.

The last time but one that I wrote to you, as far as I know, was in Feb. last, - when I sent a goodly letter for you to Prof. Baird to be forwarded; and about the same time I sent thro' the Smithsonian a parcel containing some botanical pamphlets, - among them Torrey's 3 memoirs - which he might forget to send.

Then, late in July, I wrote you a letter, via England & Ireland & mail to Hong Kong (paid through) which I trust has reached you safely. Since then I have not heard from you, but have seen a later letter at Torrey's, and have heard indirectly of you from your brother. In my last I was mistaken in saying that young Allen had got home. He has now arrived, however, and I hear his health is very delicate.

In my last I told you I had got the books you wanted, as far as possible - and I sent a regular bill, so that you could get the money from the Navy, as a requisition. The books, well packed, were put into the Smithsonian hand early in August; and Prof. Allen, July, wrote me that they had been given into the proper hand at the Navy Department to be forwarded to you. So I hope they will come all right. The delay, as I explained, was owing to my waiting from June to August for Putnam to get a few copies of text of History of Exploring Expeditions

born). Now let me see for news since then. The least pleasant first. I told you I suppose that I had sold the greater part of the copies of my Nat. Expl. Exped. (Vol. 1, with refusal of the rest) to Putnam & Co - for just about enough to pay what they cost me. I took Putnam's notes for 4. 50 months, for \$400 in payments.

Well, now, just as the first of these is coming due. Putnam & Co - in a piece of hard times, up and stop payment - leaving me to pay printer & paper - man any way I can. - so I shall be very much straightened this winter when every thing is dear (coal at \$9.00), when I expect to be rather comfortable. Putnam is trying to arrange with his creditors to go on. - but I fear I shall get nothing this winter or fall, and perhaps little hereafter. If he swashes fairly, I shall lose some 500. Dollars or more by him. - which is hard.

As to Expl. Exped. vol. 1, not yet ready. I suppose not having yet finished the drawings - so slow is he.

At the 1st of this month, I made a little visit to Torrey at New York. - he only at home; family all up in the country, and Mrs Torrey in very poor state of health. I fear she will not get up strong again.

I looked over Bigelow's collection made in Whipple's survey - all the best plants Californian & especially on Eastern border of California.

Some new & very curious things. I am now printing a little monograph on Thurber's new plants got while under Bartlett, in Thurber's Academy.

On Monday I got a proof back from him - from Providence - and the next day I learn from the newspaper that, while printing, "Mr. George Thurber" (I fear our friend) had one hand blowing to pieces by the accidental discharge of a gun! I do hope he will not lose the member!

We have got from Mexico a new strip of land in Sonora - and Emory is appointed the Commissioner to run the new boundary. He takes no botanist (which is mean) but Schott is to collect all he can.

I told you Parry is married. He & his wife were lately at N.Y. Torrey saw them, and says she is a very nice body.

Alliman's Journal is sent you regularly from New Haven, to care of Dr. C. King. I hope you get it.

I am distributing, as I get spare hours, in the barn - the great mass of Berlandier's collection of plants (bought by Hunt) off into sets. They are mostly the regular Texan things - gathered 20 years ago. It is a great job.

I am working hard to get copy of rest of vol. 2 of Flora N. America ready for printer - I hope to begin to print it at the beginning of winter. - I am getting on with Pl. Wright. II - Pl. 3. at the same time; making it a sort of commentary of the Flora. But it is very slow & tedious work.

I am alone, my wife at Beverly, helping to nurse
a sick niece Kitty Loring (whose father is in Europe)
— who has been sick nigh unto death; but now
seems likely to get well.

When you get into the Pacific, & on to the
field where good work is to be done, I hardly
doubt but that you will be sent back to the steam
— where you will do better, and will enjoy yourself
very much more. — I dare say your patience is
~~and~~ sorely tried now; but don't give up; — and hereafter
you will have better times. At China, if near him
(Canton, or Macao) you will know S. Bell, Williams,
Ed., of Chinese Repository — a fine man & once
a very fair botanist. He will remember me well.

I hope you will have a chance to ransack
the Sandwich Islands where is yet much to be done, in the
mountains.

The last package sent to you contained,
Lindley India Orchidacea, pts. 1-4.
Walpers. Repert. & Annals Syst. Bot. 9 vds. bound.
Hooker (Bauer) Genera of Trees.
Muller's Species Muscumar. 2 vds.
Botany of Expl. Exped. in Texas — vol. 1. (text) 4th.

Maackenzia, vol. on the ~~Leaves~~ Flowers, is all printed (under
400 pages) but not yet out. The atlas of plates is to be out at the same
time, or nearly.

With best wishes for a good time
and a safe return, I remain, Dear Friend
Ever Yours
Asa Gray

Cambridge Oct. 6, 1866

Dear Wright

I wrote to you a few weeks ago sending my letter through the Navy Department: which was about to be despatched to the Pacific understood.

No news since. I am printing in the Memories of American Academy Flora Nova Murberia - i.e. - namely the principal new plants peculiar to that collection. Also a short paper on the affinities of Varzea, Benth. & Rhytidandra. May. Two Hebe Island plants.

The binder reported a missing sheet in your copy of Walpers' Annalen, vol. V. I had a blank sheet bound in, and ordered the missing one of the importer - who has just sent it to me. Here it is. In my case I wrote that I had sent the books to you through the

Ms. 20. 4. 1866

Hebe

Smithsonian & the Navy Department;
I hope you will get them as soon
as you do this. - when you can
remove the blank-sheet, & paste
this in.

I was in New York a month
ago - only for 4 days - I may well
tell you that Parry is man.

Maybe you were out of the Chinese
vicinity, and at the Kurile & the
Sandwich Island -

Hugues has not yet got all the
drawings done for 1st vol. of Atlas
of Polyn. Expl. Exp. - will in a few more

Sackneridge's volume should be
also printed; but it is not yet out.
to the press

Yours, very cordially,

Wm. L. G. Gay.

old. This little holiday
will not be a bad thing for
me tho. it put me back
a little.

Atlas of Expt & Prod.
vol. 1. is not out yet. The
fact of that is wholly at
Washington: Drayton is
very slow.

Baird has given me
~~means to~~ assure me
that the package of books
for you was duly sent from
Brooklyn conveyed by
a steam ship.

Mrs. Gray is very well
for her - just now very
anxious about her child.

He seems to be very
kindly interested.

The Ferry, came and
had the Advt. brought
to Meeting at Providence
this month of the Scienc.
ed. - Mr. Ferry, President.
A fine time - much Science
but little Poetry there.

I have some new notes
to write yet, & must finish
We have some

Advt.

Cambridge, 22nd May, 1876

My Dear Wright

Welcome home again.

I snatch a moment between lecturing & recitation — down town — to write this hurried line. . . I wrote you

once since my return from England last fall — and once to Nicaragua to the address you gave me. — in the 1st of the 2 letters you wrote me there.

But I foresaw that the filibustering would take you away from there very soon — and have been anticipating your arrival. . .

Torrey must have given you ~~the~~ ^{some} ~~idea~~ ^{idea} of what I have been about & am doing. He does not exaggerate when he says I am overworked. — but miscalculation about the time required for new ed. of Manual — which should have been done before College work began this Spring, — but is not done yet.

— I have had to beg Torrey not to visit me yet — but now soon should like to see him for a little while.

I should like if you would visit me

a visit very soon - Because presently -
i.e. late in June Mrs. Gray's invalid
sister Mrs. Jackson & whole family, with a
baby & son are to come & pass the summer
with us - (as she cannot go to Beverly, being unable
to be mixed so far) - and the house will
be clock full. You will find many
books to read & to talk - & we will talk over
your adventures at odd hours.

I do not know as you can do much
of any thing for me except without looking
matters that will distract my attention to
much - for I have yet a vast deal to do
that is very pressing, - except just now, you
could help make Index to Manual,
if you like (Mrs. Gray is about it) & help
me in finishing up some Statistical - geographical -
cal matters relating to our N. States & Prov.
Come middle of next week if you like &
we shall be glad to see you.

I hope you will be kept in Mrs.
Service a good while, to work up your
collections - & will ~~take~~ take hold and do
this - in which you will be able to do
yourself much credit. Books & any
personal aid I can give you you are
welcome to.

Fendler has been here from Venezuela -
with a good collection - is just returned -

I have been very busy since you left
have not idled - but I cannot show
as much for it as I ought.
Ever truly cordially

Agassiz

Charles Wright Esq

Wethersfield

Connecticut

Dear Mr. T. J. Sullivan
I am very sorry
to write - I am now
half sick with - (C),
but I am trying to
write a few lines
just now.

I am so with the
Manual now published
Sullivan's copy of the sci.
which is the last one of
the series. I have got
a list of - which
I shall put together
the 2d day.

When you come
shall help about that, if you
like. - the rest of

And amuse yourself
while you are
not telling me
Venice

But your paper collec-
tions are at Wash-
ton. Why not take them
and work them up?

It can be till
after the day of the
week the 12th and
after that it is
in the
winter time

W. L. G.

— Cambridge, Aug. 6th 1856

Dear Wright

About the time your
favor of the 1st Aug. arrived
the last revise of the last
pages of Manual was
passing thro. my hands.

It is now out of my hands,
Putnam will bring it out,
I trust, in the course of this
month.

I have stuck by now
almost a year; and on Friday
wife and I are going to see
my mother & friends in Ouida
Co. — meaning to be back
~~about time~~ as far as Albany
so as to spend 2 days at the
Scientific meeting there
about 20th inst. — & then I may have

a day in New York, & so
home again;

About the books, Can
you find at Brooklyn any
memoranda of their being
sent from there, by the
vessel spoken of.

I hope soon to hear that
you are reinstated and
have the collections of plants
turned over to you.

The plant you enclose
under name Calif. Seed, is
Phacelia circinalis.

Will you be at Albany,

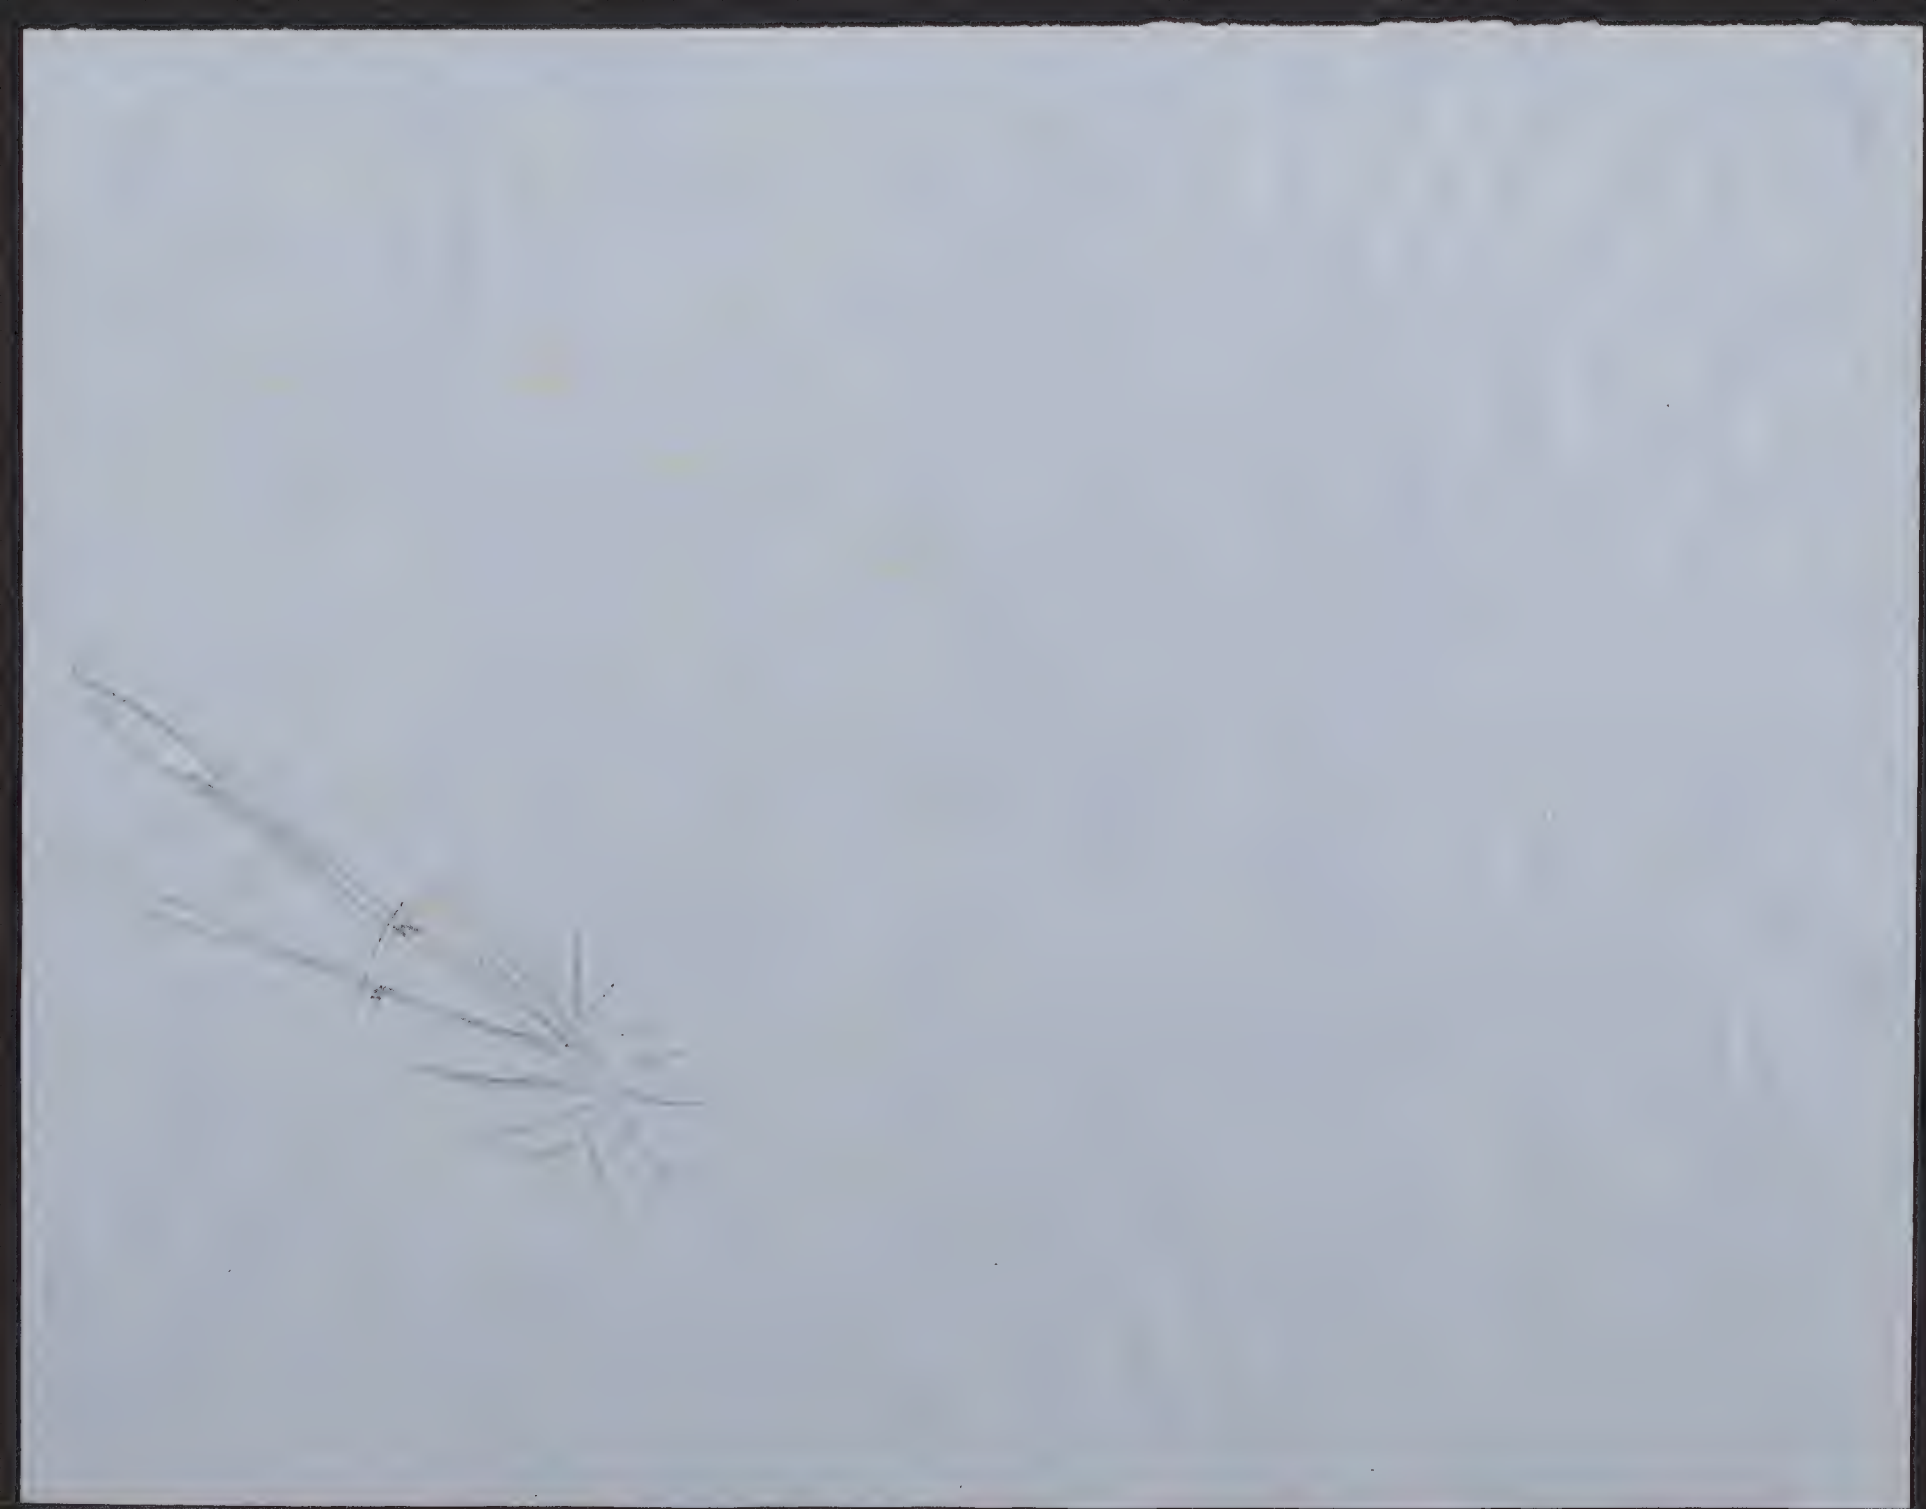

Yours very truly

Asa Gray

Ch. M. 27

Engelmann
want to know what
you and we have
about you. Will you
be so good as to
write me a line
in a few days to the
effect of

Engelmann
respect to you.

My dear Mr. [unclear]
I have just received your
letter of the 10th inst. and
am glad to hear of your
well being. I am well and
hope this letter will find
you the same. I am
very truly yours,
[unclear]

I have just received your
letter of the 10th inst. and
am glad to hear of your
well being. I am well and
hope this letter will find
you the same. I am

[unclear]

Yours truly,
[unclear]

[unclear]

hope you can find
 the best way to get into
 can on the first of the
 you are all together
 the first of the
 in this visit. I am sure
 that he has left you
 to the whole of the
 and the whole of the
 and the whole of the
 in the whole of the
 last of the whole of the
 regular and the whole of the
 and the whole of the
 and the whole of the
 and the whole of the

[illegible]

Wm. A. Gray

We are anxious to hear
how you are getting on, in N.

new, old, hollow, broken

I wish to tell you that I have written to you to ask you to send Bot. Museum object, and I am sorry, if you can, to say, that the number of E. of. Cuba are to be deposited in the Bot. Museum, as he has been.

[illegible]

shot a word more about the
package of books in Express to
Frank & Herbert. But a
few days ago I wrote to Prof.
Hewitt, and sent him a bill
for the cost, with request
to "ettle". I am curious to
know how it will turn out.

I have lately had a visit from Dr. Torrey, he came the day after Christmas, and staid a week

I have no hand at work. I have
 had been here a week before
 we started some valuable time
 in a rough overhauled as
 was the case in the
 (that is the specific time)
 in the case of the
 in a week or so, and
 I shall be

Mr. Carey (John Carey, now
of London) has lost his young
wife suddenly, and is going
to sell his herbary, & break up
house keeping; for man.

We go on here as usual, Mrs. Gray has been rather poorly with a succession of colds and face-aches, & tooth-ache, - making her thinner than ever.

She sends her best regards
to you, and wishes you the best

The an. bottle will have
a publication soon.

Write you that I have been
writing to you. I doubt if you
will have much chance
to much to hear

With Mr. T. I am in a
hope you will send me
some branches of *Poliothra*,
Lianan, & all curious matters,
by ship for the Cape of Good Hope.
If you think it would
be interesting or useful
to him, or to Signora, please
to let me know.

Ever yours

John Gray

Do not the queer thing you have
with a head & calyx & *adliacea*,
why do you not send a flower
in your letter.

San Diego, 12th Feb. 1847

Dear Mr. Gray:

I have just received
your letter of the 15th January.

I am sorry to hear
that you have not yet got the
filament. I have
written twice to you, and
have sent two newspapers
all directed to Santiago de
Cuba and I do not find
of course why you have not got them.

Some of the 15th Jan.
I think you are doing very
well. It is a nice thing to have
a composite of these, with
a plantation. If I can do anything
for Signora I will do it.

had to plant much.
- hope you will try the
at E. corner of the field -
to remove it & scrape the
Cats back also, till now
and at a late season -

In the wet season, get
into the plains or savanna
in the interior. There must be
a time when there are flowers
with flowers, & different things
from those in the coast - now
later. I don't like a hurry
about returning. Now you
are there and comfortable, keep
it up, and make a large
collection.

- I did not suppose you
would have any time to work
with a microscope - nor to
look in books much.

I'll send you some seeds
later if you want.

I'll tell Frederick and
tell you are doing well
for them; also - friends.

If you see you are
likely to run short of -
plant - paper, and as a
Vessel for St. Domingo is
now up, I'll do what
I can to prevent that, and
to save your Driers from being
used up - for you will
want the property.

For yesterday, I bought
you a bundle of 5 reams
of paper for your plant
I ordered it at about 2
the Mark Cambridge
(I think it is up for the paper)

I'll return this and
enclose a bill of lading
for the same -

Letter, by letter - say of
said vessel, & I hope
that will reach you
safely, & I hope all

The vessel is the
way to Cuba via
I will be my letter
will come up for this
was rather in the whole
could save the other
between,

There is a lot of the
which, you are for
app. "until the
haste I want just
as a business
trial to see if it will
reach you under sea.
I have put a address
all at my confidence

to Mr. Murphy, and
ask if there is anything
you would like to see.

I am your friend
I have to your present
quarters & long
the steamer is for
you & have a man
you, & making a copy
of a few days or a week
back, so the
must be come a to some
else month. But to
the to reach all
the high mountains you
can't there there most
to reach. So at it
after the time, again
I hope you would see
if you can get across
the country to and Nevada.

no other news.

We are very well here -
every thing going on in the old
way. Ever Yours faithfully

Alfred Russel Wallace

Chichester 21/1/07

Cambridge. March 21. 1857

Dear Mr. Wright

If you get a chance
to collect any considerable
quantity of seeds of
various sorts of
plants, there is a chance
for getting some price for it.
We are out your receipts.

Write you under cover
to Mr. Wright - a few
days ago. I renewed my
mention of a package of 5
reams of plant paper which
I sent you by the Great
North. from Boston for Santiago.
- full of ladies sent in a letter
by letter bag of that vessel.
I trust you have got
it. As you are so -

pleasantly situated. I trust
you will remain as long as
nice new things turn up
all around you, or are to be
found on the highest mountains
in your reach & some of the
Western Savannas. I say little
of my or my quest, at least.

There is no reason for
hurrying on account of
the Pacific Exploring Expedi-
tion. But I am glad to tell
you that Congress (as I
learn from Washington) have
appropriated 15,000 dollars for
making up the Natural History
Collection of that Exped. made
by Simpson & myself. So
when you come home you
must settle down into a
student - a house-drawn person
in the study.

May 14/18

My dear Mr. A

I am still a little of the late
or more or less in the same
moment to write you a line, to follow
with it a heavy bill which I have
had a week or two ago. I want to
have some letters from you. It
is not yet decided to ship to New York,
in some other place. I hope to have
about the 1st of April. I am
not yet sure for you have been
with me in natural position at the
apartment for your paper. I have
not referred in your last to that type.
I am very sorry you have not
at last. But the time was
very and I am sure for it.
I am very glad to hear you are
good and hospitable for in the
will work away till the weather
goes away. But don't go for to get
a fever. and keep in the mountains
not on the low coast.

I am sure you can't get into the sea
in the mountains. I must do it in the time

in the world to the greatest novelties - except
in the highest mountains. -

We will have the Crypt. taken in hand,
as soon as they come. ~~Some more money~~
We will see whether to make separate
Crypt. distribution, or put these with the
other. I hope Ferris' & Crypts. will make
a set for separate distribution.

I am expecting some of your collection
will come down. But whether yet have
I had some of me to ship.

At this time, I told if you want
to call to see much for me. But Harker
I am glad you will do something for - it
more the better.

As for my book, Lianas & para-
ites, I hope to have it printed. I never mind
whether you get any foliage or know what
they are, or not. If you know, or
guess, all the better, sure. But when you are
again at Montpelier, at any place where it is
safe for Harker, please send me any green girdles -
piece of bark stem. - I think nothing better than
selfishness, & I am sure, I shall be able to
all make things you can say to me. If
that goes, I shall be able to make more of you
are to be the biggest things you can get in the world.
I am, I really am, Yours truly, A. May
I can't guess at your green skin you - A. May

My wife sends best regards:

I hope you may be home by
the 4th - Sunday

We want you. All goes on
after the old sort & only I am
busier than ever.

Nevertheless I will be to looking up
your life and plants, if you want
next fall, if I survive —

A.B.

Gray

Wawa

George Washington
360 The
San Diego
Cuba

For
L. H. M. J. D.

Wawa

Cambridge, 17th Oct. 1858. Every.

Dear Wright

Yesterday I got your favor of the 15th with your accounts from Frazier enclosed.

The same mail brought a letter from Frazier, announcing his arrival at Baltimore, and asking me to send him the funds I had of his to that place. Wanting to send him \$200, and having nothing in bank to pay with, I concluded to grab a part of the funds your accounts placed in my hand - So I went to Boston drew your \$600 (after waiting a long while for the Navy Agent to come in) appropriated \$250, and got the enclosed check for 350 - the remainder, which I send you. I must have it forthcoming for you. I suppose when you go to Cuba, will that do?

This paper is vile, I must take another sheet, on which to write the rest of my talk.

the work would be better
done if done by the
man who makes it his
specialty. But I
will insist upon publishing
here -

Let me know at once
if this suits. You will
not have time to name &
describe these things before
you go, and I hardly will
wait to take me a fortnight
to do it as I should want to.
In a week I shall have
finished the Compendium
of Yang Kung, Lee Chow &
Japan - I must have done
it out the whole Japan ed.,
with your names.

Albany

Cambridge Oct. 22, 1858

Dear Wright

I have yours of the 20th.
I quite agree with you
as to being chary of personal
names for species.

As to Wright's
I want to keep them for
this side of the world as
much as possible. viz -
from N. Mexico & Cuba.

I think I have
read something about
Yangi popping out species
at intervals. Have you
Harkness' Introduction
to Wright's Botany. I
think you would like to take
with you perhaps -

I am curious to know

your data about hybridiza-
tion.

Tomorrow (Sat or Day)
before I mail this, I
mean to go to Boston, and
enquire diligently about
a vessel for Mr. Tappan. I
must like you to go from
here. But, as you say,
you must not delay too
long.

Lescaille is a gentle
man as is a gentleman,
she can greatly facilitate
your operations, and contrib-
ute to your comfort and
efficiency very much.

You must send go direct
to him. At the proper
season, you and he can
arrange some way of getting
well into the Savannahs.

Mrs. Gray is in doubt

whether it is patterns for
wristers, neck or white em-
broidering - for collars, flannels,
or - that the Lescailles
want. - but supposes the
latter. Can you enlighten
us about it.

She thinks of selecting
a quantity of the latter
& sending it as a present
to the ladies.

Is there anything
else! I think it be
in the while to send my
little book for your people.

Shall I then write
Lindley to name the
it desired himself, & furnish
characters to me to be
printed here? It would
be the same as trouble &

6. 11. 1857

1157

I have done up for you the *Lo Choo*
and the *Hong Kong Rubiaceae* - the latter
however awaiting some information from
Mr. Benthams.

I do not see any particular obstacle
to publishing in brief names and char-
acters of new species of your plants, so
as to secure them. You know I was
contemplating to do so soon for the
Japanese things, and was going to
suggest to you to ask Capt. Rodgers
leave to do so, in the American Academy
at Boston. There will be a good deal of
matter to publish in this way.

The *Hong Kong*, *Lo Choo*, & *Born* novelties
could follow this Japan article, as soon
as Mr. Benthams gives us some desir-
able determinations, (which I soon expect).

When you return here you might
copy out the characters of the few novel-
ties in the coll. of *Bechning* *Arats* &c - That
coll. is more interesting for its critical
remarks, & its contributions to geographical
distribution, than for new species.

The Cape things are in no danger;
but I will ask Harvey to furnish
characters of the few species regarded as
new, as they are worked up in Cape
Flora - or in advance of that.

And as fast as the Cryptogame
things come in, I will make an abstract
of characters of new species to print.

You know I have asked Bentham
to publish all his notes on Hong Kong
Botany here, and I lately repeated the
invitation. If he does send me the ^{mass}
then the credit to the Expedition therein
will be duly secured. If he ^{has} to
decide otherwise, I will immediately
ask for characters, or indications of the
few new things, to print here.

As to the names of your new plants,
I am confident he would (just as in
the case of Champion's) prefer you should
name them; and of course for the Soo-
chow & - which are only collected by you.
This would be the case.

I have just received a letter from

Lindley about the Orchids.

Of the Nigra ones he names the
ad. - 2 or 3. Doubtfully, on account of
state of specimens; and 2 he says are
new species certainly, one Epipendrum &
one Camaridium.

Of the Japan ones, 4 he says are
new. (but two of them are in my Perry
paper, which he has overlooked)

Soo-chow & - 1 new & 1. Doubtfully
I add - "Thus you see Wright has
got some good things. You should
make a little paper out of these mate-
rials with characters of the new species
and names."

I was going to tell him to add the
character & give the names himself. But perhaps
it would be better for next - that you
might prefer to name them yourself, &
that Bart. Rodgers might prefer it on
national ground. For they are published
here, that is all I should think im-
portant.

No word up here for Mr. Engl.

State the substance of any of this
to Capt. Rodgers - Say we will
soon publish characters of a good batch
of things; that I will take care of
the whole concern while you are away,
& continue ^{and additions} any corrections to the
ms. which are called for.

If Mr. Ingr. would turn
up, would you think it worth
while to incur the additional expense
of taking me to some other port, & making
your way round along shore, or across
country, sending principal baggage
round?

Mr. Gray desires to be
remembered to you.

A Gray

Cambridge, May 7, 1860

My dear Wright

While waiting for the
next Cuba mail, this
morning came yours of the
17th April.

Just as to money.

It is pretty clear that
Bradford never read the letter
I meant him to. For I
am sure he would never
object to cashing your
drafts.

Well, here is \$150
which he, or Brooks & Co -
or most any body will
cash. And, as soon as I
can go into Boston I
will get another certificate
for \$100 more, which I
think may settle this.

I am glad you are doing
some collecting while the
boat is here. Do all you
can - for Smithsonian -
for I mean to make
Henry pay something
and take a set of your plants.

Agassiz wants me to
ask you to collect small shells,
insects, and especially little
fishes for him - to put
them all right into bottles of
spirit - as strong as proof
spirit. He says he will pay,
I suppose he might. But
I think you had better collect
all these things for the
Smithsonian in the first
instance, and let Baird
divide with Agassiz, if
he likes.

I'll take good care about
the Tern - skins, and will not

truncate any of them, not I.
I am on the watch for a
Santiago vessel, to send your
Dictionaries. But I fear
a letter if they come while
you are away in the interior.
New fields are quite
desirable: for you must

The Bombaceous tree
you write of is either Ochroma
(which you got first time, mostly
in fruit) or Eriodendron - by
the character.

Thurber is gone to Michi-
gan to live - so I have nobody
to do jobs for me in New
York. But Eaton is soon
to be settled there, and he
is the best man for all
that. I shall turn
him to account.

The Democratic Convention

I am glad you are doing
some work while the
boat is here. Do all you
can - for Smithsonian -
for I mean to make
Henry pay something
and take a set of your plants.

Agassiz wants me to
ask you to collect small shells,
insects, and especially little
fishes for him - to put
them all right into bottles of
spirit - as strong as port
spirit. He says he will pay,
I suppose he might. But
I think you had better collect
all these things for the
Smithsonian in the first
instance, and let Baird
divide with Agassiz, if
he likes.

I'll take good care about
the term stems, and will not

truncate any of them, not I.
I am on the watch for a
Santiago vessel, to send your
Dictionaries - But I fear
a letter if they come while
you are away in the interior.
W. H. Miller & Co.
chairs, also 4 great
Dictionaries.

The Bombaceous tree
you write of is either Ochroma
(which you got first time, mostly
in fruit) or Eriodendron - by
the character.

Thurber is gone to Michi-
gan to live - so I have nobody
to do jobs for me in New
York. But Eaton is soon
to be settled there, and he
is the best man for all
that. I shall turn
him to account.

The Democratic Convention

I am glad you are doing
some work while the
boat is here. Do all you
can - for Smithsonian -
for I mean to make
Henry pay something
and take a set of your plants.

Agassiz wants me to
ask you to collect small shells,
insects, and especially little
fishes for him - to put
them all right into bottles of
spirit - as strong as proof
spirit. He says he will pay,
I suppose he might. But
I think you had better collect
all these things for the
Smithsonian in the first
instance, and let Baird
divide with Agassiz, if
he likes.

I'll take good care about
the farm-stems, and will not

truncate any of them, not I.
I am on the watch for a
Santiago vessel, to send your
Dictionary - But I fear
a letter if they come while
you are away in the interior.
Will Brooks then take good
care of them, or let them lie in
custom house?

The Bombaceous tree
you write of is either Ochroma
(which you got first time, mostly
in fruit) or Eriodendron - by
the character.

Thurber is gone to Michi-
gan to live - so I have nobody
to do jobs for me in New
York. But Eaton is soon
to be settled there, and he
is the best man for all
that. I shall turn
him to account.

The Democratic Convention

held at Charleston, Monmouth,
and dispersed or rather adjourned
in two sections, without
making any nomination
for President.

Your brother has probably
told you that the Reuben-
sons have kept Connecticut,
also New Hampshire, this year.

Ever Yours cordially

Asa Gray

Cambridge, Feb. 16. 1861
Dear Wright

Here is a line from Dr.
Hobbes, who appreciates all
you are doing. They would
be glad at Ken. to have prints
of Palms, and specimens
with notes of all you know.
Will pay handsomely.

No news since I wrote.
Last to you not heard from
you since

Mr. Sprague has paid
off my mortgage on his
place (by mortgaging it deeper
elsewhere), and so I have
paid off ~~your~~ my notes to
you in your brother's hand.
The principal for which was invested
there. The interest brought
my payment up to \$691.

If you can spare in the
summer, you will find us
all turned up, in the
building of a fine-print machine.

which Mr. Thayer a Boston
gentleman - gives to the
College, at the cost of about
\$11,000.

In the autumn it will be
all done - made in in October.

I have just sold another copy
of your Flora & Mosses.

Very few of the former left;
and the latter will all go
when the 2^d part is edited.
I hope you will send up for
Harvard all the MSS. you
have collected - that Sullivan
can work them in.

Do not be afraid that we shall
not sell as many sets of all
plans - Phary, & Cryptoph., as
you collect.

I wish now Grisebach
would make a general work
on the Fl. Cuba - based on your
collections. Ever Yours
A. Gray.

Cambridge Oct. 7, 1861.

My Dear Wright:

Here it is - after a warm
& pleasant Sept. - now as sultry
as in Cuba this Oct. 5-7.

My latest from you is Sept. 4 -
came a few days ago - full of botanical
memoranda - and showing you are botani-
cizing with success.

My last to you - two letters, Sept 5,
enclosed a draft for \$100 for you, which
went by Havana Steamer, & I suppose
reached you promptly.

Just now the Havana steamer are
taken up by the Govt. for transportation
(we know not whether, I guess Mobile)
and I will avail myself of a sailing
vessel up for Santiago, and go in to
Boston this morning to put this on board.
I am trying to think what I can
send you. Copy of Grisebach. Fl.
Brit. W. Ind. I. Catalog is to ship, or
has - from New York. What can I
send you for reading or science? I do
not know.

By the way a vessel was recently
came in to Boston from Santiago. -

Oh why don't it not bring
your collection of ^{plants} at last?
I want much to share them in
your collection. to be determined
for his next plant of Pl. Col. W.
which, he tells me I shall have
before the end of the year. He has
studied all the Almopetale species
Boraginaceae, Verbenaceae, &c. and says
the Almopetale are full of in-
terest. He has given me the
names of a selection of the most
interesting and new things in it
- of which I will give you some idea
in this - in a following letter
for I must run now.

The Rubiaceae are especially
good & full of novelty.

If the vessel does not sail I
will add another letter by her -
with details.

Ever Yours

Gray

Cambridge. Oct. 25, 1861

My dear Wright

On the 7th I hurried into town to post my letter on board a vessel for N. Y. Two vessels were up, and I felt sure of one of them. But, lo! they had both gone the day before.

Doubts about Havana mails, and much occupation (I have been working hard at Milnes Exped. (Misspelled)) have kept you out of sight, & out of mind, till now, - when I am ashamed to neglect you longer. I have not since heard from you. Yours of Sept. 4th is my latest rec^d.

We are much saddened just now by the bad cutting up of our 20th Mass. Regiment, which has many officers from Boston & Cambridge, and which was placed in a bad position by bad management of Gen. L. More - tho. at first it was thought that Baker (Col.) who was killed, was the person to blame. But officers & men all fought with true courage and behaved nobly.

Your old friend Purroy is back (to Davenport) from his trip to Rocky Mts. behind Pike's Peak, - where he has made a rather small (about 400 species) but very good & beautiful collection. I am now running it over, and naming it - rapidly - for I cannot spare much time for it.

Y. L.

Here are some of the determinations of select plants of your Manuscript, which Wislizenus has sent to me in advance of the general report (to be given when he has done the Boraginaceae, Veronaceae, &c.).

Sphinctanthus longiflorus, n. sp. = your great long-flowered *baccate* *Veronica*.
Schradia cephalophora, n. sp. = shorter flowers, several in a thickish head.
Hoffmannia lanceolata, n. sp.
Exostema, 3 n. sp. & another of Richards.
Ferdinandia, 2 n. sp.
Rondeletia 2 "
Marattia lygistoides, n. sp. Your common one.
Aleandria callitrichoides, n. sp. Little bit of a species, like a *Miconia*, in all your collections.
Lycia tuberosa, DC. - Your nice little one, a little in a letter, - little, delicate, low thing.
Guetarda 3 n. sp.
Hemistemon 1 " & the old one
Chione 3 "
Crithallia 1 "
Psychotria 10 species are mentioned, either new, or little known ones of Sw.
Machonia micropetala, n. sp.
15 *Compositae* are mentioned, among which is "Lantana sp." Might be, Sw. - your genus.
I must not stop to mention other things, except to say that Wislizenus has made a new genus of a twining *Antianthe* or plant with very small leaves, which I think is common with you. Perhaps you had best pick up more, if in your way. He calls it *Goeppertia volubilis* (but I don't

like such having suppressed the name *Goeppertia*.

And there is Wislizenus's new genus of *Antianthe*. *Roranthus Cubensis*, a very fine thing indeed. Flowers look like a *Roranthus* - large, but they have a pair of ~~large~~ connate bracts giving the base of each solitary flower, whence the name *Roranthus*. And there is much a strong dipetalous like line or band, connecting the bases of the opposite leaves, which led me to think it a *Lycopodiaceae*. It is a very ~~strange~~ interesting, striking plant, and the supply is not great; more would be very advantageous.
I should mention that it has *baccate* calyx above the connate bracts; tube of the corolla not an inch long; and stamens & style long-extended.
Your means, as it are
"Loganiaceae. A bush 10" ± high. La Plata
Harallows. M. V. March 1."

"*Bigoniaceae*. *Borvaisia* aff.?
Stigma bitumellata; the lamellae appressed obicular. Cor. green? (in one specimen at least) Stamens 5. The lower one with a smaller anther."

No habitat with this ticket, nor date.
I hope you may recognize this.

There is also - somewhat related to this - a new *Lisianthus*, which Wislizenus is

pleasant work, which is scarce

Your note of it is

"Scrub". A feeble shrub, with prostrate or procumbent stems, and ascending branches, 2'-4' high, in dense woods. Fl. yellowish-green. Stam. 5, all apparently perfect, or the posterior a little smaller. M. V. July 19." You see all that and I bet is full of good things!!

Sullivan has sent me the brief account of your Mosses - as I have written to you. And I have printed it. I will venture a copy by mail.

If it is stopped en route, I shall not be much surprised; but I think they will let it go through!

Nothing heard yet from our Hepaticae which were turned over to Gottsche to study. It is about time to hear of them.

The papers speak of: mail to Havana on the 29th from New York. So I hope it is all right, and that this will go. We shall see. Ever Yours cordially

Forster

Cambridge, 21st Feb. 1862

Dear Wright,

I only got yours of 2nd Jan.
from Sancti-Spiritus, and a
few days ago that from Bunka,
of Feb. 1.

I rejoice that you
are so happy and comfortable
and find kind friends every where.
For the past 3 weeks I have been
driven to near distraction by
work, all in a heap, and I can
hardly breathe yet. But I must

write you a short line by the
approaching Havana mail.

I will write more in detail
soon, and expect to arrange so as
to send you ⁱⁿ next letter, a draft
for 150 dollars on Havana. For
I think Eaton will be able to
find some ^{N.Y.} house that at once can
Havana.

I enclose some
ships of friends, and Eaton and I
will try in this way to keep you
posted up a bit while near
Havana. - where however, I sup-
pose you will be more likely to
see U. S. newspapers. We have
good news now almost every-
day, and expect to use up the
rebellion this spring.

The additional copies of Gristlebach
Jl. Mr. W. L., and from
Kearse the publisher, have not
come. Nothing else either from
him for 6 months, I fear he
thinks we have all gone to smash,
and is no use to send, I have
written again. I have Helen
& Mary Mary for you, but I suppose
you do not want to see that in
book.

I have received from Gristlebach,
Jl. Mr. W. L., ~~Wass.~~ continued
three pamphlets, i.e. - to Endogus,
But we wait to get returns on
the set of your later collections
which are all sent to him
(i.e. - a set of all). except Endogus,
and I will send those as soon
as I can; for Gristlebach proposes
to study them right up, and print
all in one paper, this spring.

O, happy man, you are -
basking over new ground, and
no cares or troubles, except little
daily ones, just to keep you awake.
Ever Yours, cordially
Wm Gray

Lowell Reese - the father
of Griswold's Alga. There
is a 4th part out half a
year, and he does not
send it, nor other things.
I have written to him, I
think twice. Well, I will
write again. This ~~you~~ will
give you a part of the
Mn. spatula; and still
another part, finishing the
Mn. spatula, must be
nearly out by this time.

I am at work in Cally
now, you know, and it
is very hard work. This
last vacation, I had to
make a new edition &
new additions to my
Manual, &c. - and to do
it in a hurry, - and I
have at length for the
first time, found out that I

Cambridge, April 17, 1862

My Dear Wright,

Yours of March 23, to
Apr. 1, came this evening.

Glad to hear from you again.
I had been expecting to
get a bit of jobation from
you, for not writing more -
and nothing since that very
short letter of 21 Feb. But
it seems, it is not yet quite
time for me to receive that.
I did not expect you would
blow me up on sundry old
scores, - for not informing you
all your specimens, shipped by
the Western mail, came safe.
&c. &c. -

Why, I reported all that
promptly, - reported my prog-
ress, in picking out a set
for Griswold to study, - which

I suppose he has got, long ago, - - that I had sent a set of the Orchids to Lindsay, which he must have got (but he has not said a word yet), &c. &c. - writing of course to the old address at good Lescaillies. For all this was before your order to write no more truther. & I take it for granted you would inform ~~them~~ Lescaillies of your present address, and that he would forward to you the letters he must have received.

Of course the sets of Mosses are all at your service, are they not your own, and am I not always, yours to command - tho' I be sometimes a little slack in obeying! -

Well, I will answer your questions categorically, 1. The plants have come safe & sound, and are well taken care of. 2. You shall have a set of the coll. of Musci, and I will send it on to Cutler at New York (since I cannot send from Boston to Havana), asking him to forward it to you, with which you can gratify your friend Gundlach. Then, give me credit so far! I say, there are plain answers.

I have just received a letter from Stanice at Whampoa. - He asks to be kindly remembered to you. I amlothens to know what has got into

your heart to see the thing
done. But it will be worth
all it cost.

Come now, here is a
good long letter, for a man
as tired as I to write. - who
has been 5 or 6 hours in
lecture room, making her.

I shall address, as
before, as you say
nothing to ^{the} contrary, and
give no man address.

Ever, Yours cordially

Asa Gray

am growing old, I. fact
I look down under it, and
have injured my breath
a little. There is a
constant - as yet slight - dif-
ficulty in the region of the
heart, - which I feel doubt-
ful if I throw off, as I can
not get any real respite
from work till July.
I doubt I ever recover the
spring and vigor of former
times. But we shall see.
Do not say much about
it, in your letters, not to make
Mrs. Gray anxious. Perhaps
it will go off. And, at the
worst I do not anticipate
~~any~~ great trouble from it
at present.

My hard frost of work
has got correspondence all
bunched behind me and
determined me to draw in
my horns, and drop a good

deal of it. My desk
has long been so covered
deep with innumerable letters
so that I have abandoned
it, and now sit over on
the other side of the table.

If I sit down and answer
over a letter right off
the day it comes — as I am
now doing with yours —
and as I do with purely
business letters, so that
it is safe. If I add it
to the heap, it is a gone
case, and I fear will
never be really answered.

Calvin too, as you know,
has been very hard worked,
in his father's office.

Well, there is no State
now in some part of which
the Star Spangled Banner

does not float, & indeed
is a tramp — a 2^d Washing-
ton. — Gladly, I am sure
— no fanatical abolition-
ist. — Forts, of your
State of course, is putting
down his foot on the
Mississippi. — McAllen
is to fight a great battle
at Vicksburg. — Another
bloody battle may be
fought near Corinth,
Mississippi. — New Orleans
will soon be ours, — please
God, — and then this
wicked rebellion will be
done for. — I pray God
I may live to see the
end of it, and the States
brought back — quietly
if they will — forcibly
if they must.
— I know it will rejoice

Cambridge, August 1, 1842
My Dear Wright,

There is a bit of reading
for you - substitute for
letters, - which, in truth I
have not surprised you with
lately, - Who can write
letters in these trying times?
Lately, I have sent you,
through Eaton, 2 parts of
Zel. ~~Book~~ W. and, Grisebach -
the last one just beginning
Endopus. I am now waiting
to hear from Grisebach, and
then we will print the rest of
Pl. Cub. or, Wright, -

My last from you is of
June 17, came through your
brother, and enclosed the address
to which I post this. Also
note on *Clusia*, which I
sent to Grisebach - & 2 young
prints of *Phlebotamia*, - one
I sent to Dr. Parker, to complete
the char. of the genus in the
new Gen. *Plantana* (where
they have corrected Grisebach's
error in over looking the lateral
petals. The other I sent to Grisebach,

Lodge of the State of my
correspondence, when I tell
you that fully 50 unan-
nued letters lie before me,
and yet, day by day, I answer
all pressing or immediate letters
nearly as fast as they come.
I mean to bring up the whole
heap when it gets a little
bigger.

Eaton, in his father's office
is very hard worked too. But
I think you hear from him
sometimes.

Last spring my health felt
pretty seriously impaired. -
But by end of June I was
able to diminish my college
work a little, and take the
rest easier. - and now
I feel very much better, - more
like my old self. - And I am
hoping to clear off my
table that I may get at
work again on that interesting
S. Pacific Expl. Exped.

There is a charming book
out, by Darwin, on the
Fertilization of Orchids by

Insects. - It will open
your eyes to most curious
things. - I have verified much
myself here, and made it,
which Darwin regards as very
interesting. I send you

a copy of the book thro'
Eaton, as a present. -

Any observations, or notes
you make I will send to
Darwin. -

Ever, dear Wright,

Yours cordially

Asa Gray

shall keep the specimens
with your letter.

Knisebach says particularly
you will send him mature
fruit - and especially ripe
seeds of his Rhodia ruscip-
lia, no. 13. - about which he
says he has "a disagreeable
polemic" with Prof. Planchon,
who has been mangroving
botany in Am. Sci. Nat.
I suppose you will not see it
till you get back to E. Cuba.

As Buckler would not share
I was obliged to "hit him again,
and harder. I send you the sheet
for your amusement.

When I find Eaton is sending
a parcel, I will send other fruit
matters. Eaton very busy of
course, as his father's clerk.

Gen. Stuart, with his cavalry
has been cutting all round McC
Lellan's army again. Next
time, I expect they will make a
circuit as far round as Boston -
or at least Connecticut, and carry
off the horses. They are more
earnest than we are; but we shall
use them up at length. Yours ever, A.G.

Cambridge, Oct. 13, 1862

My Dear Wright

Bitte Torrey & Eaton
speak of having your
photograph. You cut me
I suppose, because I am such
a poor correspondent!

I am afraid I deserve it.
But what can a poor fellow
do in such times as these?

Your latest - with en-
claves, duly despatched -
is of Aug. 4. - and it has
been here unopened 6
weeks. No bad, no doubt.

Mrs. Gray did get a laugh
out of your experiences, as
related in your letter to your
brother. - and sends thanks,
& best regards.

A fruit - one of a dozen
ripened here this season in
the garden, has such a tropical
look and taste that it reminds
me of you. It is Asimina

triloba! Tastes like a
rich custard into which a
piece of scented soap has
fallen.

At length - only 3 days
ago, I have got from
Ginsbach the rest of the
rest of the ~~Ad~~ Endogens of
the Ad E. Cuba collection,
- except the Bomeliaceae
- not yet quite ready.

Now, I shall print. Gr.
Does not include the later
collections, where they are of
the orders pointed before. But
as soon as he gets the Brit.
W. Ind. flora off his hands,
- only one part more - he
says he will make a sup-
plementary article, and take
in the undistributed ~~for~~ collec-
tions too - the later ones - of
which he has a set, with
private numbers for our reference.

I have to copy all of his
Index MSS., - and add something
here & there, - locality, &c. as before.

So this fall, - or when you
leave W. ind of Cuba - had
you not best, send me all
your collections now on hand,
that I may make Amstel
name them also, before they
are distributed, - a very
useful thing to do, when
possible.

Your specimens of small
plants enclosed are most
of them new to me. The
~~purple~~ rose-colored Polygala
is an old customer - P. paniculata.
The other new for you - but old-
looking.

Zamia new. Dioscorea - what
Amstel calls longifolia, but ?
Caryophyll = Drymaria, near
one of your old Mex. - V. Mexican
ones.
Zamia microphylla, new.
Cuphea, looks too like the one
you got before.

But, as they all belong to old
& known genera, I can not
study them now, - not worth while,
since it will have to be done all
over again afterwards.

And will keep you busy -
therefore happier.

Grisbach you know -
has not named the collec-
tions of the later times, of
which set was sent to him
only, - the rest undistrib-
uted, I want distribute
till I get the names - at
least in the rough - so as
to know what is new and
what has been distributed
before. Besides there is
a part of your E. Cuba
collection yet to come -
Hond at St. Catalina? or
Santa Verde?

Grisbach will now
soon get the W. Indian
Flora off his hands, -

And he promises that he
will then take up all
your later collections &
make a supplement to
H. W. Cuba.

Cambridge, Nov. 14, 1862
Dear Wright,

Here I was this af-
ternoon, moving over
your plants, - copying out
Grisbach's list, for the
printer (for the printer will
touch the Dutch - looking
over, and besides, I have
additions to make, &c) -
when I just happened to
remember that to-morrow
is Havana mail, and that
I was by all means to write
to you to-day. There is still
time. - so here goes.

First: Can't you make
some arrangement, while
you are at this end of Cuba,
to receive a Yankee news-
paper by mail - say to
the address of Dr. Jose
Blain, or some Havana
address. If you can ar-
range it that it is not stopped

I will send you papers
regular - say the Little
Boston Herald, small - some
read - Democratic, patriotic,
- or other, from time to
time.

Well, it is Eaton's
fault that you have not
got the last Miss. Tel.
and, Dec., - as he had
it long ago from me, and
I supposed had forwarded it.

But he says it will
go in parcel for you
- addressed as you direct -
by the steamer of tomorrow.
And Eaton has put up
for you 2 lenses -
2 Jack knives

It is our collecting portfolio.
More materials, with which

anything can be made.
And - if he has done as
he offered, he has also got
another portfolio made
for you, in time to add to
the package.

Do you not want paper
and dress? You have not
asked for any.

As to collecting still, I
should say, Yes - go
on, in a gradual and
cheap way. - i.e., do not
make very heavy outlays -
as long as you are in
the country, - at least
till next summer. For
we cannot get the war
done until late next
spring (except in Texas!)

If you can do as much
for W. as for E. Cuba, it
will be a good thing,

describing some of yours,
I supposed he had sent it
to you. I have now
sent my copy to Helen
for you. I will ask Tick
over for another, and
I will ask & urge him
to take up the Lichens
sites. It is high time
he did them. Then
I could send them and
the mosses out together
and get some ~~for~~
for you abroad to draw
on.

At present, not only
have I no deposit in
~~Europe~~ Europe to draw
on, but I owe about
200 dollars there, - which
I cannot think of paying
by buying exchange
at the present awful rates,

Or I am waiting till
I get funds on some
other way, - which I expect
you to do - enough to pay
my debts - and if I can
get any more there, I will
notify you to draw on
it. Meantime I have
money enough for you,
if you can only get it.
I owe you interest in
plenty, and probably
something on running
account. [Only a few dollars
more].

But how can you get it
at present rates? Or
how can I get it to you.
If Green-backs could
pass there as here - it
would be easy enough. -

Is there not some
Yankee product that

I could ship to you - that
Blain or Lescaille
wants. Sowing ma-
chines? Agricultural
implements? Chains?
Do we might save
the loss on exchange.

I will send you anything
from a mouse-trap to
a wheel-barrow!

You have a letter
from me which must
have reached you soon
after yours of Oct. 25. -
Saying that my last
was 85 days old! Indeed
you ought to have had it
then.

Mr. Birney tells me
that Fresh-water and
particularly Land-shells
are in considerable demand.

7.14.72
I wish he had all
your C. Bula collections
also, up to date.

Could you not send
them on to me, and I
pick out a set for Inst. -
- or better, pick out a
set yourself, and send
it, with your valuable
notes.

At present, I have nothing
on sale except sets of
Fossils - and no call lately
- & the Mosses, - The latter
are very little called for. -
And the sets are too small
- amount to too little to send
abroad by themselves. I am
trying to make Sullivan
take up & study your later
butcher, to add to them - then
making it more worth while.
But he will not move yet.
I will try him again now.

Tuckerman printed last
summer a Lichen paper. -

No doubt I can find a
sale for yours.

Not one word have I
heard from Crutis!

The first sheet of Pl.
Mr. Cuthberts, pt. 2. is just
printed — too late to get
it to Eaton for your package.
But I will soon send the
whole. I have read a proof
of 2^d sheet. — It will make
only about 3 more. — Unless
the sub. of Bromeliaceae
comes in time.

The 1st part of the new
General Plantarum is, I
suppose on the way to
me from England.

Now I must mail this,
or I shall lose the mail.

I will now try to stir
up Sullivan & Jackson —
— both hard cases in their
way! Mrs. Gray quite
well, sends but regards. ^{Ever Yrs} A. Gray.

Cambridge. 17. Dec. 1836

My dear Wright

Yesterday via Hartford
I got yours of the 13th Oct-
29 Oct. & 28 Nov.

Your last before was up to
the 25th Oct. Shortly after
its arrival - the very next steamer
took to ~~Cuba~~ Havana for
you, books, manuscripts, knives -
knives, every thing you
asked for - also letters from
me and from Eaton.

In this letter of mine - I assumed
all up to your last letter -
essentially. And I am in
doubt whether you have re-
ceived our care & letters or
not - as you do not say.

If not, you must have very
soon, Eaton and I wondered
you had not then asked for
paper. We wish you had,
for all at once, paper has
doubled in price, while other
things are in stable quo.

As you seem so little pressed
we shall wait a little, for
the flouring of speculation to
be over, & then we will

Pl. Wright, &c. - about New-Year,
we will send you some paper-
any-way, - and afterward keep
you supplied. Will send to
Sauvage, as you direct.

To place friends from here
in England is just as bad as
to place gold at Havana,
but as just as I have
anything to be paid to me
abroad you shall be welcome
to it, as soon as I have paid
my own debts there, - which
are considerable, I having delayed
to remit on the account of the
high rate, and expecting it better.

The only resource is to borrow
abroad, - which I hardly know
how to do, - or to send some-
thing abroad to sell there, -
or to ship something to
Cuba. If there is anything
you want there except gold
that would do. If not you
must wait as long as you can,
and ~~send~~ when the time comes
I must buy in New-York exchange

on Havana for just as little
as you need, at present, and
we must divide between
us the loss. It can't
be worse than now; but
we expect it will soon be
better. Some how or other,
it is pretty certain that
the war will be over in the
spring. I expect Euler
here next week. Then
we will lay heads together
and see what we can do.

I will write again then.
In haste - ever Yours

A. May

you have made for too many
sets of Henry, and that many
remain unsold. W. only 10
of the smallest sets remain out
of 34. And I have niggers for
2 or 3 of them. - shall sell
them duly. Also the
Museum, when I have time
to put with them. Lichens -
to.

The great object of this
note is to tell you that Dr.
Torrey is poorly - a cough &
gives him. We want him to
run over to Cuba, and to
stay with you a while - a
few weeks, while he gets rid of
the bad Spring months. We hope
he will consent. I have sent
him your letter to tempt him.

I thank you most heartily
for your photographs; the full
length is very good.

"Pine-tree, without leaves,"?

Having missed the Melita's
mail, I hope to hear from Dr.
Torrey before I send this. Eaton
has been in Washington. Ever yours, A. Gray

Cambridge, Feb. 23, 1863
My Dear Wright,

Since my last I have
received yours of the 3^d & 9th
of January, and, later in ar-
rival, yours Nov. 27, with its
cry for books, books! books!!!

"And in his crying let them
"nothing cry, but books! books
books!!!"

Well now, I had sent
every thing I had got to
Eaton. - and Eaton has
generally been most prompt
in all matters.

I have not heard by a sailing
vessel from Boston - for fear
that the pirate Alabama
or the Oreto catches it,
and uses the paper so
for wadding.

Well, now, as Eaton
has written you, the
books and paper, - and all

you want (except money)
is on the way to you. &
Freight paid. So it
was before. The \$5. you
(Sawville) had to pay
at Habana, must have
been Spanish charges —
duties, &c.!!

Exchange is now at the
very worst. How we
can get funds to you I
can't see. Except this.
To raise a loan of some
one in England or America,
and to have you draw
for it, for what you
will need while you stay
in Cuba, & to pay it
in proceeds of your plants
hereafter.

By the way, the reason
I cannot distribute and

put on sale the Cuban
Plants now here is, that
till Girardin studies and
names them I cannot tell
which are new to the collection
and which have been distributed
before. As I have made
the old subscribers take a
good many species over and
over, I thought it better not to
do so more at present.

Indeed there will all do
better ~~now~~ where you make
up sets with the good part
material you are now getting
in W. Cuba. And as you
are now at advantage
and in position to study them
just yourself a little, when
you come home.

The only thing is to live
meanwhile. I have ~~enough~~
for you plenty, if I could
only get it to you in anything
but green-backs. He will
try. You seem to think

By the way, the reason

Cambridge. April 24, 1863

My Dear Wright

Your letters come in curious
m. v. I have three received since
my last to you. First I got yours of
March 31: next (about a fortnight
ago) yours of Aug. 13, 1862. And fi-
nally, 3 days ago - thro. Torrey -
came yours of Feb. 21: 1863. - all
written at San Jose.

The earliest to ~~arrive~~ arrive and the
latest in date is the most satisfactory,
as it tells me that the curri of ~~both~~
books & paper has come to hand.
Also that your money held out
still.

I am glad of it. For though gold
is on the whole falling, yet it hangs
on in the neighborhood of 50 per cent
premium. And it is not with-
out to pay that, while there is
a fair prospect that before the
spring is over we shall pretty much
collapse the rebellion, and then
gold will tumble down. When it
gets down to 125 I will remit.

Meanwhile your excellent friends in
Britain would much prefer to lend
you one or two hundred dollars
to having you pay 1.50 for every dollar
by buying exchange now.

In yours of Feb. 21st - You
ask me to reply to this right off -
or I will take it first, as it came
last - you give me Gustav's
excellent certificate - i.e. I am to
pay in to the Brunswick Bank,
where Riverend will pay over to you
the same sum in full. - Very
good. But if I pay it in green-
backs, will Senior Riverend pay
you the face of the notes in gold?
I suppose not. I must deposit
the gold in London, - then I
must give \$150 for the 100 in
gold. This, I think will hardly
be worth while. Your excellent
friends will give you the gold, with
great pleasure, no doubt, and I

will replace it before long, I hope,
i.e. as soon as gold falls to 125.

The whole country is now deter-
mined than ever to carry this thing
out, and to disappoint England &
which glories over the idea of our
going to the wall - no doubt that
would be a great thing for England,
but we cannot indulge there. We
must and shall subjugate the
rebels. At least every body is ten
times more determined on that now
than they were a year ago.

The rebels will have it so! They
might have come back till lately,
and save almost everything. Now
they must take the consequences of
protracted and obstinate rebellion.

Well - you do not want to read
all this, -

"Belonia Spicesens: what I wrote
to Gisebach must be taken back"
Well. About there and their friends.
Why not write direct to Prof. Gisebach
Göttingen, Hannover, Germany.

And send to him lots of plants.
It is up to W. H. B. Putnam, I am
not. (I should say too, the plant
you enclose lots of is a sort of Spirea,
or near it). Griswold is an honest
fellow - and will respect your names.

What you complain of, in yours
of March 31, I must probably be to
blame for in not always furnishing
your resp. names to Griswold. When
he has them, and they stick, I think he
will always put them forward.
That a good plan now is, what
you lately proposed, viz. to give the
collections of the last 2 years a good
preparatory study here, when you return;
and then furnish them to Griswold,
- who will be glad to make a general
supplementary Pl. W. List, under all
the light you can give. I presume
he would gladly do the thing jointly
with you, if you wish. And I would
cheerfully agree to pay for my set
hereafter (for I see I cannot do for
you all I would, or much of any thing.)
So that you can arrange better with
Griswold. My thing that will favor
your interests with pleasant me.

Apr 24 - '62

"Oldenlandra callitrichodes & Hamamelis
in feliciter mixta". Why I meant to
name myself, for confounding them
in the distribution (which I did)
and not you! It is well known
that I did the distributing in to
sets, and made this and similar
oversights. I did not think of laying
it on you. I believe they are not mixed
in the same leaf - if they were it would
excuse my carelessness.

"Arctostaphylos". Well it was a blunder
of mine to begin with - about which I
have cried peccavi already. But
once made and the specific name
published I could not recall it.
Grisebade kept up the name & I sup-
pose thinking it would please me -
which it does not. - So I added
note that Schultze had better,
referred it to Hamamelis (Wrightii).
that can't be helped, as it is the
only published specific name. I
wish I had let it alone. But do
not be too hard over & over on a
poor fellow for going off at half-
cock. I will not do it again.

And if you want to name plants--
yourself, I am sure I will help you
to the utmost,

We have lost one of our best friends,
Dr. Shurt, of Kentucky is dead --
March 7. I will send you a little
printed notice, as soon as I get it --
from Hill, I presume.

From now (& from 1st April) I
can do nothing but teach & lecture,
& hear classes -- till July 1st. Hard
work, but I have to get my living so.

Mrs. Gray sends in return, her
best regards.

If we could get
away we would, and come & see
you.

Dr. J. Gray is very much
better, and the season trying to him
-- the winter & early spring -- is nearly
over. So ~~he~~ will not leave Kentucky.

Ever, dear Wright

Yours truly

I suppose if you bring Mr. Gray
some more pretty fresh collections of
land shells of Ohio, they would have much
interest, and would sell well.

tomorrow morning. I hope to
hear from Eaton what is
done about funds. Tho. I
hope he has waited still,
for I am confident gold
will be done some next week.
My poor money shall soon
be in your hands.

I am poorly. There is a
colicic recess this week
after Monday; but I was
so worked up and tired out,
that I have done nothing
but write a few letters. —
my head has been weak &
confused. — a warning to me
to spare it more.

Well; when your plants
come, I will have them
at once overhauled and
put into sets. — numbering
up as well as I can those
from E. Eaton; and trying
to put into sets for all
subscribers only those
they have not already had.

Cambridge, May 28, 1833
My Dear Wright
To-morrow is Havana
mail-day. And I must
acknowledge yours of April 10,
30; and May 14.

I hear from Hervey —
more so. — that they have
received the bill of lading
of your ship, but not yet the
expected instructions. I directed
the plants to be sent on to
me, and the Zoological
specimens to the Smithsonian
Museum. — unless Dr. Baird
ordered otherwise meanwhile.

It is still to me plain
as day, that Rivers
is not so near the end
of his wits as to pay to
you in Havana gold
dollars in Havana. for
Greenback paper ones
in New York, where the
former is at 50 (or now .43

per cent) premiums.
What he meant —
thinking that Dollars
mean dollars — was to
pay you in Havana —
gold for gold in Antank
— which would be a con-
venience to both.

But ever since your
first request I have
been on the look out
to buy gold as soon as
it should get down to near
140, and deposit there.
And \$150 currency has
been in Eaton's hands
for the purpose — and
perhaps the gold was
bought, before I got your
last (of May 14) saying
it is now too late.
So, I have written to Eaton

to tell him, if he has not
deposited to save it, and
buy exchange on Havana.
But I trust, he is waiting,
as I should wait, to hear
of the fall of Vicksburg.
— when we shall be able to
buy gold at below 140.

Come it must: for it
is clear there will be
no hold up till the South
give in. If they want
utter desolation, they
can have it. — if they
wish to save something
the sooner they apply, the
better.

But you —
whose heart is with them
do not care to read my
remarks on this subject.

Before I close this letter,

29th May
Dear W.

Eaton's letter came
this morning, and with
it the deposit.

Rivins ought to be glad
to give you gold for an
exchange cheque, - or with
his endorsement, Samuella
would cash it freely.

By the time you want some
I hope gold will be only
10 per cent premium.

Ever Yours

Henry

and then distributing
the W. butans all under
new and advanced nos. -

Tell Samuella there are
no sets left of the former
distributions, except the one
reserved for you. I suppose
you hardly like to spare
him that.

Shall a set of the
ensuing distribution be
reserved for him, or for any
one else in Buta.

The W. but. is not on
sale. The copies are (besides
the ed. in Mem. Mus. Acad.)
all given - or to be given away -
by Muskat & by myself.

Richard James Gay - of
Matanzas (Care of Jay, Morales
Stn-) shall have a copy and
also of ~~Eaton's~~ Filices.
But. - as soon as we can get
it to him or to you.

By the way M. Samuella

one more a set of your
Foss - 8 sets still on
hand. the largest 192
sets. = \$19. - Also the
Lichens are now putting
up by Treckman. And
there is the next set of
mosses for \$14. -
Shall I send them?

Mrs. Gray says that
your ancistrophora. You
want catch me naming
another Cuban plant, any
day. And what good
could it have done for me
to alter Misselud's name - &
bring out your name as
Stamulium, or Verbesina, when
Schultz, Bip., had already
published it as Stamulium
Mightii (in Burplandia).
And thus it was too late
to restore your name.

I shall hereafter forward
all your names to Misselud
religiously, - and I presume
he will respect them.

Your errata to Gen.
McC. & Dr. sent at once to
Walker.

Stemianthus adenandrum
adenandrum is but gracilis
var. Shall it be adenandrum?

Good old St. Darlington
is dead!

Sir Mr Walker we were
last year very anxious,
over. But now he is
well & hearty, St. Walker
wishes.

Mrs. Gray is transiently
ill. - but on the whole is
better than in former years.

Ever Yours cordially
(The Gray)

change my tactics, and
throw off some heavy
load, or I shall break
down; I have had pre-
vious warnings.

Well; we will have
trees & shrubs very soon
for Sawville.

What a gumption
man you are! You
asked me if the copies
of Pl. Wr. book, ~~were~~
on sale anywhere. -

I reply no; the extra
copies are given away
by mistake & ~~they~~ ^{they} may
sell to those wanting them.

You ask, "Am I not
important enough in the firm
to be entitled to a few ~~extra~~
copies?" Why, of course."

But you are not here &
have not got them. When
you can help yourself, or if

Cambridge, July 7, 1863
Dear Maynet

I have to acknowledge
yours of May 25, and of
June 15.

The former, announcing
the death of your pocket-
book and the general
doubt as to your plan, -
and telling me not to
send you any money
till further orders - came
after my deposit had been
made in New York, and
the ~~for~~ certificate written
to you.

The latter says nothing
about your plans, or
the book, and acknowledges
reception of the certificate.

We trust it will be
the last to be received
such high manner for all

Made a victory over
Lee, and the surrender
of Vicksburg are we
trust the beginning of
the end of this rebellion.

As to depositing
currency instead of
gold for you with
Murdock & Co. when
I see River and certifi-
cate, or your word that
he says, that he would
have given a gold dollar
in Havana for a paper
one deposited to his credit
in New York - at any
rate of premium which
has ruled for the year
past - (let alone 48-
50 per cent) then I
shall believe it. You
ask River and you

will be satisfied where
the hard-headedness lies.

You should have
written to Westman
when you shipped. I
did not know till he
informed me that the
zoological packages also
were addressed to me.
They would have been sent
here and then have to
be returned to Washington
if Westman had not
mentioned it. I hope
you wrote Baird and
that all are safe.

"You should spare
yourself. You are not obliged
to work so hard for your
living." No, but I am
to keep things along &
have things done that
ought to be & help along
science. But I must

kind with all you will
need.

Next week will be our
Commencement. The week
after Mrs. Gray & I hope to
get a little holiday of 3
weeks - to visit my mother,
& breathe country air,
and get recruited a little.
We both need it very
much. I am nearly
worn up.

Mrs. Gray has just
lost her Connecticut
Great Aunt, and mother.
She has gone to-day to
Beverly for a day or two
of sea air, & to visit her
family. When she
will send remembrances -
Ever Yours

Anthony

Can send you 20 or
30, if wanted. Of course
I did not mean that
we claimed them instead
of you.

Well, to Richard James
Gay of Matanzas -
the only thing is for me
here, or Eaton in N.Y.
to catch a vessel for
Matanzas, - which, I
suppose will take ~~them~~
the parcel in the ship's
bag. But the great
trouble is that we cannot
mail printed matter ~~too~~,
but.

I have - with the help
of a pupil, gone over
your collections now
sent (they are nice and

and in good condition
and I have taken out
one good specimen of
each as I came to it
(~~getting the~~ taking them
in the order you had put
them up), and sent to
Grisbach, who has
promised to go right
at & name them near
enough to guide me in
distributing. I could
not distribute into sets,
with Mrs. in continuation
of old sets - with any
satisfaction or justice
until Grisbach ~~reports~~
reports. Now have I time
yet to do it. No more I think,
I think, be for your
interest for me to do so,
and other have, when you

come home a small
supplement to distribute.
I imagine you will
come home this autumn,
and bring with you more
plants. And one general
distribution would then
be made, understandingly.
Meanwhile, what Gris-
bach is to pay for this
advance set, put to my
credit with Rodin at
Hamburg. I can draw
on, and send you the
draft, - so that you
can our delayed cur-
rency & great exchange,
using directly the funds
in Hamburg.

With what you now
have, I suppose I
can thus keep you sup-

It seems to me Rivard
might have simply endorsed
the certificate over to you,
and that any of your friends
would then have given you
cash for it. And so
saved a fortnight or 3 weeks
of time.

Camden, July 22, 1863
Dear Wright,

I have yours of the 6th
+ the 7th, and also that
of the 6th.

I have had for too much
to do to do any thing
well, and must try to
throw off many things.

I am incredulous about
Rivard's giving gold
in Cuba for currency
in New York, when the
former was at 150 to 160
premium - an actual
giving away to somebody
of 50 dollars or more out of
150. But if so, I will
stand the $45\frac{1}{100}$ dollars I
paid for the gold.

My notion, you know,
was to save by waiting
till the triumph of the
Union Cause swept

gold down - as it has
now to 125.

I suppose the 100
will pay your debts &
leave you something in
pocket.

I have now, or shall
soon have, in Stanley -
from various sources, but
especially from Grise-
buck's expected payment &
for the set of your late
plates just sent to him
- a balance which can
be drawn on in ~~your favor~~
your favor for \$100 or
so, more or less - all
you will want.

I owe you plenty and
can any day supply
you - when exchange gets
better still you can re-
ceive money from me at

small loss by discount.
So go on, finish up
your Cuba explanations.

I expect some such
returns from Grisebuck
as will enable me
to distribute the present
stock into sets (which now
I could not otherwise do -
for lack of time). To these
we will add your final
collections now making.
And so make one single
sending out of specimens -
and done with it, in good
large sets with 100 a piece
or so. - That is the only good
way.

Tuckerman last heard
me to suppose the Lichens
will be issued, rearranged, in
a few weeks. y
Ever yours

Asa Gray

I am) being very busy, I
did not for some days send
it on to Weston and so.

You did not write me
that there was any thing
under my bill of lading
for Smithsonian Institution
- so I could give no in-
structions about them.

Well; next Westman,
Custom House broker reported
to W. so many packages
of Botanical specimens,
so many of Zoological,
W. & Co. wrote to me to
~~ask if all~~ say they
kind W. & Co. and will
send all to me.

I reply, send all the
Zoological to the Smithso-
nian Institution, and
divide the chairs, pro
rata. They do so.

As they make nothing

Cambridge 18th Sept. 1843

Dear Wright.

We got off for our
much needed holiday, the
3^d of August - as soon as
Mr. Gray was well enough -
we had a nice holiday,
and returned, much refreshed,
at the close of the month.

No news from you till within
a fortnight, when your
letters have come in one
after the other. - namely -
Yours of July 15th from Kew,
(via Motherwell) - then -

July 27 - Aug. 12. - 2 or 3 came.

Sept. 5 - 7 - from Kew.

That thing with balloons
thing influences, of which
there is sketch of fruit in
yours of 15 July, I can tell
nothing about. Euphorbia
- or at least Euphorbia - nobody can
tell about it.

May you get your eyes
bumped up so with poi-
sonous Euphorbia.

What Don Jose affirms
about coast and mountain
vegetation. Very much the
same in curators - unlikely,
yet you seem to find it so.

That bit of coast with all
microphyllous & spring vegetation
is also curious.

I should be glad to see Sam
Vall - hope I may, will at
Burlington.

As to Richd. James, say
I sent off the parcel for
him to Matanzas, via
Burlington (no vessel from
Boston) in July. Like him

I am glad you like him
for being an abolitionist.
I have not very much of an
abolitionist myself, at the
start, I hope I can fall in
with, and welcome, the ways of
Providence, when Providence
takes the matter in hand,
and say Amen.

That Composita with small
head and the radical leaves
is of no medicinal genus
that I know. I think it is
Melantherum, but the
fruit is wanting. I have seen
you will secure it. In the
specimen sent I had only
bracts, - there of pink flowers (2)
apparently abortive.

About the direction of
your parcels, intended for
Smith's mission. I had no
design to find fault with
you, but to explain what
happened, without our fault,
(and though some losses
in yours) that time was
lost and expenses thereby
increased.

1. You sent me the bill
of lading, and name to
Carrigree, Newbern, etc.
You did not tell me that
you had sent by steamer,
I supposed it was by a
sailing vessel, - so (careless

something in hand third
for the purpose.

Well, you are doing well
in Britain, and shall
finish up Cuban Botany
while you are at it.
And on your return, you
and Miss Lusk shall
join team, and do up
Cuban Botany in a full
manor.

You are right to
stay till next spring. You
are happy in Cuba; you
could not be so here.

Things in U.S. do not go to
suit you at all. Things
is cracking, and in the next
way, - but the end must be
the total suppression of the
whitewash. The exile or punish-
ment of rebel leaders, the
return of the means to their
destiny, and they will put things
straight. Just what is now
going on in Tennessee, will

about any address to the
Smithsonian, I presumed
there was none. Most
likely, there was. But
you see, all coming under
one bill of lading as for
me, and no official
direction to them. The
other would hardly happen.

Easy to avoid it next
time.

About ~~the~~ at our fortunate
Riverend - Brundage trans-
action. You find "a
sneaky turn" in my mention
of "Brundage's excellent con-
science". !!

Really, I must be careful.
"I had no idea of any such
thing!" As to the ques-
tion at issue, we may
make it short. You give
in two letters, as in former
ones - an inquiry, ~~apartment~~

to the intent that it was
likely that Riverend meant
to make a liberal present
to you (a stranger) by
giving gold for N. State
paper money, face for
face i.e. giving you \$50
right out. But when
you saw him, you did
not ask him what he had
intended.

I thought you and
Gundlach had misappre-
hended his meaning.
No unlikely thing, I think,
and no shameful or in-
jurious imputation to be
resorted. This, after all,
thinking it over and over,
still appears to me the
most probable solution.

But it is easy to state,
and is within your white

if your view is correct.
You have only to ask,
or have Gundlach ask
Riverend, if he intended,
at a time when paper
money here was at 40 to
50 per cent. discount, for
gold, to give you in
Iowa a \$100 in gold
for a deposit of \$100 in
greenbacks in N. State.

If he says, yes, then
I was, as I ought,
make up the \$50 to you
at once.

You have excellent
friends in Cuba. I really
rejoice. They will gladly
advance to you what you
need. And when you
next want to replenish, I
will draw on Hamburgh
in your favor. I am getting

not possible is named.
It could take its place on
the list of Dr. Shatt's set,
which now drops, by his
death.

When the Union is restored
(which it is of course, when
the rebellion is put down)
those who do not love us
will manage to remove their
rights and privileges, & are
only to take themselves off
to some country they like
better. U.S. America
belongs to loyal American
cases.

After the war,
the country will prosper
undoubtedly, and the South
will get to be something.

Goodnight, Ever
Yours

Wm. Lloyd Garrison
As to Adams, you told us to
direct a care of Saville
you never understood or changed
the direction.

3
go on elsewhere; I suppose.
I know only one man
in Cambridge (Treadwell) that
you could talk ~~to~~ ^{to} to.
We can correspond very
well, and keep cool, but
if we were together, during
the war, we should get into
a row at once. It could
not be otherwise.

Butler is one of your
bitter Democrats, and a
very able and good fellow,
I suppose. All the talk
about him is probably more
high. The barbarities are
pretty much all on the rebel
side. You will learn
one of these days; but your
Union friends have been mar-
shaled in Texas, etc., etc., etc.

Wm. Lloyd Garrison is now
in London, and letters in the
hand of Sumner & Co. to blast
some people, and I think

to convict some of ~~their~~
treason by evidence under
their own hands,

Now mind Cula (in title
in the heading). The ~~next~~
shall be Cula generally;
of course. (That as to the
two divisions, Lippincott &
Gurttow, recognizes the
two great divisions)

As to Goodlad's argu-
ing about your collection,
you could answer most of
them, & I will also.

1. No full set to be had.
For the 1860-1 coll. was
at once all taken up. The
two sets are left of ~~the~~
Pharyngae, & the other
published distributions.

Olney, of Princeton, had
the last. He might sell
out. As many as

possible were saved for
you, as you directed. But
not more than $\frac{1}{2}$ or $\frac{2}{3}$
of the species. Set of ~~the~~
the Terms are still to be
had. And in the
next great distribution
viz. of all you have
collected for the last 2 or
3 years, a set can
be disposed of, and it will
contain very many of
the old numbers. - so as
to make out a pretty
fair representation of your
collections.

Price \$10 per 100 species
Distributed with numbers.
And the names to match
published or to be published.
There, that is about it.
Tell Goodlad to pro-
cure the order and we
will see that the best

I just took out a specimen
from every batch of your - exalt
when I think well it was some old
thing of former nos) - so the same
thing must often have been so
twice. There have been one or
two diff. sendings. The last
one I find had its special nos.
from 1 to 745.

How many species, or how many
nos. there will be, on new distribu-
tion, I can't guess till we come to dis-
tribute. And the best way is to
wait now till you have done up
your work in Cuba; and then make
one general distribution into sets, -
which will sell well enough, no doubt.
Meanwhile I see you enough, &
will pray as you want it, to keep
you in funds ever so long.

"California Desert". I can't tell.
"Marsdenia", without flowers.

I can make little of it. If not
M. clausa, which is in Wislizenus,
I should guess it as M. aliphan,
succum in. S. L. You will get the
flowers one of these days.

Well - I hope to write again
soon. Ever Yours,

A. Gray
Merry Christmas to you!

Cambridge, Dec. 1, 1863

My Dear Wright.

Week after week slides
off, and I have not written to
you since yours of the end of
Sept. Can't it be a good while since
you have written to me.

Wislizenus, also, has not
written to me for a long while.
But I hear the last part of
Fl. Br. W. L. is "in press".
So, he will soon be able to take
note fresh on Cuban places.

Tuckerman's last I enclose.

Caban is sending a number of

your last Herbar.

Hallivart writes that now
he is about to send you unpublished
collection of Mosses. I wish he
had any of your last (this) year's
collection.

I have got about ready to print, a
revision of Streptanthus, - of Strachan
& of Astragalus (incl. Phaca)
This last a huge concern that I
have worked months at.

My wife has been confined to her chamber for a month, but now goes about the house, and drives out: is still feeble.

Engelmann writes to you and me, wanting to cut me by the way. He seems delighted when I told him of your recent pro-
clivities.

Things move on.

"The mills of the Gods grind slow, but they grind exceeding fine." Wait in Cuba a year long, and you may return to a country in which Slavery, having tried to get more has lost all, and as a system is defunct - to the lasting benefit of all parties.

You might now revisit your old Mexican haunts, under General Banks' protection.

The Nov. elections show an united North: Peace Democracy has made its issue, and is beat. The re-election

Lincoln by acclamation seems probable supported by moderate men of all sides, - the extremes of the opposing parties, alone going against him.

I owe you money enough to keep you in Cuba for years - at your cheap rate of expenditure - How shall I ^{send to John} pay you? Shall I begin to deposit with your brother?

As to remittance to you, I make much hard work of it, that I am not sure any one else could do it better.

As to the Don Pierson's business, I really think, that (although I know you can never ask it), I ought to make good the loan, if there was a loan, or any share of it, any how, now.

In the selection of your collections for Gisela's (to study before general distribution)

Aug. 4. 1864

Dear Wright

I enclose Draft for
£ 20. a Reving. - at
sight. As I have
not yet quite so much
there, I do not negotiate
the draft until the time
draws nigh that you want
the money. Still, whenever
the draft reaches Stambridge,
it will be paid on presen-
tation. I presume that you
can negotiate it well at
Havana, through your
friends

Ever Yours

A. Gray

Wm. H. Gray

Cambridge. Jan. 19, 1894

My dear Mr. Wright,

Although the chance
of his finding you just
now seems small, I will
not on that account omit
to give this letter to my
pupil, Mr. Kennedy, of
the Senior Class in this
University, in the hope
that he may by its aid
make your acquaintance.

Kennedy is an enthu-
siastic young botanist,
and wholly worthy of your
kind attention. If you
should fortunately meet
at Orléans, he would delight
in taking a trip with you
up Louisa de Gato, or

or Minna-mina, or to any
of your interesting stations,
And I know you would
enjoy a real and companion.

Wherefore I commend
him to your kind offices,
and remain, as ever

Yours cordially,

Asa Gray

P.S. Your last, Retiro, Dec.
20th crossed mine of later date,
- which I trust you have got
before this. It contained a
draft you may like to use.

A.G.

Charles Wright, Jr.

To introduce
Mr. Kennedy,

Cambridge July, 21, 1864
Dear Wright.

Yours of Dec. 20, from
Remates reached me a little
while ago; crossing a thick
one from me which contained
a letter from Grisebach, a list
of his provisional determinations
pt. 1., and a draft on Waring
of Stambury for £20. - which
you can use or not, as you
find occasion & need.

I hope all this has reached
you safely. It was addressed
to care of Senor Don Jose
Blain, Santa Cruz de los Rios,
- as usual.

By the steamer of Saturday
- which takes this, a good ~~few~~
young fellow, Mr. Kennedy,
a member of our Senior Class
goes to Cuba, to look after bu-
siness of his father - and, when
he can, to blat, only 4 or 5 weeks.

i.e. in vacation. He is
very fond of botany, and bids
fair to be a Botanist, some
day. — if he does not take
to money-making, instead.

I have given him a note
to you, and a handful of
pamphlets. — and directions
how to enquire after you at
Santa Cruz, if you should
be there, or at Santiago,
where he also goes. But it
is a chance if he sees you,
after all.

Mrs. Gray is convalescent,
— able to sit up a good part
of a day. — but is still very
thin, & weak.

I am well, as usual.

I was much interested in your
letter. — As soon as plants
come from you I shall send
a set of them to Grisebach. —
And, at length, getting his return

we shall be ready to distribute
to advantage, when you come
home next summer, with the last.
I think Grisebach might
work them all up in a *Flores*
Cubensis Proemium. — you will
have done so much in the way
of materials.

You tell me not to write
you any more, but I guess we
shall yet exchange a few letters
before you get home. and I
see your honest spirit again.

The war, we think, will be
pretty much over next summer;
and then — back in the Union,
with Slavery pretty much
nowhere, by the hearty wish
of a majority of the people.
we may expect a career of
prosperity and real advance
of the South, such as it has
never known. At least we
hope so. Ever Yours
cordially
Asa Gray

paid into your ^{almost} exchequer at
Hamburg or London, ready
to meet your drafts from Cuba.
So that we shall avoid all
question of and trouble with
depreciation of currency here.

I do not see how I can
get at and arrange a
rebound the bundles yet
to indicate what species we
have yet plenty of, and what
we are short of.

But I think you can
do better than to collect any
thing not too ready which
you are not sure you have
collected in the proper quantity
since you last went to Cuba.

I expect I have books of 4 or
5 new subscribers, who will
want all the back nos. they
can get. But still, the
principal thing is to get the
plants out in all distributions
in as many as 8 or 12 sets;

I am disposed to think, from
Grisoloch's ^{late} list that

Mr. Cuba is as full as E.
of unpublished things —
"Kalmia?" and! Like
K. ~~hirsuta~~, I suppose.

"Leucostylus" is not
Santonia (Hyllm. being
good Greek (Hyllm.))

Grisoloch would not have changed
except for some other name.

If Grisoloch does not,
I hope Dr. Miller, who is
doing the Euphorbiaceae for
Dr. Presl, at Linnæa, will
see into the Vicca species.

Mrs. Gray is at Lymington
getting better — able to
go out for an hour in a
close carriage: but she
gains slowly, and has some
symptoms yet I do not quite
like. Enough for tonight
Ever yours cordially A. Gray

The good Dr. B. M. (of
Gung memory) is dead,
died on Christmas day.

Parry is to go to Rky.
at the 3^d time next spring.

A.B.

If you want one in
Cuba, it should be not
one of the fullest. They are
so precious & valuable!

It is going to be a
collection of unsuspensed
value - unequalled in the
Lichen way.

Sprague is trying to
sell his place. If he
succeeds and pays off the
mortgage which represents the
money you held my notes for,
I shall wish to pay off the
notes or one of them to your
brother. But it is uncertain.
Meanwhile I wish you
had occasion to spend
money (so far as I am
concerned, so that I could
keep paying you by degrees.
As to alcohol, I mean to
do as you ask - keep all

a commission with this money
through a little green-house.

P.S. I did not get your
letter a week or so earlier
to have sent Ol. Wright, &
by Kennedy, and also a set
of Terms to Richard James
Bay.

I must watch another chance.
I am sorry to hear about
your old Lescaille, - for
whom I feel a real affection.

No conclusion, i.e. no concluding
part yet of the Mr. W. and of Miss
I and it must come soon, and
then we will despatch a package
to you - with the things wanted.
I hope too a set of the Lichens
which Tuckerman is making
at like a horse. - & says will
be done in a month.

Mr. I suppose one of the
fullest sets ought to be kept
here for you, should it not.

London 29 July 1844
Dear Wright

Yours of July 15th
is just in.

Oh, Wright! If you
had not got Manchined
Johnson in your eyes, you
could surely have seen
and appreciated the banter
and persiflage of my letter
about coming home to be a good
subject under A. Lincolns de-
mon, & all that. - It is the
greatest joke of the season that
you should take it in such
other earnest, and ~~fill~~ fill
your sheet with comment!

Go it, !!

But I think, I do believe
the rebellion will pretty much
subside before very long. -

Yet on the whole, I am
pleased that you now think
of staying longer, and finishing
up Curtain Botany, as
far as you can,

And really you are living
there, happily & humbly
at a $\frac{1}{8}$ part it would cost
you to live in Mass. or
Conn. - in these times - to
say nothing of what you will
get eventually by the sale
of your plants (and you will
sell at least all you choose to
collect), and the great good
you are doing for Botany,

Still, why not come
home this coming summer -
and arrange all for dissemi-
nation, - you, I and ^{my} good
student, R. M. Rock, could do
it soon - and then in
autumn go back again
for another haul!

Still, if you leave it till
next winter, we shall be
in better time for drying it,
and with good enclosures,

By the time you come
- even if this spring I shall
have no herbarium, nor any
library!!

I give both to Harvard
University, as condition
that a fine proof building
is made here to keep it in
(and a Boston gentleman has
expressed to build the building,
32 x 56 feet, $1\frac{1}{2}$ stories high)
and that a fund is raised to
yield \$500 a year to support
it. - That is not done yet -
but I hope it will be soon -
Any way, as soon as frost is
out of the ground, we shall be
digging, brick-laying & steam-
raising here. 15 feet off from
my microscope window; and here

basin in the bundle appears to
make the book & Jamaica Juglans
a var. of J. nigra, but surely that
cannot be. I know not what my
mistake calls it.

Do not think that I am
not just as deeply interested as ever
in the growth and completeness of my
herb. All the more so, tho,
I have given it away. I did not
only that it might be safe, and
give the fruits. It will be just
the same as mine as long as I
live, - with I take more means of
keeping it up.

- My health is remarkably
good this winter. But they
deluge him with Cod-liver
oil. But he is distractedly
busy with many things (not
botany) so that he has not been
to see me yet. His daughter
Eliza is here - came yesterday, on
a visit.

Printing specimens of Archid
I suppose are with little, unless
you know the species: then they may
turn to use.

Cambridge, March 30, 1864

Dear Wright

Yours of Feb. 14-26
came 3 days ago, and I will
knock off an acknowledgment &
reply.

I have seen Kennedy, since
his return here, and found that it
was not by his carelessness that you,
or rather Don Jose Blain, did not
receive his letters before. He took
his letter to the P. O. himself at
Havana, - enquired when the letter
would reach Santa Cruz de los
Pinos - was told that it would go
by R. R. across the island ~~about~~
night, and then by vessel to the
Island of La Cruz de los Pinos
next day, or day after. ~~That~~
They assured him to his great
surprise that there was no such
place in Cuba papers, - but it was
an island part of Cuba - And it
seems they sent it there - which
was the cause of its delay in reaching
its true destination. When it did come

it was too late

"*Euphonia shipyardi*", There is one, of Linnæus. And E. Cassy-
thides, Brisson seems to have named
in 2 other Cuban collections, viz. of
Ferrus in Mt. St. & of Ruzel.

Brisson would always respect
your post. names.

I'm sorry Poy has made
application for plants for Madrid.
It is pity we have not a set of the
Pheasants left left for him, i.e.,
of the old sets - ^{tho, a good many}
could be got up out of those laid aside
for you.

Mosses & Lichens, I could
send to Cuba for you addressed to
Poy. - If so, give me address.
Mosses - the sets are all alike,
Lichens, the fullest set I could
now supply is no. 11 = 165 sp. or
or 12 or 13, = 163 sp. - unless I
send your own complete set which
= 246 nos. - two more than Hooker's,
& 11 more than the set for Paris,
Can you spare it?

As to Ferns, the highest of the set
left is no. 30 (177 sp.) - to
which Eaton could add something.

Would it not be best to arrange
with Poy to wait till your
collections of late years are distribu-
ted, this next summer, and then make
out as full a set all through as
possible.

Certainly keep on ~~scarcely~~
and collect all you can. No doubt
all will turn to account.

"Fertilization of Orchids"

Yes - all do, are important, I
will send your notes to Darwin who
has been so sick we gave him
up - but now he is better. He, if
well enough will give some spe-
cial directions for ~~the~~ experiments.

He says Dr. Burger Dr.
Burger in Trinidad is making
fine observations - which beautifully
confirm his views. Pray point
into spiral spirals of that Orchid
which fertilizes without opening
the flange. - and any other close ferti-
lizations.

Mistake wants that Cuba
regards greatly. He ~~was~~ once
asked after it.

I know no other family in which
a letter is made of the fruit as
it did.

Yes, I see, you give me
Poey's address. Very well.
But, considering how little there
is just now ready to send, had
they not best wait. But I will
follow your directions in consul-
ing Poey, send me word.

I am very glad you will
come home here in July - and
when in the autumn. You
ought now to finish out
Bula. But, with such a
load on me as I now have -
and the new building distract-
ing my attention - and very
hard & absorbing copy-work
pressing me till July 15 - I
cannot distribute your collections
at present. But if you will
come, bringing all you now
have, we will do that job -
say in August, nice & clean.

Then settling up many things,
& with clear idea of what re-
mains to be done, you can re-
turn to Berlin to continue your
laudable work

Have you negotiated my
draft on Rodig of Hamburg?

My wife sends regards.
She is invalidish - but very
much better, no longer sick.
Yet feeble.

In haste
Ever Yours

Henry

I will be better if I
could go to Berlin - but
I am not yet well enough
to make the journey.

never mind my copy of *Epistola*
from list. You shall have
the original to work with.

Poor Linde is all broken
down - in a bad way, - not likely
to do any more botanical work, it
is feared. So we shall never get
a report on the last *Orchid* sent
him. Well, *Epistola* must do
the work with help of *Reichenbach*,
- who is now the *Orchid* man.

"*Engl. & Blairiana*" bill,
but I fear, it may already have
a name or two. - Dr. Canthel
grand son, has elected *Engl.*
dece for *Prut*, and knows at
least one West Indian one.
I will send you slip to *Epistola*.
Whenever you write anything comes
about *Orchid* fertilization, - put
on separate paper, which I may
forward to Darwin. But I fear
the two may never be well again.
Excuse haste

Ever Yrs.

A. Gray

Cambridge, April 14. 1864
Dear Wright

Yours of March 20th -
came yesterday, with one to Dr.
Storker enclosed. To-morrow I shall
mail that to Storker, and at
the same time send one yours to
me to Darwin. - Tho' the poor
man is sick, it will enliven
him. I suspect he will say
that *Orcidium* (?) ^(that must be *Epistola*) is a male
plant, - its pollen fertilizing
some other more feminine indi-
vidual.

Keep up obs. and soon
I will tell you what Darwin says.
I hope you will see home
in July, or August.

I have a very long list of
determinations of *Monopetalas* &
from *Epistola*. 3 or 4 m. yers. of
Compositae, etc. Think I had
best not try now to copy it all,
it is so long, but you look it
over when we absent, & so get
sorted up for your return to Cuba.
But we will see.

29th April

Yours of the 10th inst. came
a few days ago. - a very inter-
esting letter.

It you are to come home in
July, as I hope, & you promise,
I guess I will take the atten-
tion you present, and not get the
copies of Pl. M. Brit. in between.
It is doubtful
if I can get them to you till
just as you are in the way
home.

Very overhauling
your collections here, you can
note here in interlined copy
many things that need be
added to your preceding
explorations. - also intercalate
all Miss. back's recent naming.

I have another, very long list
of determinations by Miss. back
which really I am unable to
copy, nor would it be worth
while I suppose. You would
use it here, when your collections
are overhauled for distribution.
There are many novelties, and

3 n.g. of Gomphocle, this
add. "I intend publishing
an Enumeration of all Butea
Plants; hence it would be desired
to have Mr. Wright's last col-
lection before I give my paper
to the press."

I have told him you are ~~very~~
coming home this summer.
Your notes, with your last collections
will be of great use, & if you
could take back to Butea -
or get it within a year - an
enumeration of the Butea plants
yet known, it would be a great
help to you. You and Gris.

are likely to inventative your
notes in Butea Botany.
I am now busy in College
every day - busy superintending
the Historical ~~building~~ building,
which is going up. And at the
same time as President of
the American Academy - with
annual Report, etc.

Also I am changing gardeners,
and much otheration & care
here with. -

P.S. Half the sets (i.e.
10) of Lichens but, are already
sent - which = $\frac{2}{3}$ - as the
full sets to be taken. There
left is only 1/3 - 144 spe-
cimens.

Dickinson's new article on
the is in printers hands

A.S.

I have found some
more - cross-bills -
good birds.
y
-y

April 22. '93

Dear Misses,

I went to-day to the
Navy Agent. He said
he did not expect the funds
to pass the bill before
first week in May, or there-
abouts.

Call for Mr. Peterborough
(Pl. Cursons) packed, & go
Sunday by ship

I can now at once for the
pay £22; - which ac-
cordingly you can have now.
I shall invest all for you
in M. & A. Stocks, if you want
for it. ever. A.B.

Respected Mr. Hooker,

"My Father is making application that the Consul at -Bura should forward King's things at once. I expect most small parcels, - size of the hand - would be sent through Foreign Office at once. We especially want seed of Palms, and all shrubby or economic plants. As to Botanical curiosities, except really objectively interesting, they are not worth sending; or rather we have ~~now~~ space to cultivate miscellaneous oddities that are as well seen in a herbarium.

Small in wood boxes, with seed in charcoal are best to send. Pack the seeds in paper as usual; enclose the packets in another paper. Then enclose all in bags of powdered (not pulverised) Charcoal before enclosing them in box. Roots, Orchids, &c. - best sent in dry box, with shavings, during dry season."

Cambridge, Aug. 8. 1864

My Dear Wright

Yours of the 4th from
Wethersfield, no less than
that of 27th ult. from
Havana. I found here on
my return this morning from
a week's absence - chiefly
at New Haven - I saw
I passed near you, on my
return, but did not know
you had got here yet.

It would have been safer
for you to have destroyed
or defaced the draft on
Riding the moment you
found you were not going
to use it, -- And, that
not being the case, I wish you
had written to Riding at
once to stop payment, -

As it is the ~~ascal~~ has
last Saturday's, and may be
last Wednesday's mail
the start of ~~his~~. -

I write to-day to Roding
to stop payment.

Of course, we shall
be glad to see you -
especially now, when I am
quite alone - Mrs. Gray
being most of the time at
Beverly just now.

I have a bill of Lading
from the Antares, for
one box, for Mrs. Reswick,
I will forward this to Westman,
and ask him to see also to
the Havana things, and
sign to him.

There is money here, of

course for you - as much as
~~you~~ want.

As to Distribution - take
your choice - either to take
right hold - as soon as we
get the coming parcels - say
next week. This would
suit me well. - Or to defer
till Sept. - say a month hence
when we may expect to have
the big room of my mother ready
to use for this purpose.

In haste - Hoping to see
you - either now or later -
just as you please - ever
your
A. Gray

Cambridge, Oct. 5. 1864
Dear Wright.

Have you returned
from your journey?

I am working for dear
life, getting books & speci-
mens into their places in
the new Conservatory. It
has been hard work and slow,
but I must get on so as
to be ready for the American
Academy - which is to meet
here Tuesday afternoon
the 11th. - next Tuesday.
Would you like to come?
Should be glad to see you

If you were here now, you
could help ~~me~~ - Some time
after I can help you, - but
I can't say just when.
I am pretty tired.

Ever yours, A. Gray
Mr. Gray still captured in the house

and much fagged - the
send best regards.

AS.

sent him a month ago, but
\$500 is your credit. I never
have bought a book, but your
former professor some other investment,
- where he missed it, I think.

Stokes (I think) said you do not send
minutes direct to the parent, but
through Congress. So say, he will
know his father's presence more often.
Letters for you to facilitate things,
the publication, & so on, are a-
going. Former still at New Haven.
Barnes writes me that W. S. Curtis, has
written to him to ask for news of the
scientific world. Poor devil. I will
soon see if he will look at fungi
again. Better for rebellion, he
had.

Mrs. Gray is pretty well
(fired with too much work) & sends
you her kindest remembrance.
Mrs. Loring Blane is doing all well,
I suppose in California - no more of his
annual change.

In one, this letter partly to the
general disturbance of an uneasy
conscience, and partly to a sudden
cold sore throat caught by catching
cold in hot weather - which unfit
me for more driving work. It is
getting better. I hope to write you
again before I catch a new one.
Ever yours cordially, F. Gray

Jan 10, 1868, (1868)
My dear Mr. Gray,

I am not going to go on
as a business. I better from me your
direct letter, in the hope I have more
from you since your sailing, but that
is no matter. College & Garden &
other things together are enough
to drive me mad, but now the
College work begins to hold up, and
will soon be over. And as to the
Garden, I have at it, the two
men to come at the end of the
summer and help me all
winter, at least perhaps longer.

My last from you is May 3,
N.Y. I have seen 2 from
your brother that the Museum
Sulmona in manual, a photograph,
etc. etc. sent by me reached
Wethersfield the day you left. I
posted them in time. I thought, as
I have reached you there, but the
Sunday Mail would not accommodate
you.

Oh yes! I have yours of
Hakima, that is with your
ship-board studies on the Carib-
bean & Chappin and Gisebach.
Well, sometimes one says, sometimes
the other, sometimes ~~studies~~ a
difference as to who the author
of a book is. ~~Which~~ whose
name is on the book, or rather
who wrote it in copy.

I enclose my letter to Mr. Gise-
bach. I am hoping to arrange
to have this Cat. ~~Book~~ printed
or stenographed at Göttingen, for
the Smithsonian Contributions, and
have written Gisebach to cultivate
his Spanish influences in the view
of having that Government at length
patronize effectively the bringing out
of a Third Edition, by Wright &
Gisebach.

You will be, perhaps, not much
surprised to know that the
European Botanists don't think
the Fl. Brit. W. Indies very well
done. - C. W. Storer, Manchester.
H.

Reichenbach - now the Professor
at Hamburg - & the orchidologist

was that in the Ind. W. Indies.
Cuban Orchids from you? will pay
well, and will make well all of
them.

I advise you to
collect a set for him of all
the pub. that you meet with -
old & new - a double set -
keeping one with corresponding
numbers. ^{Hamburg} ~~from~~ ^{you} ~~you~~
sent - by Gay's list, ready in
parcels of such direct - to
Prof. N. E. Reichenbach, fil.,
Botanic Garden, Hamburg.

Dr. Stork has got your
list & rather the pay for
that set of plants, and
as to be received here, I have
placed of the funds in England
all ready to put into the hands
of Gay's Correspondents, in order
the moment you want any
funds - which will not be
slow. So I shall send the
value of £32, as soon as it
comes here, to your brother, to
be invested for you. Besides
the £1000 in P. Bank, &

Jöttingen 26 Dec. 1865.

My dear & dear friend,

I enclose then few lines to tell you, that
I am being unwell at the close of the summer I
spent nearly two months in the Alps: when returning,
I found the librarian with whom I had arranged
the edition of the Catalogue of the Cade Flora Germ.
rupt, but since last month the printing is going
on again and I have sent you a few sheets:
others will soon follow. To Mr. Wright I have
sent the same sheets. Yet his new set, which
arrived here too late to be as yet examined,
must be laid aside, but if possible will be
examined upon at the end of the volume. From
accounted official duties I could not leave
much since my return, but hope now for more
leisure. At last I have transmitted to you
the first part of the ^{directly by a Bremen dealer} *Wettsteinianae*,
I hope to submit the second and last portion
during the winter. (The *Tricarenza* it was
welcome.) I have enclosed in the sheet
my paper on the distribution of the *Wettsteinianae*
plants. On my most exact map of
Cade I cannot find out many of Wright
localities: can not you provide me with
a short list of those districts, in which he
has been and is now? when for instance is
his locality Toscana? Ever yours, affectionately
J. G. Grisebach.

Cambridge 29th Jan
Dear Wright,

Please give Grisebush the w. m. if
you please - a sketch or inventory
of the Plants & your collections -
e.g. "Torreano" when situated,
"Retiro" etc -

I now have sheets of Cut, Cuta, up
to p. 48 (in Plantae). And he says
he has sent some to you.

Soon I will lay out for books
my set - as far as possible - as the sheets
go.

Asa

Cambridge
Boston

W.

Very Rev Harris' letter says
I have sent to Gay, a parcel
of you, i.e. Rev. H. H. 2, -
my paper on Colitis Mont.
nomenclature of W. H. etc -

In my last I forwarded letter
from Boston.

Your letter to-day acknowledged the
receipt of \$300 from me.
Ever Yours, A. Gray.

Miss Gray is pretty well
- but the heat & hard
work will be here. In 10
days we will be off for a
little holiday.

Ever, dear Midget
Yours cordially

A. Gray

San Francisco July 4, 1881
89th anniversary of the
United States.

My dear Midget.

I am very glad to hear that
you are in very good health that
you started my last mission
- you - a good long letter.
Here is a fine letter from
you - showing how busy and
active a man you are
- pretty well for a man
of your age to be skinning
in, Palm - trees, and tanning
your skins - Be careful!
- Grisebach will take your
criticisms all right, no
doubt. Yesterday I got the
enclosure from him. Very
well. In the Carbon M.
Journal.

At to the nos. 1844, 1863, 1877, ^{to-day} I have sent him
what he wants,

But the Missional 681. I
find no clue to. - and I
doubt if you will, but if
you can, very well.

Of course, write to Gisebach
through me, as often as
you please. - tho' now, while
he is at the Catalogue, I
think you would do well to
write to him directly.

And would it not be well
to send him plants direct,
by a Hamburg vessel from
Havana or Matanzas, which
they could see to. If you
can send them, and I will
see to it.

Of course, if he found this

Cuba (at, now, as I see
he will, there will ~~be~~
be plenty, for you to add,
So there will be, any way,
as long as you stay in
Cuba.

I have just sent to your
brother \$45.08, being the
proceeds of Stokes's £32,
I shall send more before
long, My heart is torn, as
you will see.

Dr. Stokes has sent me
a specimen of Melastomaceae,
that was African tree
a foot high, many years
old, with red leaves, and
those all in shade.

Cambridge, Mass. July 12, 1861.
Dear Wright.

Best Shinar, Roman, tobacco,
may be of most use in Cuba. so I
send you most of the stock.

I send you too Mr. W's letter too. I enclosed
a duplicate of what I sent you in my
last letter - about things under cover
to Eckmann, & Mr. Under Secretary of State
of the enclosed also.

Please drop a pleasant line to good
old Sir William whether you have
occasion to use his facilities or no.

No news here since my last, a few
days ago, I am now in charge
of a place to get some money to enter
the Post. Garden. &c. - and when you
come home, I may want you to buy us
some suit, &c. &c. But we will see.

Ever, dear Wright, Yours, very
cordially
J. L. G.

Cambridge, 18 Aug. 1861—

My dear Wright—

Your letter from Gaula, July 24, reached me in Oneida Co. while we were holidaying. We are just back after 3 weeks very pleasantly passed, I thought to have brought Mrs. Gray back. Very well set up:—but she is in the midst of a depressing fever. She ~~goes~~ goes now to Beverly to try sea air awhile. I am glad you are having a nice time & all going smoothly, and are finding lots of new things. Your letter must have crossed mine from me in which I told you that Gustav had got the money which Mrs. Putnam had offered (I saw it?), to pay for printing the volume. H. C. Put. I have not heard from him since.

You are right, no doubt, to send me these, as soon as you can, all the plates you have got collected. Fendler is ~~here~~ to be here by Sept. 1. Under my direction, with some little aid, he could take out a set of them to send right off to Gustav. If he

get them in time, very well,
I will, as you say, then
can go to some part of the
country. Supplement to which
I will have to do, for it is
clear that you have not
exhausted Cuba.

In the present state of the
case, therefore, I agree with
you that it would be foolish
to think of bothering yourself
with Hayti & the negroes.

But DeBaudelle writes
me that a Frenchman
named L'Herminier - at
Point à Pitie - the son, I
take it of St L'Herminier -
after whom Herminiera was
named - was a negro who
takes a great fancy to botani-
zing - makes good excursions for
and, if encouraged would explore
the island, going where nobody
but a negro could go.

I think I will write to Baud
about it.

Plan is now I am I am
members. But I shall
expect to see him here before
the month is out. I will
see if he takes, as he ought,
to the plan of the appreciation
gift to Grudlach, and am
ready to pay ~~over~~ you \$500
when called for.

The enclosed printed sheet
was sent to me (by you) by the
author Reichenbach (Humboldt)

I think he is trying to pick
a quarrel with Grisebach,
and so it is just as well that
you cannot make any special
Orchid collection for him.
No doubt he knows it did
better than Griseb. but
the one - any one now. - But
he is a queer, troublesome
fellow. I suspect. (Has some errors)
I will in March. Mrs. Gray
send her best regards.

Ever yours cordially J. Gray

Windsor, Sept. 5, 1861.

My Dear Wright

I have nothing from you since I last wrote, nor have I any thing from Gay, so I suppose that the plants are not yet shipped hither, but I presume will be before this reaches you. Fendler is here, & we can take care of them.

The Bostonians are getting up a line of Steamers direct to Havana - which will be handy for us, and save many charges in New York, Let Gay take notice.

Dear you - Mr. Hooker is dead - of diphtheria - on the 15. Inst. - 6 weeks over 80 years, I have no news yet from the family; but I learn indirectly that Dr. Hooker is sick - a gastric affection. I do hope it is

nothing dangerous.

To-day came from Grisebade
the 1st sheet (16 pp.) of
"Catalogus Plantarum Briben-
sium" 2^o Flor

a sheet of

"Diagnos. novae Euphorbiacearum
aus Cuba" - Char. & n. pp.
to anticipate C. Müller &
Gussone. "Let 'em rip."

+ Wendland, on a new
genus of Palms, Gaussia
principis, Palma montana
lecta a Ch. Wright, no. 3224.

As these sheets were not
sent to me in duplicate
I conclude that a copy
is mailed direct to you, through
Gay. But now know how this
is, I ought not to spare any
copy, as I want to collect some
lines, with the specimens.

There is a Limonia Sauvallii
(1875) -

"Asimina Blainii" (1103.
(olim Urania neglecta, Species
Cl. Blain, Botanico Havanae
si, dicata.

I am sorry to see that
when he has given diagnoses
in his hurried papers in Gitting,
Proc. Proceedings, he does not
repeat them in the Catalogus -
making that less complete than
it should be.

He has "owned up" in Gicca,
I.

It is awful hot here -
You are better off in
Cuba.

I last week sent your
brother \$200 more.
Mrs. Gray only partly well,
Ever Yours cordial A. Gray

thing has not yet got on as fast
as he wished & expected, and
that only now has he got
the printing under way. I
should now expect some reply
to the 2 or 3 letters he has not
noticed, and as soon as I hear
I will let you know, - without a
day's delay.

That first sheet of Cat. or print,
did not go far enough to be of
any use to you; and I thought
I should need it in answering
questions that might arise be-
tween us. That either he or I would
have to ask, about keeping the
numbers straight. &c.

If the printing had made progress
already I am sure that either
you or I, or both, would have
received the sheets.

I send on the list of Mass
to Thacker. At last accounts
he was in very poor health.

Your enclosed *Lexippos* Com-
plainta looks familiar, and the
character says *Chaptalia*, -

Cambridge, Dec. 23, 1861.
My dear Wright

This is Saturday Evening,
to-morrow Sunday, and the next
day Christmas; and that
shall not pass without a letter
despatched to you!

I did write you pretty well
till lately, say 2 or 3 months
ago when being awfully
busy all the while, and nothing
special to say, what strength I
could muster of evenings for
letter-writing was then drawn
off into other channels - but if
when I could not avoid my post-
pone it. But you must
not be neglected.

When I write to you last,
I said now well say,

Your letters received by me date
say going back to the 1st of
Sept. 4. from Habana next
" 21 - " Valparaiso.

Oct. 14 - Valeriana (returning)
letters from Parker and from Grisebach/
" 23? Valeriana.
Nov. 4. " enclosing a set of
Enicocaulon, which I have not got
a chance to study; but I think
it is diff't. from any you got
before.

Dec. 7. Valeriana: and this
reached me (Thurs. Sat.) to-day.
It encloses a note to Grisebach,
which shall go forward by the next
German mail. I had long
ago written him, urging him to
send to Gay for you. The sheets
of his Catalogue as fast as
printed. It is very long since
I have heard from him. - not since
I wrote you - But my last to
you would seem to have been
lost after reaching Gay.
It to you seem to doubt whether your
box of plants sent thru Gay to
Boston last ^{summer} fall ever reached
me: it must have been in that

lost letter that I told you
(y't that was long ago) that
I received the box - I can fix
the date as about middle of
September - unpacked, selected
and sent off a set to Grisebach.

Grisebach has not written to
me since this parcel was sent
on to him. But he was duly
notified by letter of the sending,
so I presume he has got it. -
I suppose is studying it up to
incorporate in his Catalogue.

When he wrote last, he was
going to have his vacation &
travel a little. And it was
plain from what he wrote, I
see that the 1st sheet of Cat.
he sent me was only a proof,
and not to be struck off till
he returned from his vacation. -
when he proposed to go right
on with it. I presume the

So I shall have only 2 months
more of his work.

Referring to your letter of
Oct. 23^d - You say you ad-
vise Gay to ship to me a
box of plants now in Havana
by a Boston Steamer. Nothing
has been heard by me, either
from the box, or from Gay. So
I presume it was not yet sent.
I doubt if there yet be any
steamer plying between Havana
and Boston.

Mr. L. you add P.S. that
~~Alcyon~~ you the ship
shipped the box, and written
to me about it. Not a bit
of it!

In enclosing this
letter I will address a line to
Mr. Gay asking what things
mean - and how & when he
sent the box.

D. Chapman has been up, & made
me a little visit.
I have not seen since his
return from California.
Father is going to marry, & is building
a house. Mrs. Gray only so -
rather full. We send best wishes for many
Christmas. A Gray

2^d

most likely our *C. integrifolia*
which you once collected in Texas

Pl. 2. of Benth. Hook. Gen.
Pl. is out. Only 6, instead
of 12, copies have reached me -
but the other 6 are on the way.
I will make up a parcel for
you and send it to Gay now -
now, as soon as the 2^d batch comes.

It contains mainly only Legu-
minae, Rosaceae, Saxifragaceae.
& Myrtaceae. The Melastoma-
ceae, which would interest you
most, were done by Dr. Hooker
and were to be revised for printer,
when his father's death, and
his own serious illness prevented,
and so Bentham cut short - when
he was & prostrated - a thin
misshapen part - the rest is a fine
ish the Polypt. & the volume,

Andersson (of Stockholm)
has at length sent me
that oil painting, copy of
the portrait of Linnaeus, which
his wife painted for me.
And I am going to the expense
of a gilt frame for it.

I have just to-night
read the last proof of my
paper of Mr. Sp. of Bonnier's
Bolif. collections, up to end of
Compositae. — a job of my
hand at length, as I shall
not go on further at present,
but must leave to Wilkes,
Ethel. Exped (South Pacific) ~~Am~~
Mptela — as soon as I
have digested a nice set
of Sandwich Island plants
sent me from Kew; also
some of those collected by H.
Mann. — and put in order
a vast coll. of Japanese plants
from the Kew collector, also some

Dutch collection from Leyden
Museum.

I'll send you my *Caliphnia*
article for you to amuse
yourself (more solito) on
rainy days by picking up
the flaws in the Latin, and
the misprints.

Herndler works very well,
and we are getting the *Palmer*
name in order. But to keep
him at work I am obliged to
look after him and work at the
botanicon generally, instead of
doing the more pressing scien-
tific work I wish to. —

Herndler is engaged for the
6 months ending March 1.
I had hoped he would stay
on, but he says he cannot.
— That his brother and their little
garden & nursery-plot will
not get on without him.

(Latis)
set of Pharyngans also, that
Andersson of Stockholm
will probably take.

So, when you have not much
else to do, and the fit takes
you, you might advantageously
enough gather in a new lot
of all sorts, especially as
you had not done much
with Terns at U. West end
of U. Island.

From Boissier I have to
day received a draft for
£30, for you. I do not
think you will be needing to
draw on London soon. And
besides I have something
there yet. So, to answer
I shall get this draft cashed
in Boston, at the current rates
of exchange, and deposit the
proceeds with your brother -
adding also \$100 which
may about cover any balance I
may have here already.
So you & brother can further invest

(San Francisco) Aug. 16, 1866
My dear Wright.

I wrote you about a fortnight ago clearing off a number of di. scus.

Since then I have only yours of Dec. 13: from Boissier, and to day a note from a letter from Eaton, about "*Barnardalia oligosperma*" & its impregnation.

Your letter states that "the box of plants was shipped by Gay on the - day of - August, by Parker & Barker to Martha". This makes all clear, viz. that it was the box I received July early in Sept. which tender helped me a good deal, and a set, with special numbers went off at once to Wislizenus, and all this I wrote to you about - must have been in that letter so oddly lost after reaching Mr. Gay.

I do not doubt the set I
sent. Gutschach reached
him safely, because - as
I advised him by letter,
and have re-advised in
later letters - he must have
made a list in case of a
fire etc. But I have
no letter from him in
all this while - tho. he
ows me at least three

Moreover, last week -
without advice - came a
case by German Steamer
to me containing the set
of British W. Ind. Dupli-
cates he had promised me
- up to Montserrat.

But no sheets of his Catalogue.
So it is plain none are yet
printed. - and that the distri-
bution of the mass of British
W. Ind. Duplicates, as has

Kept him back, so we
need not scold him for not
sending you sheets not yet
printed - Yet I blame him
for not answering letters more
promptly. I wonder I
do not hear from him!
However, all in time.

Gutschach did send back
the copy of schedule we
sent him: with names under
in the blanks and some for
correction; so briefly noted and
badly written that, I think,
we can do nothing with it till
his printer sheets come to help us.

If we have, as I fear,
ourselves to make out the
list of your whole collections
according to the number, I
only wish you may be there
to take it in hand.

All your old terms
are sold off but one set,
that is saved to go with a

\$300 and odd for you - to
help keep you comfortable
in your old age, when
ramblings are over.

I write you that the
2^d part of Mr. M. & W. H. K.
Mr. Pl. is out & here for
you: but that is it less ex-
tensive than was expected, on
account of W. H. K.'s sickness.
I want to send you this, - and
a paper of mine on Californian
plants - and my Eulogy on
Sir Wm. Hooker. I must now
look up a vessel for Matamoros
& put it into the ship's bag,
addressed to Mr. Gay.

Torrey is coming to visit
us - was expected to-day; but
put it off till tomorrow.

Eaton tells me to-day
that he is to be married on
the 13th Feb. Perhaps I

may run on to Niantuck
to see him swung off;

You are certainly all
wrong in supposing that
Grischuck is puffed at
your criticisms & remarks;
that can't be - no sense
in that. You see he has
been equally silent to me.
Has been working at other
things, I suppose, and is
puffed. He will turn up
one of these days all right.

I enclose this to Mr.
Gay, your name not ap-
pearing outside, He will send
on to you as you arrange;
I don't see any use or
sense in getting into a pro-
testant's correspondence.

Mr. May sends best regards -
the Clarence, & well; but this
old lady ages fast. Ever truly
Belmont

Bandula, Mon

March 5, 1886

My dear Mr. W.

Since I wrote last, I have
sent you Young, 25th. Some time
ago received.

There are very many mistakes
in Grisebach's citation of the
numbers, besides those you
have pointed out. I am now
busy in laying out for herbarium
my set of Cule plants, and
checking the numbers &c. very
carefully. Mr. Fendler was
helping me all in March. He
has now gone back to his
wallowing in the mire of
his garden patch in Mission
- where his brother could do
nothing without him, it seems.
I hope by end of this week to
get it done up to end of the
month sheet. I lately received some
up a p. 120 (in Loranacea), and to
send errata to Grisebach.

Perhaps may be the
man! Any way, I clearly
understand from Grisctack's letter,
that he has got the money
to pay for his Catalogue.

Perhaps this time, you should
have received the new part
of Green Pl. which I sent
in letter-box of sailing ship
to Mr. Gay,

assuming you will find it put
where it belongs, i.e. in the
Melapomene.

Perhaps it will be ~~no~~
news to you that ~~Dr. Driver~~
~~to me~~ Dr. Driver is
to marry Miss Blanche, soon.

Do you want to make her
a wedding present?

Caton is married - on
the 13th ult.; I went to N.
Y. and saw it done. ~~There~~

Days after, he went to
Europe, with his bride, ^{to}
be gone till next fall.

The enclosed card came
here for you.

She seems a nice girl,
and has some time, at
least her father has.

Last week I sent to
your Brother \$150 more
for you.

~~Trace~~

Trace Mann - who
was at Sandwich Ind. is to
be a student - and help
me what he can. I think
he will do pretty well.

I have to get up a new
edition of Manual - do it
all over new!

Ever dear Mapt. Yrs
Anthony

(Can. L. S., March 24, 1866.)

My Dear Wright.

This, for I suppose, came from Sullivan. The set of 100 D. Amer. Mosses which he sent desiring your Cuba Mosses in exchange. I have let Sullivan have, he paying me \$15 for a set of the Cubans which I am to send I suppose in return. Sullivan takes them for some friend, I thought the \$15 would be paid by you.

I have now the sheets of Miscel. Cat. up to p. 176. Lately the enclosed from Griswold. I have sent the tickets to the plates of 1865 all. There are a dozen yet which he has not named. Many of them are well known things, overlooked accidentally, I suppose.

My latest from you are of Feb. 17 & 13.

If the Fr. - Bandicis come either to New York or Boston, I will take care of them. But I also as you know before this is married, & in Europe.

If you have sent, I hope I shall know by what vessel, so as to see to the precious things.

The remark of mine about list of your whole collections relates to a list in order of the ~~numbers~~ numbers, to be printed at the end of Griswold's Cat. I fear he won't make it out himself, and he is too careless and careless enough. I am getting it all right, in my book, shall have to copy it out and send to him.

What a pretty color is the word of Colubina - a cumm. etc.

Three - named, has 3 names from you.

Triplinenus from above the nose.

But Griswold is careless, sometimes, of these things. There is no twist in figures of Tiliandria taken from live plant, in Bot. Mag, & not any more in the description!

William Lloyd Jones
Kathleen Jones
Marian Jones
and John Jones

The above list shows the names of the
children of Mr. Jones and Mrs. Jones - born in
the year 1880.

Witness my hand and seal this 1st day of May 1880.

John Jones
[Signature]

Bancroft's Motion, people have
forgot all about - you great in-
ventor, nobody cares. I will send it
you if I can find a copy. I remember
the night of keeping it

As well as I remember Gillsch's
letter last year. I should hardly
expect him to have picked up the book
I put in just yet. I can "poke
up Sullivan with a sharp stick", but
the thing is, to poke up Gillsch.

Only alteration in address for
Kew is Dr. J. D. Fisher, Director
in place of Sir Wm J.

Then my regret to hear from
you again very soon - as soon
as I hear from Bremer.

Ever yours cordially,

My, May said best regard,
to Mrs. Clara - whom
I saw yesterday - have not seen
Miss C. lately. Mrs. B. & I
are secretly consulting what to get
for your present to Miss C. She is
to be married only in September.

Yours -

Yours these fresh seeds of Pennsylvanian Banks!
Hamburg April 17, 61.

Dear Wright

I have yours of March
15, 25, 29th - the last came
two days ago. Sent to Bremer,
it brought the response I
enclose. I think at
present, if the photographs
are few I shall send them
by mail as cheapest and
surest. - but if in numbers -
or there is anything else to
send, by express; - in any
case to Messrs. For, Hatzman

You know this is the busiest
and most distracting of all
seasons for me - College, &
garden, to enough to hear
out any body. But I do
not mean to neglect you,
any way.

Reichenbach of Hamburg
is now the Orchidologist &
You know he wanted you
to get for him a set of
all available German Orchids.

You thought you could not
letter with it specially, but
I have promised him that
he shall (now that Gusselach
will be done) have post set,
He writes asking for a
dulle set - which he will
pay for literally; he wants
to correct many flaws and
yet have good set to keep.

Now, I wish you would, and
I think you might, say
for him good set of all the
Orchids you meet with - old
or new. It is a real Orchid-
maker, - will pay well, and
- what you like - will sink -
lights them sharp, - much
sharper than Gusselach.

Besides he wants to come
in as a subscriber for all
your Botanical plants. I am
to send him one of the best
of these sets left - very imperfect,
- and then there will be little left.

except odd & end.

The little Trig-leaves with very
long acuminate belong to the
Pepul-tree of India (Banyan)
Ficus religiosa.

These Diagrams of Euphorbia
of Gusselach, I have been wanting
as I laid out the set for
him, and corrected Gusselach's
many mistakes in numbers.
Even now I don't quite like to
spare them to you. - to whom
they will not be of much use either.
I will send Wendland or Gusselach
if I can find it; but here
the little thing is.

As to the Scandica petals,
and all these little things, you
see how impossible it is to make
these closet-botanists always go
right. ~~Another~~ Another Gusselach
& Hooker take more pains even
with particulars - having ~~so much~~
on any thing to do - to be always
right, or perhaps generally very exact.
As Wendland & Hooker, seem to be the
most exact, I will send your material to them.

P.S.,

I send one of the
stone graphs,
Venus

Cambridge, May 9 66

Dear Wright

Yours of April 3, & 14th
reached me duly.

I have sketched some more,
on the enclosed sheet.

I am so driven, so distracted

Bless your stars you are not a
Professor, & Presnt. of Academy,
and have a Bot. Garden & a
gardener well trained, & have
students, & many things,
My correspondence all in arrears,
and I am ~~the~~ getting pruned
& don't care.

You can't make Missbach
attentive to details, I fear;
never mind. You write a Fl.
book when you get ready,
and make it all right.

I have been unable to collect
my set with Bot. but, got
beyond p. 117. Rubiaceae.
I had up to p. 176, and now,

to-day, I get by mail
sheets up to p. 248, nearly
through Cypripaceae, which
I W. prints early in manuscript.
At the end of this month
we get a week nearly of re-
cess. - when I hope to collect
these sheets - perhaps up to
Compositae series.

Mrs. Did you get my letter
(addressed outside to Manuel Sr.
Havana) enclosing the 6
stereographs; finished kindly
by Breuer. If you say
they can all right I will
send the other 6 in the same
way.

Miss Blance is to be married
in Sept. I have not yet got
the present, nor settled what it
shall be. I have had one
private consultation on it, with
Mrs. Blance.

I have written to Brander
in California for seed of
Meltingtonia for friend
Blaine. If I have,
or can get any thing
in name, I shall be
glad to supply him.
any way. I have,
lately some Australian
seed, from F. Miller.
Acacias etc. etc. etc.
I shall send a lot of these.
I must arrange a parcel by
Express to put these seeds
in.

Good night. If ever
I get rested I will write
you more of a letter

Ever yours

A. J. C.

March 1, 1891

"Hargreavesia" *Citronia*, Michx.
- *Limnadenia* *Citronia*, Gr.
(*Diaphanopeltis*, Michx.)

What the "Hargreavesia" is
Thalassia? is all the same
- it is not *Thalassia* at all.

I will forward the papers
to Grisebach - except that in
which you say you are "confident
that all these *Parsonsia* have
yellow petals".

March 1, 1891

"*P. andrifica*", "*P. mucronata*",
P. megalephthalma, "*P. purpurea*",

So much for M. & J. dear Wright.
As to tickets, I always
tried, in distribution, to supply
Grisebach, and also to keep
one myself, to know the locali-
ty, - for I suspected that
Grisebach would rarely give
the locality, - I used to
take a good deal of pain about
this matter - but I may have
overdone it some times.

Often, I think, Gr. must have
had the color of flower for an
ticket, and neglected to use
it.

The *Parsonsia* you see are
not for art, as to color.

As to *Belainia spinosa*, Grisebach

quotes it only from Richard.
— not idea connected with any of
yours. He says only

"*Holidia* minus obliquis a
precedente distincta" (Rich.) E.

There are his quotation marks.
The preceding is *B. mucronata*,
Mr.

I suppose that your *B.*
mucronata is, after all, Richard's
Plant, - but some discrepancy
see, in other Grisebach

As to the many little things, Grisebach is very careless. - & there is no use in our (your) being too much bothered with his errors & omissions, & misprints.

As to Mr. more important
of them, and the Geographical
& Personal connections, — you
just supply me with the

- or better you just write
out the corrections you
wish made, and we will
print them in Ill. Journal
when I notice the Cat. Cat.
That will give a capital op-
portunity, & we will have
extra copies enough to supply
our Boston & other friends.

It is not likely that
Candlishness will anywhere
be charged to you.

They will soon give
a lot of this now. I doubt
if I shall get this for
some time yet.

"² *Cacalia discolor*, ~~Agate~~
~~not open any the flowers~~
~~very or less, & see if I have~~
~~the total~~ "Yes, my letter
was, fl. white" "I am a flower it

perhaps want the extent of
government help.

Alas, your letter will be
too late for dear Harry.
He is dying, of consumption
and we may hear of the end
any day.

Just as soon as I get the rest of
the sheets of ~~the~~ my mailed
copy of the book, I will have
it bound up interleaved, and send
it to you.

— Mr. Gris. is rather careless, but
not mean, I think. About the
Harden study not. When Gris.
published Harden, there seems to
have been an earlier edition of
Kardner, — & so Kardner steps in
(nearly, perhaps) & names Grisbald's
~~Harden~~, the Leipziger. — which of
course Branth. I think, have to admit.

I hope you did get the photo-
graphs by mail to Morales too,
also the single one in my last
letter. I shall not soon know.
I cannot think Morales's box & letters
would be opened & robbed.
This is all at present from your
old, ever-true friend
Asa Gray

Cambridge, 19th May 1866.
My Dear Wright.

I have written you quite
lately, and often. But here
is yours of April 29th, and, as
I wish to send you Grisbald's
last, here goes again.

You know I am always
hard pressed and hard worked
at this season; and this year
it is far worse than ever,
besides the bother of my classes,
unusually bothering in the new
arrangement. There is a new
gardener and a great deficit
or rather deficiency of funds to
carry on the garden. So
I have to run the concern
pretty much myself. And
to crown all, my little man,
Arthur's gardener, in his anxiety
over the work has got into a
state of nervous excitement &
gets no sleep nights, and,
if not soon relieved will, I fear

become truly insane, I
have been expecting it for
several days. no relief
yet. If he continues half
crazed, you may expect
me crazed next. Then
there are some special
scientific students, working
up here, to add to my
utteration.

So do not your "gravel"
at me, now, if you can
help it. But let
Lise back slide;

I hope he will correct
some of his misprints, and
that my last batch of
corrections may reach
him in time
all the later sheets of his
list will not have the
various of the misca by us.
And I see he has not
written for that summer.

very early, about 10:00
have capital and for any
but a small number of the
from a list of 100.

Well, never mind what we
can't help. I suppose he is
obliged to hurry on the
work.

I propose, as to your later
collections - that you work
them up yourself, in a
sort of Supplement, in which
you can correct his dot
errors when important or
amusing, - making his
help, but doing your own
publication & mailing.
And that, having no
such a basis - you may
conclude to devote the rest
of your day to a Flora
Barbana; the characters
in Latin, or little L. & Span-
ish; - the rest in Spanish.
This will be good & useful
for botanists generally, and
will, I think, take in Cuba

and not wait for more cor-
rections, now for a last appeal
to the press. I have been
wondering to get done with this job.
Well! His work has broken
the ice and opened a free
course for Brian Botany,
which in view of his other employ-
ment, the whole of the day,
and the desirability to have
justice done to the observation
& collection of the "Collector
in a princeps," as you
fairly call him - take this
as my special advice.

Consider it the work of
the rest of your life to
get up a *Flora Cantabrigie*
in an excellent; the character
in Latin - which any Spaniard
can read (I mean); the obs.
and all the rest in Spanish.
Tell your friends I say
it must be done.
But what help they will

gladly offer will, with the
soul, cover all necessary
outlay.

I mean your collec-
tion & notes in view of
this. - Stay as long as is
necessary. I then come
to it. I am to the work
here - an agreeable &
useful occupation for
your declining years,
and fit your name indelibly
in Cantabrigia.

There are lots of things
yet in Cantabrigia and these
further work only just put
you in condition to appreciate
them; and - there we can get
his help, when you
can read & very well without
him. Go in for it.

I have just seen Mrs.
Blance; send best regards.

Siccardia, & all other
members of connections; any more

while to secure some might be
noted when I notice Griseb Cat.
in Bill. Jan.

20 or 30 copies, which I
am to sell for Griseb Cat.
\$1 ~~are~~ of his Cat. are
on the way to me. As soon
as they come, I shall copy
off my corrections, if so, from
the copy in loose sheets, and
have that interesting bound
up for you - and send with
what else you have ordered
by Express by Boston Havana
Steamer. And with them the
whole batch of Australian
seed for Dr. Rose.

Amphistelma ephedroides, no.
2962. When the fruit 3 inches
long & 1 inch thick comes from
I have not, my specimen has
no sign of fruit. Probably a
misprint for the (lines).

Gather all Orchids, now &
if you possibly can for Griseb
attach; also says he will
pay well, & will be very useful

37

Com. hise, Mar 22nd am. C.
by steam ship.

As I am going to refer to
you, may I ~~the last~~ for
you. I have sent to June 2,
leaving an hour or so to day
on account of 'class day'.
You will excuse brevity, as
am all the time out.

As to the Griseb Cat. I am in
course. The Griseb (which I
in Griseb Cat. has not from
before, how little he gets
out, and what comes from you)
he then are of some value
and make out in Griseb.
I hope you will be able to
the Griseb Cat. I have
is determined.

I have received the Griseb
the Griseb Cat. I have
& the little Griseb Cat. I have
there are only 301 pages. Griseb.

I have not yet got through
the Museola in laying
out & collating my set of
your plants; I can do little
till middle of July,

~~Griselin~~

Reichenbach (Hamburg) &
Andersson (Stockholm)
both have had sent
to them such incomplete
sets as there were of your
collection (so that there is
little left in hand), and want
all their care to be trans-
mitted them in the future.

Andersson takes the duplicates
also from Griselin's surplus.
I tell them to cut up fairly
with the duplicates & pay for
what they get in decent state
at \$2 the 100.

I shall in a few days remit
\$100 more to your brother,

Ever, dear W. L.

A. Gray

2
Hereafter, when Orchids
come to be studied, I have
promised for you, and I
believe much in Reichen-
bach, tho' he is a saucy
fellow.

Harvey is dead (June 15)
and now also St. Greville
Greville, of Edinburgh.

Apart letters to you.

A while ago, you wrote
that your feared letters
addressed to you were
intercepted, and I think
you advised me to leave
you, none of the
consequence. At any rate,
there was the obvious &
safe course. For letters
to a well known and
respectable mercantile house

like that of Mr. Miles & Co.
could not be expected to be
tampered with. It was
in that supposition that
I felt safe in mailing
to them the photographs,
and I still feel that
they must have your
safe and are kept for
you in Havana.

But now you ask to have
your name on the envelope
- so it shall be.

But what does this mean,
Marrille?
"And Mr. Marvitt writes me
"We put our letters into the
P.O. when directed to our care."
So it apparently remained in
New York, or somewhere else."

It puzzles me ~~altogether~~,
wholly. What remained in
New York? and why? And

Do Mr. Miles & Co. like
to have letters directed to
their care - and decline to
forward them? Or do they
forward to you only by
private hand, not through
the P.O.?

I am anxious to do the
right thing - when I know
how.

I am glad you are so
well & hearty.

I shall get over my
scurvy - away in a week
or two more. But I
have to lead too hard &
worrying a life. Mosquitoes,
are nothing to it, nor fleas.
Mrs. G. is a good deal
worse too - send regards.

I have no copy left of
my first notice of climbing plants.

"
News from England in 7 days!
Why we get them now in 7 hours!
Poor Stanley ~~and~~ died 15th of
May. And old Grille is
dead since.

I enclose seed of a Mucca
from California. I think an
excellent - pressed one. The seeds
will grow. They have come up
here promptly.

Miss Blance is to be married in
Sept. The house she is to live in is
now a-fixing up.

Cambridge is now quiet, in vaca-
tion, and I am very sorry to leave
it this time of year, - when all is
peace and stillness.

Ever, dear Wright Yours
affectionately
Anthony

P.S. If this letter is not rightly
addressed let me know.

Cambridge, Aug 8, 1866
My dear Wright,

Since I wrote you last
I have received yours of the 15th June,
and of July 4th.

Here we have got Kevin over,
I have been waiting for a week,
have cast as far as Portland,
and am nearly - have been back
a little over a week, sorting &
fixing things, and writing number-
less letters - a great nearness to the
flesh. And every day I have been
protesting I would write to you -
I slept - but all such notes
have gone to protest, and that's
all.

As fast as I get a chance
I lay out your Centa plants for
herbarium, correct Miscelanea's wrong
numbers, and other mistakes in distri-
bution, and add omitted ones.
I have not yet got through yet. Hope
to this week - except the ferns, which I
may leave. As soon as I get there,
and when I get a copy of fresh copy
of Miscelanea's Cat. I shall transfer
my corrections to it, and bind up
my sheets interleaved as sent to you.
I thought we should have had
the copies out here before this. But
Miscelanea's last letter will explain
why not. I have written since

such to this. 1/ to send me
by mail at least one fresh
copy. - 2/ to have the copies
for America sent off at once,
even if the rest are not dis-
tributed till later. -

But Prussia is master of
the situation, and is dic-
tating a peace, and is likely
essentially to swallow Saxony
(where Giesecke publishes,
i.e. Lipine) and Hannover,
where he resides (Gilt in fear).
Business at least will now
soon be in its usual channels.
I am retaining the Austro-
lian seed till the copies of
Catalogue come, and then
am to make up one parcel
to send you by Havana express.
I had no idea we should have
to wait so long.

In laying out your plants into
pots - I am careful to keep
as many as I can of your
notes and news, - in view of

the aid they will afford you
when you set down how to
the Flora Cubana - which I
quite reckon on your under-
taking.

Last week I am to go to
Overdale Cr. N.Y. to see my
Mother. - and then on to
Buffalo, to attend a Meeting
of the Revised Amer. Association
- the first since rebellion broke
out. - But altogether I
mean to be about only 10 days.

That Meteoric Orchid is new, indeed,
if this is the thing they refer to. - If I
can get from you a specimen in
a letter I would send it to Reichen-
bach, with any account you may add.
And he would promptly tell us what it is.

May the very Reichenbach
me to ask you ~~what~~ to get live
Orchids for the Hamburg Garden.
I am very sorry for your fall and
the loss you got. Look out. You & I
are not so young and spry as we once
were. Mrs. Lloyd is quite poorly, so
that I will not let her travel with me
to N.Y. But she will meet at her
father's on the sea-shore, where she is
now - improving. There is too much
obedience in N.Y. State to risk her time.

man put forward, & will
pay for making it look
I could not reject it. It
will be easy to fix the scien-
tific authorship solely upon
you in four directions,
and you can afford to let
him gather any popular
reputation he likes.

Try the way told him
that highest mountain
must be explained first, and
suggest that he should
pay the expenses of a good
strong exploring expedition
upon & around it!!

That little Rhynchonella seems
new. But my net is now
in pieces, broken & broken, has
not reached the Cyprina yet.

You can't get Desman into
a real Bolanace, now,
Let the Physicist say what they
like.

I write at once to Torrey to let

Conrad, Sept. 5, 1866.
My dear Mr. T.

I have yours of July 23
and of Aug. 8.

Miss Blaine was
married 2 days ago, in
the church - just at
sunset. I don't
know it till I heard it
through the people or I
could have gone, and I
could have seen it all
of from the house.

What was brought in the
the \$100 you gave me.
I know not. I will see
H. W. Ledyard, and
ask him.

You wanted for good
W. Blain seeds of the
giant tree 'Nillingland'
or *Sequoia gigantea*. I have
got some from California,
these they are.

It is now time Gresham had my letter, and had despatched to me by mail a clean copy of his Cat. which I can at once have reprinted & bound, & then send a package by express to you. - along with a great lot of Australian seeds, which I long that you should have.

Not nothing yet from Gresham. - who is upset. I dare say, by the announcement of Harmer to Penna.

But the set of copying ~~was~~ to be sent from Harmer to me.

Till I hear they are on the way I see no good prospect for sending to Mr. Saurville about this

his sudden ambition for botanical authorship. -

On reflecting a little, I think you will see that no harm can come of this, and perhaps some good - by getting Mr. Saurville deeply interested in the Felora Catana. The book could only be written here, and he will at length see that it can be done only by you, and he will of himself, if we let all be quiet - outside into the useful patronage - not the assistance of the work, first to time for that, Besides, if he wants his

we know if Mr. Gay appears,
nothing yet, I think I shall
not miss him.

"Incumbent & accumbent"
as to City of London & church,
near St. John & "in en-
fent anthon" The latter
term I think is ~~not~~ used
by Winthrop, or that of
in town or a den in in-
come. and erect "the
no say in estate.

Yes; clearly so, I suppose.

Mr. Gray has been
very poorly,

Banner has been working
at California in collections.
He has to return to New
Haven next week.

Ever yours A. Gray

Cambridge Mass. 12, 1866.

My Dear (Wright).

News of 20th Aug. by
Ship just in.

I will not want to cross
Mr. Wyman, but will say
at once. What I want
advise you to come home
this month, and to be
col advice - And he given
by that advice very much
whether to stay all winter
in which case you will work
on Feb. but - or to go back
about Nov/Dec. if you ca
not come up. I cannot say
about this, but I hope you may
be advised.

I write to you only a few
days ago - but you may not get
that, or this, if in the way home.
Ever Yours
A. A.

Cambridge Mass. Nov. 23^d, 1866

My dear Wright

You may well complain that I neglect you. — But

1.st I had till now, nothing special to write.

2. I have been daily expecting to hear from Griswold, & have sheets to send you, — or the copies via Westerman, but not a bit of it yet. The conquest of Hannover by the Prussian, I see, who are annihilating Griswold.

3. I have been, and so — busy is not the word for it, I cannot think of any to express it. Well, I am driving off an entire new ed. of Manual, which the publisher must have in Feb., and, day by day, the printer's devil dogs my steps, and is close on my heels. It is too bad. I ought to have done the work, a good part of it last summer. — but did not take it fairly up till Sept., and then College work, garden matters, etc., etc. have distracted me. I suppose that I have now being by me more than 50

unanswered letters - though I keep aiming
the most pressing as fast ready as they
come in, but the rest get neglected, ~~and~~
inevitably. I read your letter &
follow your work in Cuba with interest.
I want you to get all the plants you
can - but I see not that you can
exhaust Cuba - and then come & settle
down here - and work up - as you only
can - a nice Florida Barona. That
you are bound to do, - just as I am to
do Florida N. America. I see some
far & prospect that I may yet - &
before very long, be able to set down to
it. But you & I are bound to do these
two things yet!

Well, as soon as I get your latest
calling for paper (No. 6), I look in
Newspapers. Saw a book advertised for
Havana - bought you 6 means of what
I trust is the thing - & added to it 1 mean
of very thin - which I thought could be
very portable (let me know, if it is any
good to you), and this all, in 2 bundles,
is on board the Bark Ocean Eagle, -

addressed to J. M. Morales, Abasco, Havana
(bought a bag only \$1.). I put
up also a bundle of seeds, & added to
it the rest of those photographs (stereo
I care,) of Californian trees. In this
bundle I gave to the Captain of the
Abasco a letter from Mr. Morales,
Abasco, & would deliver a free collection
anything else. I wanted to see, yet.
For he says they will not get off for a
week yet, so I may have something
more. The bill of lading for the
papers I enclose - along with the letter
to Messrs Morales & Co. - And the good
Mr. Marmita, will look out for it. I
will not. I write a line to him.

If you want another lot of paper
let me know. I can ship it readily &
without any great cost.

Engelmann & Co. are foots every -
Send in letter a specimen of your big new
one - first giving it a name. (No Salvinia
yet in Florida) I printed your note
to Wislizenus at once & exhibited him about it. But,
I am so glad you are well & hearty again!!

Your letter of Sept. 26 - with some little
specimens - it is now dark to get day
light. for - that is not now for much more
on this single sheet. The seed I send
to you - (to Maudsley) are Australian - many
things ought to gratify L.D. too

1 sheet,
4 seeds, 4
Cinchona -
be cultivated in
Cuba.

Mr. Charles Wright

The seed I put down in those sheets are
Cinchona officinalis. But the one introduced
to your collection - i.e. the copulations of 2,
Cuba - and the tree will be commercially important
in time, & you will be a benefactor of your species.
Enough for once. Ever your friend A. Gray

I saw Mr. M. Finner on
Christmas, had not heard
from your sister. We are all
ready to send her when she
comes and glad to do so for
your sake and her own.

Gen. Plantan pt. 1 is
worth it at \$1.1,
part 2 at \$1.15. The
copies I intended to send
only one copy and have
the 2 parts — eleven
to thirteen dollars.

Mr. Sauvages \$11.
is paper it is cheap. If
gold, dear.

I should think it would be
much cheaper to get them
through direct from London.
The duty here is heavy.

The t. capella, leaves there
is not in the book. The
book is
Dypt. her. a. leaves to be
sent, not a list of leaves to be
sent. I shall do so.

I am — for a — it
means well — is not I
legion of ruthless men.

Cambridge, July 1, 1867.
My Dear Wright,

I had made these men
and had got set down to write
to you, in acknowledgment of
your favors of Sept. 26, ^{Oct. 8} 28,
and Dec. 21 — when I
saw your latest, of Dec. 12-21.

I have, I see, a great
acknowledgment Sept. 26. I can
only say about those little Lintab-
elaces, go into them, when
you find them. As to that of
Oct. 18, I put a later letter for

you & for a while started the
papers, & a number,

I have a list for you
M. Marnitz (to be done) will
send me the letters. He has
the letters, but I am not sure
to be ~~all~~

I did not look in to the letter
to be sent. In time, M.
is long, silent; I fear he
got mixed up with me some-
way. I have lately written
to ask why he does not write,
and am Miss Cat. Curb

If you are likely to need
more paper, let me know
in good time to supply, you by
sailing vessel.

No doubt you will find me
to be a inaccuracy with a number
of mistakes. I have never
sent every time about them.
But make your notes, & when you

and the at night, top
be. When I am at
the things, I think to make
the right one. (When I am at
the office, after all, I am a
great deal of a man, and
much of the ice broken to.

I beg you will pick
up some of all the methods
you find, other, to many
specimens, and wait, when
you come to work on them

2. Richard will want
them, and will pay well
for them, 3. He will study
and read them, and will be
your real dependence in
the difficult order in which
he is now the author.

I am glad you are
thoroughly well. I am very
your hope. This means
happy that you are well.

Mr. Charles Wright

2
So you are back at the
Heann Saw-mill; nice
place. Englebar... and
mightily like to see that
I don't but it will keep,
I'll be in it. I'm sure,
that is his new hobby.

Edwin has been for a
few months. I don't
know his yet.

Chapman has been
of the heart with a
few very long, short
his old heart. He
has been to the
He can get special
to cut out, when a
out.

He is a heart to help
you to be your
own man. He ought to
with you and take lessons
before you leave. He will

be looking out. If you
have not the 'Lib. Guide'
on hand, I should like
to send you something.
It is on the bench.

It is a very good
little book. The Lib. Guide
will give you plenty of
information for several years.
Nice, attractive work to

See you will be pleased
to read the Lib. Guide - I think
it is a very good book, and
it is a very good book.

It is a very good book, and
it is a very good book, and
it is a very good book, and
it is a very good book.

It is a very good book, and
it is a very good book, and
it is a very good book, and
it is a very good book.

The book is of good to capital
value at a regular price.

It is a very good book, and
it is a very good book, and
it is a very good book, and
it is a very good book.

It is a very good book, and
it is a very good book, and
it is a very good book, and
it is a very good book.

Day-light.
Hypochloria - Myriophyllum
Borgia? No, seed not
like it. Scarer Annamaria,
But Annamaria, hypoph., or nearly.

AB,

Cambridge, April 2nd. '87.

My dear Mr. Wright,

I have received
several letters from you from December
& February, & have been meaning all
the time to write to you but have
been very much absorbed with this
new Edition of Manual, which still
drags its weary length along, & instead
of being finished the 1st of September, it
will probably not be done before the 1st
of October.

Yours subscription of \$20
(to which I added a grateful \$5)
has been paid and acknowledged in
the newspaper. I meant to have
sent it out & sent to you as a
voucher but it has not reached

Yours
A. L.

months & watched making & getting about as soon as I could - happy
you, in the process!

You ask who Quaker is - He was one of the sort of old church,

was now in New Jersey, & whence I came - Mr. Wright's

name was in the Bible, with the letter, and with other things

which I can not get out more easily - the days & the seasons

are all in the Bible, & I have been looking at the

part of the Bible that the Quakers have

as a lot much the same as the Quakers

Republicans as too many in Congress for the

the year, or even, and it seems the

part of the Bible, & I have been looking at the

should be in the Bible, & I have been looking at the

Cambridge, April 2nd '67.

My dear Mr. Wright,

I have received
several letters from you from December
to February, & have been meaning to all
the time to write to you. But I have
been very much absorbed with this
new Edition of Trumaine, which still
has its means lengthened, & mislead-
ing. I have finished the 1st of September, &
the 2nd of October now to be done. The 3rd
of November. The printer will be slow, so
that I am all the time hurried preparing
you & reading people, & now some College work.
I am again.

I enclose for you a letter received from
Priestack a week or two ago - I began to think he
had given me up, it was so long since I had
heard from him, but you see it was public
has felt bad. I am, &c.

Wishes to neglect writing & getting a
thin, in the process!

You will find it is the best
time now in the winter, & perhaps summer
time, now is pretty well, but it better
wait till the end of the month, I will
wait.

I am to know that the
probably service to be in
the last much the same
high, the same, the same
the same, or even, and it
set of 1820 years
I have been in the same, I hope a

April 6

Dear Migrant.

I have been having a
Sunday, but not over your
plans,

It grieves my heart
all will grace your body
when I tell you that
your boxes were put under
a cargo of wet sugar
which drained into
them, & have ruined the
collection.

I will report soon
I should say that $\frac{1}{10}$ th
are so rotten that they
can go only to drug. Still
 $\frac{1}{8}$ of the rest not much
better. The remainder
will be of help to you in
working up A. L. But
the majority of the

But as the specimens to ^{dispose} ~~be~~ ^{disposed}
of, say only $\frac{1}{2}$ or $\frac{2}{3}$ of
the whole mass is left,
fit for it. O.K. dear,

With great your patience,

Will you have the
courage to set to work
over again?

I'll try my best to
tell you what is
most

Yours

Wm. C. C.

New Hungi of your coll.
if only one part too - now.
described by Berkeley, in a paper
comm. to Lin. Society, and
some to be printed in its Proceedings.
I should say $\frac{1}{3}$ the lot in
n. sp. - and many of the rest
about as good.

Now, as you are staying over
our summer in Cuba - had
you not best escape our next
winter too - and come home
in the spring for good & all?
I am enquiring & looking for
a man to take your place as
collector - & to get him to you in
time to be introduced & trained.
But nobody turns up yet. - and
the right sort of fellow - one who
will make his way, will do
anything as collector, and one
you could confidently commend to
your friend - is hard to get
anywhere. Can't you find
& train a mulatto in Cuba?
Ever yours cordially

A. Gray

Cambridge, July 8, 1867

My Dear Wright

It is full time that
I should begin to write to
you. You got me off
the track by telling
me you were coming
right home, and then
by leaving me in doubt
where to address a letter
to you. Then, literally,
I have been ground to
powder with various
work and bother, and could
only keep along with these
letters which must be
written & could not be put
off longer. and their number
is legion. But I have
thought much of you, &
do not feel easy in my
mind when I neglect you.

Mr. G. and I will be off this
week for the country, 3 or 4 weeks
of recreation which we both need,
- all I get the year thro'.
My dates from you are
April 20, 26, May 5, & 12.
The small box by bark
Gasco to N.Y. is here, safe
& dry.

The plants of your large
collection were taken care of
as well as possible, and I hope
you will find that the greater
part are in some tolerable
condition. (The fortunately
in my promptness, I paid
the freight to the consignees
of the vessel before the
cases were delivered (I won't
do so again!), and it
was an English vessel -
nobody here responsible -
- no easy thing to attach & send

the vessel, &c.

I have advanced sheets
of the rest of Polyptotae
of Bentl. & Hook. Gen. Pl.
You will be astonished to see
how they have slung round
Gussak's determinations of
Melastomaceae, right and left.

It is odd you did not find
Gussak's letter, enclosed
in one of mine last March.
It has not turned up here -
I must have put it in,
and you may have left it
in the envelope. It was
full of apologies for his silence
etc. etc.

Here is another
one for you from him.
I sent you Curtis's letter
about Fungus. Did I send
you - or have I mislaid -
keeping it for you - a
perfectly immense list of

Can't write today.
Dec. 11th

We got home yesterday
evening & Mr. Gray is
sick with dysentery.

I am better from
off Benson, & the 2.
was found to be at
the West.

When I am
at home here for you.

Come on when
you like & see us
& give the map?

Primer is now here
& occupies the same
at Gardner's house.

the bitaminal prophet
character.

And now there is
a bed for you in
the house & in a
few weeks, when Mrs
has to go back - you
can have that room.

If you prefer it
I can say that
Mrs. Driver will take
you in.

I will enquire.

It might be best
if you are to pass
the winter here
& put in to St. Cath.

Just say
you will if
going back.

I have hurried
in vain yet for
an aid to you -
who may be your
substitute in Cuba.

Letters from me
to you are in Cuba.

Respectfully

Ever

A. Gray

New, Sept. 22, 1868

Dear Miguel. You will get
news of us through Maria.

I have just begun to work to-day.
Up in London I made Stan-
bury's acquaintance, and found
him a very pleasant, obliging
youngish person. Asking after
you, I told him ^{he} ~~you~~ had best
write to you, and permitted he
has. Parker has only now
got back from Scotland. To-morrow
I shall give him your letter.
- have talked with him about
you. He says your sons & -
dc. are coming up finely.

Col. (now Gen.) Munro is
living at Aldershot, is ~~expected~~
up from there. But I shall not
write, but write to him about
your Cuban Grasses. Perhaps I
can make him realize them
before taking them home.

Oliver - in charge of the ~~London~~ ^{London}, is very
kind. Ever yours A. L.

Mr. [illegible]

I have been thinking of you very much lately, and
 wondering how you are getting on. I hope you are
 well and happy. I have been very busy lately, but
 I have managed to find some time to write to you.
 I have been thinking of you very much lately, and
 wondering how you are getting on. I hope you are
 well and happy. I have been very busy lately, but
 I have managed to find some time to write to you.

I am a little disappointed
 that you are so late. I have
 been thinking of you a great deal.
 I have written to you many
 times of the various matters of
 business I am attending to, but
 you have not answered me. I am
 sure you will be very glad to hear
 from me. I am very well and
 hope you are the same. I am
 ever your affectionate friend,
 J. W. W.

Feb. 20, 1880

Dear Mr. [illegible]

I have a long letter to
write to you today.
I have thought of you
very much for some time.

I have been thinking of
you very much lately.

I have been thinking of
you very much lately.

I have been thinking of
you very much lately.

I have been thinking of
you very much lately.

I have been thinking of
you very much lately.

I have been thinking of
you very much lately.

I have been thinking of
you very much lately.

I am very glad to hear
that you are well and
hope you are in London
soon. I am very glad to hear
that you are well and
hope you are in London
soon. I am very glad to hear
that you are well and
hope you are in London
soon.

I am very glad to hear
that you are well and
hope you are in London
soon. I am very glad to hear
that you are well and
hope you are in London
soon. I am very glad to hear
that you are well and
hope you are in London
soon.

I am very glad to hear
that you are well and
hope you are in London
soon. I am very glad to hear
that you are well and
hope you are in London
soon. I am very glad to hear
that you are well and
hope you are in London
soon.

I am very glad to hear
that you are well and
hope you are in London
soon. I am very glad to hear
that you are well and
hope you are in London
soon. I am very glad to hear
that you are well and
hope you are in London
soon.

I have, I have been
working at home.

My boy is in poor
health is very weak,
but he is getting well &
he is better than he was.
I am sure it will be

What is to be done with
Hannah? She has been
the subject of much
discussion here.

Working at home

Herbivorous Coal, all right.
cellar - doors - all
wise & right of you. If
in time get Prescott & hitting
the blacksmiths to file off
the doors & make them shut
tight & yet open when wanted.
Name to pay for the labor
now.

You do not
rejoice now the Greenman
& the Green Man get on -
Name thought he should not
go South, yet I guess he will
& send pity. I wish you were
to stay.

I have now written to Name
telling him all about Mrs. Gray
- what a good voyage we had.

1. Little sick improved
about 100 lbs. lost.

Thank you for your letter.
Who did not mean to tell
you all this. I only
told you not to tell him.
I am sure you will see
the sense in your head.

We are now at home
broken up in little
establishment.

Good Bye. With a
12 cent stamp to cover
of postage for the letter.
I am sure you

are writing to Horner about
in a thin paper letter to me,
which he will forward, & I will
send it to the editor.

Greenman has
sent it to the editor.
Name, I am sure

18
I am very glad to hear
you are well & hope you
are all the same. I am
well & hope you are all the
same. I am very glad to hear
you are well & hope you
are all the same. I am
well & hope you are all the
same.

[illegible]

10 to 12 miles, the first of which
 was from the station to the
 lake. They were better, and the
 Mr. Lott, I fear, than I
 could hope of. He was the
 better of the two. If he could do
 the better next spring, I think
 he would wish to arrange
 with you to make a trip to
 the garden in the morning,
 one of the best of the world
 would be sure to be the people
 who would be the best of the world
 that. So we are one of
 so well for the garden to
 as you could, and I should
 feel quite relieved, in having
 the garden prepared to do so.

The

The first of these is the fact that the
 Government has been unable to secure
 the necessary funds to carry out its
 policy of non-interference. This is
 due to the fact that the Government
 has been unable to secure the necessary
 funds to carry out its policy of non-
 interference. This is due to the fact
 that the Government has been unable
 to secure the necessary funds to carry
 out its policy of non-interference.

I have been thinking of you very much
 since you left home. I hope you are
 well and happy. I am well and
 hope to hear from you soon. I
 am your affectionate friend,
 Mrs. J. W. Smith

[illegible]

Dear Sir, you have
 gone on with it before
 then, and if the fellow
 has not let it alone, then
 we are to be blamed for the
 fault. I am sure I shall
 be able to do it. I am the
 best of the world.

W. O. Wood, Jr. 1870. 125 Jan 13/87

so tonight. Thank you heartily
for long letter of Nov. 13. I am here
learning some nautical botany, as
you know what you have a little
Duke, n. a. Johnsonville, Ind. &

[illegible]

See that you be your S^r Prof. Wilson have
all the rest of the work on the 1st of June
had a great deal of the work on the 1st of June
in the 1st of June, i.e. from 1st of June to 1st of June
If the 1st of June, I have recommended that you
should remain to the 1st of June, i.e. from 1st of June to 1st of June
work, 2nd of June, 3rd of June, 4th of June, 5th of June, 6th of June, 7th of June, 8th of June, 9th of June, 10th of June, 11th of June, 12th of June, 13th of June, 14th of June, 15th of June, 16th of April, 9th of April, 10th of April, 11th of April, 12th of April, 13

rest in, a Mrs. Scott to scrub when needed,
the best man has been left to get
dishes & untidy. Please take in hand, ask
Miss over & Mrs. Whitney's servant, as
to getting better, or some one to sweep regu-
larly, let no dirty work that can be
helped - done in the large parlour room.
Keep cool water, best from the fire from
cylinder, &c. Spare no expense and
pain to get down dust & dirt. As to
money I advanced to Mann from the
Herbarium fund a good sum; and more
can be had from the fund when needed.
The Mann's little head and to run the bot-
anic garden, and when using the Treasuries, let
me know if you or the B. M. want all you can
get to gluing, if better is to be had, has
all that is laid out glued up. Also, if you
choose to buy out the Cuban plants you
want, we will have them glued also.
The gluing must stop till
next week. I hope Prof. Nat. Hist. Socy
and especially that Mrs. Duggell for Blue
jeal will buy all sets of the Cuban plants.
Don't despise any. Sale will come as
early as the Cuban flora is ready, as you can
write; but we will do all we can to
cheer.

A. C. Thompson in herbarium,
look out according to your judgment, - this
occasionally by leaving open doors of cabinet
when a good fire is on, or a dry day out.
The N. corner of the herbarium is the best place
that Thompson gathers in, except the shelves
next the floor. Well, for the best you can,
you may. Mrs. Lane has been having a
hard time, rather discouraging, but I hope the
week will bring her. The herbarium is
done.

January 21, 1891. J. W. C. L.

My dear Mr. ...
... to you from the ...
The ... to ... to you some fresh
sides of Sycamores, ... common, to
... Sycamores ... not ...
They were gathered at the 1st Cataracts of the
... at ... or between it &
I have ... in ... like to
... in ...
Cuba, where I wish to ... them
to have ... the rest, but ... in an
try to raise ... that we may have an
in the conservatory; I shall ... along
with ... things, ... the ...
Palm, ... which branches
as ... That & Date Palm
are the principal trees here. Besides there
is Acacia histrica (the ...) an one
or two other Acacias an an occasional
Sycamore. Palm a ... was
not uncommon, an ... the ...
Acacia (or Hibiscus) ... with it,
... that ... large leaflets. But
none in ... Up here the cultivable
valley of the ... is just the slope of the

... has been 76° the night ... to 60° ...

20. - just now & comfortable if you keep out
of the sun, which, tho. summer by not hot has
an oppressive effect - never more at home.
Our boats are ready for the start, &
pushing us up the river steadily. About
60 miles more or more to go, is the
Cataract, and our limit. Then we turn
our faces up, again, and descend making
our principal stop by the way. So then
for, we have left only little or nothing
taking only such lightening as can
in our way or took us little out of it.
But we have had a glance at several of
the greatest things, ~~there~~ ^{there} ~~there~~ ^{there}
Summit the great rock temple of
this region, and the main thing to go
up into Arabia for, we hope to reach
tomorrow or day after. We should
have been there now, but were delayed
at Aravan by long negotiations, before we
could get past up the Cataract, and after
ward lost 48 hours by breaking of the rads-
der of our layer boat, & had to send back
to Aravan (I mean, for our red deer,
goat and a Caribou). No letters till
we got back to Shes (I mean - some
weeks hence. Then I trust there is
something from you. Mrs. Gray has
been gaining moderate, is now back
again. I hope only temporarily - but
it is not encouraging. Ever yours
S. Gray

Lucas Shutes Feb. 19, 1869.
Dear Wright.

Just back here - a long
time as my pen lingers I have
been from you & to you - of 100.
23^d with little P.S. of 24th at
White Hall. I wonder you
had not got letters from me
asking you to stay & take
charge of things. You, being
as my friend C. has promised
you getting me enclosed to
Dr. Beal & to Mr. X (my
which I have heard has arrived).
Please take hold & help me, as
well as you can. My letters
have iterated my desire for
this. I shall write soon.
Mr. Crook rather better, but
not strong. Please run

that choice is all better
that can for me.
I know any that need it.
see my, I am only what
is really useful

In great haste
Ever

J. C.
H. C. W.

To hear of us, call on
C. W. Living, or
P. J. Jackson, in
Boston. Both you know
will be pleased to see you.

always had free, from now. And now
that you are in charge of the garden, that is
your official residence. As to Gussone's
taxes, the explanation is easy. That comes from
G. taking lodges, - renting the upper part of
the house to Mrs. Jenkins. When the
address, from which they come from &
tax the house - which they could not other-
wise do. Initially the taxes eat up a good
part of Gussone's profits. And now that
you are to have quarters permanently in the
house, he should end her occupation. He
needs himself more room in the house, & must
have, at least a parlor. Instead, therefore, of
putting up a closet in the room you occupy,
take the room over it (that has a closet),
& let G. have the lower for a parlor. The
change should be made this spring, before the Alex-
andros can move. Then please announce to
them that the house is used only for the
start-up, of which you are the curator.
Hope the rooms not wanted by G. & you directly
can be used to lodge any one who works in
the garden, - such as Pfeffer, - Let Miss
Jenkins understand that this cover is now
necessary, and that my directions about it are
positive. If any hesitation or delay occurs, please
report at once to me.

As to your duties, please consider that a
good part, and one I want you permanently to fill,
relates to the Garden, which is always my greatest
anxiety, & which wants a botanical worker contin-
ually. Of course, leave all responsibility & ordering of
aids to gardeners; but give advice, and see as to
botanical things, what repairs &c. are to be made, &c.

As to the garden I am not anxious to press.
on the gluing - business very much. Finish the
laying out of the Botanica plants now they are in
hand. I thought that a large part had been
laid out before I went. There are lots of duplicates

Between Gussone & ... (2)

It is rather rapidly, after a bit of
Western work, and expect to be tomorrow at
Assiout or Siout, and a few days later
at Minia, where we expect to be the 1st
letters. I may as well begin a letter
to you, Mr. ... it will be
reach Cairo. My last to you was mailed at
Thebes. We worked hard during our 8 days at
Thebes, where this is much to do; and on
our way down yesterday revisited Abydos
a brief journey, especially for the ladies (who
all but Miss G. and one other went yesterday).
But is well worth it, - a splendid place, one of
the age of the father of the Great Ramesses,
recently cleared out and made accessible.
The principal things left are some traces of
old Memphis, the pyramids, and from Cairo
to see the traces of Skelipolis (Or). We shall flee
into Italy, as soon as we can. The winter, in which
we have seen no frost (except autumnal in England)
is over, Italy where the early spring may or may not
be serious, may keep us till warm weather is assured,
but how the time will then be divided between
Germany, Switzerland, & England, with a bit more of
France, I cannot now say at all. As soon as
hear that you are going to stay by sea, and to be
care of things at least till I return & after that get on
more look into Cuba if you like. I shall be enter-
ted, and not at trouble myself, till autumn.
I must be back then; but, if I can, it is very desirable
I should not quit Europe - for the rest of the winter - till late
autumn. Whether I can stay till then depends
upon 2 or 3 things, respecting which I am

be thank you attention and
1. I am here & all goes on well & I
have time, or whether there is any reason for me
to be at home, or otherwise.

2. See Prof. J. Wyman, and ask him if he
will take the Junior Class the 1st half, instead of
the latter half of that term (as usual). I am
an order answer to this: because, if he will do
that, the way will be clear for me, as far as I
know, to delay my arrival home till about Thanksgiving.
While, if he cannot do this, I do not
see that I must be back to take the class
earlier in September, unless Brown will come to my relief.
[I hear Wyman is off for Florida. Ask him as soon as he
can to see to Prof. Whitney & Mat, in the
latter case I should want the house at the
expiration of the year (i.e. Sept. 1.); but in the
former they could keep it, if they wish, 3 months
longer. [I think you may pretty safely offer the
house till end of Nov. For I mean to try to stay abroad
till then.]

4. Please do a little correspondence for me: then
1. Send a line to Bolander at San Francisco. Say I
have his letter of Nov. 7, and thank him. I will receive from
him news, whatever he may send me, if I meet him at
Geneva, and will hand it to Dr. Hooker. That it will be
easy for him to send direct to Hooker. I hope to write to
Bolander when I get as near to him as Europe, or N. Europe.
1. W. M. Carby, Wilmington, Delaware, sent me a very
pleasant & welcome letter, dated Dec. 29, which reached
me at Naples. Please give him news of me & Mrs. Gray,
and our best thanks. I do begin to think that Mrs. G's
health is really improving, - as to strength, I cannot say
so much.

1. Prof. Brown. Thank him for his of Nov. 23. - Very nice
letter. Ask him if, in case Wyman cannot take
the class from Sept. to Nov. he will come & take it
for me, hear recitations 2 or 3 times a week in Bot. Sect.
Park, or Lesson, if he pleases. That would give
me some precious time in England. Say to him that
letter to Newman & Berlin shall be presented.

Wyman is mixing - head for him - as many as
I can well bring.

Please drop a line to Prof. Dana, at New
Haven, to say that, Prof. Von Martius being
dead, the copy of Journal sent to him (by
Direct from publishers since I left home)
should now be discontinued.

I will ask you also to give my thanks to
Mrs. Mann for her letter of Dec. 17. I can
not write to her directly just now, - nor is there
anything to say, except to render her sense of
loss in the death of Horace, a sense that I
soon to feel more than ever. I must not
impose upon her the trouble of answering
certain inquiries made by correspondents
whose letters she sends on to me. So far as
these really need answers I will put them upon
you, or else enclose my replies, for you to
forward. - The enclosed note to Mr. Otway,
and one to Dr. Hunter are all I have to trouble
you with.

Cairo, March 12. I have
to go to Cairo again. - and no good op-
portunity of posting letters till now. We are
all pretty well. I stout & hearty. Mrs.
Ls. still very delicate and liable to upsets. In
a week we expect to be embarking at
Alexandria for Italy. Now to reply to yours
of 29th to 30. Dec. - 20.

There is no money to pay you except what
comes direct out of the fund. [unless a little balance
from the fund should be left over, available
to that purpose]. So I trust you will find
500 pounds, with room & fuel free, enough to
get on with for the present. But you can take
just as much time as you can for to work at
Caban Florida.

As to room - rent, Guerinian knows per-
fectly well that I have always retained
one room in that house for my use,
so he can't charge you room - rent. That you

the class this term - so is now at it.
In the loose way things lie, I could not
give more than "indications" as to what I
could ask of you in helping on the in-
struction of classes. But, in whatever way
you together see that you ~~can~~ can
help in the analysis-business (which I
make much of) please do - whether at college
lectures - or at Boston - probably under
the latter. It lasts only from May 1, to
late in June.

So you are printing "Rev. J. L. Cutler." &
in Havana. I hope resolution won't stop you.
Ask Guineau when the money is to come from
to buy Wright's place.

Tell Hendley where I am, & that I send
his photograph, - and to give it to D.B. in July.

"Bingham very sick". Oh, dear - what
next.

Mrs. Gray sends her best
regards. Give news of us to the
Lynch's & all engaging friends.

Ever Yours cordially,
J. L. Cutler

(2)
I don't want them any more. Next see to
the Cuban plants. Get them all in, &
named according to your views. But ~~leave~~
things already laid out to glue them, & then
put into their proper places, at least
into the herbaria-places of the family or large
green. But the general accumulation of
collections, lying in bundles, I wish to remain so
till I return, when I shall have to put into
practicable form. I have about them.
Probably I shall bring or send a great many
new bundles - among which will be numerous
replicates.

I think you have just a little dusty work
done in the large herbarium room as yet.
As a rule all distributing & the like I do in
the side rooms - the large room to be kept free
from piles (except of glued sheets) bundles, &c.,
and perfectly clean & dusted. Now Betty, or if
you please Mrs. Guineau, or some one to see
to this, Mrs. Lovett or some one to scrub, when
needed, - in fine no dust, or dirt must ~~be~~
be made, & none remain in that room,
and none remain on the premises. There
is money enough to use for this, and all
herbarium purposes. I placed in Mann's
hands an advance of \$150 toward defraying
all these ~~other~~ expenses, freight, postage, &c., &
How much of that remains, Mann's account
shall show you, & the balance shall be
in our hands. If it is not so, please to
speak to my brother-in-law, C. W. Loring,
about it. When that is used up, the
Treasury will either advance some more
or will pay as fast as - like an order of
a copy of your account from the book you
keep. See at once to all repairs, so that
nothing remain out of repair for a day, &
your own sake.

As to the library, your remarks are wholly sensible, and we can carry them out, but not, I suppose, till I return. Because a considerable number of the books will have to go back to my own study, when that is vacated. So we get them at present into such order that you know where a thing is.

Mamma wants to re-arrange them. I told her to do as she thought best. That perhaps was not what we should think best, I find. Mr. D. did not live to do what he intended. There is a Catalogue of the books, & pamphlets, you know, on loose sheets. The place of each, i.e. shelf & row could be marked in pencil on this catalogue. All new books, as fast as they come in should be entered into this Catalogue.

In Berlin you can at leisure, look over fairly often, & put the ~~things~~ plants in place - put in additional genera covers, of which very many are needed. It is bad to have them too full.

Every plant laid out for gluing to be provided for. Two gallons of alcohol came in just before I left. Cornsive & Co. Linotype Press in Boston, - one of them corner of Washington & Bedford St. will sell it cheapest - tell them it is for me. I ask for Mr. Marshole, & give him news of me.

Tell Guinevere to give flowers to Dr. Peabody - the acting President, whenever they are likely to be wanted, - especially upon class. Day Communion St. & to take some directly to Mrs. Peabody, with Mr. Viles, Grays kind regards - some sweet ones. Never let them pay for any thing of the kind.

The Cuban Fungi, I think you had arranged according to Peabody's Cat.

at once. Keep a set for us, a full one. Make out as full one as possible for her, - copy names on a printed form of ticket. Send that to her, in the regular way, and I will see that Stokes or I pays for it. Any duplicate set over, if you please to send with the other to her, will find a place when I get them in the latter part of summer.

Tell Polander what Times ask about Calif. plants, & let him reply. Give a number of copies of the Times to him to send me through Dr. Stokes.

Leave special Director to Anderson of stock at present.

If Hille is still in Cambridge, she has the preparation of all these as given, & has been to do it. If she fails, do as you like.

The key from Mrs. Mann for which there is no lock, I presume is the key to my second ~~cup~~ ~~close~~ cases in my study, filled with our things. Keep it carefully, and with it also the keys which Lizzie, the maid in the house, is directed to give you. Among them is the key to "the corner closet S.E. up stairs", which contains a valuable paper, &c. &c. to be very carefully guarded. In case of fire - which Heaven forbid - the contents of this closet (except a few bottles on first floor) all to be saved.

Mamma was to have paid the little bill for the clock-cleaning. Pay & charge to my account. Mr. Loring, when he pays you, each month if you please, will include all things you pay out on my private account.

Brigham, I understand, will take

London, April 21, 1869
My dear Wright,

We have been in Rome a week, but Mrs. Gray is well all the time. Nothing from you for a long while.

A letter from Dr. Engelmann, just received, says there is at present in the office 4 parcels of dried plants, which have been sent by Smithsonian, - have lost all address - a common wrapper probably torn off, and so they wait a claimant.

Engelmann is examining for them carefully.

1 package Wright Certain plants

1 - plants named by me
1 - Eaton & Scribner

1 - name not remembered

These must have been sent out by me, but to whom? and when? I do not remember any one who has complained of not receiving. Do you know? And will you ask Prof. Hillebrand?

look up records I see, let
me know, so that I can
say about them in summer
(August 1) when in Paris.

I was in a very good
position to get a number
of them, and I have
immediately sent them to you
by mail, rather than by parcel.

He had been with me at the
time of the shipping, and was
then in that state of mind, a
few days after the war, so
he will write me some, but
let nothing be left out, as
for that matter, I have no doubt
and I am sure are kept up
they are apt to get confused
in my memory, - so that we
are often mistaken.

The last number so written
and I had seen that a
man had written, etc., but in
all cases I have been
very careful.

Yours
J. H. M.

Munich, June 8th, 1869

My Dear Wright

It is long since you have heard from me. This is partly because I had nothing from you for a very long time. And that is because yours of Feb. 12th was sent (enclosed in a letter from Horner) to Egypt, too late to reach us there - so back to England & then to Vienna, whence I have received it here, along with your later dates of March 23^d to April 8th.

It is likely there may be later letters from you at Horner's now. But Horner is in Russia, and I suppose Oliver is not clear where to send to till I inform him.

At present, my next point for letters will be Geneva. But the least trouble for you and the easiest way for me to get your letters quickly & surely will be for you to enclose in an envelope to C. W. Loring, Pemberton Square, Boston, - who will enclose them in the weekly despatches to us.

It is puzzling & distracting work, this travelling, with a pair of nice young ladies, sharp for sight-seeing, and a feeble wife, who can do little, and a lot of business & gardeners &c. you want to see on your own hook. So you will excuse all curtness in letters. As I am speaking of Mrs. Gray, I may say, she holds on about the same, with ups & downs, but always feeble. Any news you get from

981¹/₂ Mrs. Minn.

[illegible]

you, which Lizzy will like to know -
Please communicate to her, - You see her
sometimes, I presume. She will come to you
at Boston, if you send for her. -
In your next. Please tell me, from
the York, what the Garden accounts come
to, month by month, from Sept. 1868, incl-
sive.

about postage - why of course, you should charge to Haberman all stamps you have to use on all other occasions. Please letters freely, even if they do not send stamps to paper, when the enquiry is a polite & proper one. When people ask for a College Catalogue, just leave the request at the University of Stanford Office - ^(Stanford's assistant) where Mr. Dyer will attend to it, without any trouble or expense to us. -

Charles for dried packages of seed plants
to put in for these plants in the garden.

Some fresh cheese to the barman.
Alkohol, there was a good stock of
when I left, either in a tin can, in the
herbarium cellar. And some besides, I
think, in bottles or jars, in the cupboard
under the sink with pump, in corner of
Whitneys study. Look there. The corrosive
sublimiate was turned over to Mann. Buy
more. My place to get all made things at
Brown's corner of Washington & Bedford St.
Boston; where Markoe is a partner & a
friend & mine for a long time. One a little bit
in as much corrosive sublimiate as will

never then reduce with 1/2 min alcohol.
Once or twice you can press at it near enough see it
needs is not to be a set braced solution
the intermedium is not a good one

in Egypt. They will gladly give a tumbler in a
best from Egypt. Glad you have some glasses. Keep

well. Please see how near and then and give
him. I will write them when I

can. but that is not easy now. is to keep the

about dust, the great the way I could not

shut it. I am a good out side

to hear the furnace. Like the

as is done in Germany. I am a good

herbim, swift and direct. I am a good

to keep it very nice. I am a good

After trying or.

See it.

Colman's was to

when I

is to keep the

I could not

out side

Like the

I am a good

find wanting. You do not need
leave from me to do all that.

Only use your judgment and
do whatever you think is best
to be done for the herbary, in
all respects. You, on the spot, can
judge best. All summer, I think
the garden will require a good
deal of attention from you.
Guineas need direction and
advice, as to many matters. —
For example, about covering or
filling the ditch along the Bay-
ward side of garden. At
times there is a great amount of
water comes down there. A filled
stone or rubble drain would not
carry it off. A brick drain large
enough to serve would cost a deal,
I fear. Anything of attention
& much expense, what is at all
doubtful to you, is best postponed.

About Miss Luskens, it is
very well, under the circumstances,
for you not to press any decision
this summer. — though that in-
volves Guineas paying taxes

find yourself, for I am not
leave from me to be so
only we your judgment
or what you think is best
to be done for the Institution, in
all respects. I am, as the effort, can
single best. All summer I think
the London will require a good
deal of attention from you,
your nearest friends, relatives and
others, as to how you can
for example, about covering or
filling the holes along the
ground the side of London. At
times there is a great amount of
water come down then. It fills
down a certain drain would not
it. It is high drain
enough to raise would not a deal,
lighting of electricity
is to be
Crompton to you, is best for
it is, it is, it is, it is
very well, under the circumstances,
wish you out to keep very busy
this summer - though that we
also business in London

on the house - which I wish to
stop. I am considering Green-
means comfort and convenience
in what I have directed -
It was all very full, as long
as G. had no child here, to spare
a part of the house, - but at
first it was never intended
that Miss J. should fill all
the chambers. But now
that he has a family in-
creasing, Miss G. must have
rooms - must not live merely
in kitchen - must needs have
a parlor - while you, for the
garden's sake, must have a
local habitation, and that
must be upstairs, so that they have parlor.
I think G. will see the
propriety and necessity of all
this, - and, with all kindness to
Miss J. will arrange for a
change in the course of the sum-
mer. If Miss G. is not satis-
fied with this view, let me
know. It seems to me so clear
clear as to what is best, that it is not

[illegible][illegible]

Can't you send it to ~~Kew~~ Kew, against
my arrival there, along with any other
plants you want critically compared.
At the least, it can be sent thro',
the bookeller, Tickner & Field, near
Field's Oxford St., who send about
20th of every month.

Please to pay Westerman's small
bills & charge to Garden Museum,
- paying the bills. Say to Westerman
that we have no funds of Botanic
in hand, and therefore will defer paying
his bill. Send Westerman's bill to him
(San Francisco, Cal. for.); he will see to
it.

There was a package or box of
dried plants from Hance, which should
have come, by supply ship, last
July. Did it come, I am, I think?

I have given Fries one of my
sheets of *Grass* *genuiculatus*, if useful,
but there are specimens in a package
of *Conium* Mt. plant, coll. by Silliman &
Gray, & sent me by S. last summer. I
rather think you got hold of this parcel.

If Seemann's Manual was a day
plate, or numbers (a plate might be
be given small) & given in a later vol.
let me know in August, when I expect
to get back to England.

Middle send lots of Australian plants
over & over. I'm all up and have to a

future day, - where we will collect
and get out a clear set for Herbert.
Dispose the seeds from Muller as
widely as you can, to any one who
will take them.

I long to be at home again - expect
to be some time in autumn.

Boscher is likely enough to be with
you now. Tell him I wish to visit to
him whenever I can - uncertain when.
But tell him, or if not then write
him please - the substance of the following
about Martius. - Oh, I will post
it on the other side leaf, & you can
tear it off, & send to Bremer.

We have been at Naples, Rome, Florence,
Lisbon, Ostia, Padua, Venice, thence to Milan,
the Italian lakes (very beautiful), thence to
Verona, & by Brenner road to Innsbruck
& Munich - where we have 4 days, &
left to-day. This is written from
Augsburg. Mrs. Gray is only 50-55,
- about same - gains little strength.
Reminds us to Bremer. Mrs. Gray
sends her regards to you. Ever your
Missionary Herald - I have paid for
on ahead, I think, send him and
as much as you please.

Mrs. Gray's remembrances to Mrs. Freeman
& Lizzie - I should be glad of any news from Lizzie.
About none, &c. And hopes all go well.

At Munich, we saw, of course, much
of Madame de Martius - a sweet, good
soul, deeply grieved by the loss of her
husband, and yet bears up bravely.
And we learned many interesting things
about her husband. Notices of Martius'
papers were ~~posted~~ sent, as usual, to all
friends (ours to Egypt), among them to
Dr. Bremer and to the Clarks. I have
now learned from Madame Martius, that
~~no notice has~~ with her, nor her son
at Berlin, have received any line or word
in return from America. They suppose
the notification may have failed to
reach any of the three. Let they must in
the days have heard. I see that Madame
de feels keenly anything like neglect,
and I trust that Bremer will write to
her, and also convey the substance of
this to Dr. J. Edwards Clark - whose address
I do not know (he ought to consider him-
self under obligation to the Martius family)
and also to H. J. Clark.

The youngest daughter I saw, but
she has sick child now. The 2 others
are away, at Karlsruhe. Emma is
quite well. I have corresponded with
Caroline.

Nuremberg is a queer old place, indeed.
(11th - 12th) we have had nearly 24 hours here
and go on the way to Dresden to-day.

So Rothrock is named & Mr.
Tell the people at Salem
that I am sorry I can
not be with them at the
meeting

I shall not go near to
Litch, but I will write
to him seriously. Just
mention it again, in
your next - which may
be sent to Dr. Hooker at
Kew.

~~Yes~~, Yes, I would
send extra sets of Fungi
with those Kew. I can
probably dispose of 1 or 2.
Also Grams to Col.
Monro - our General

Also any Cotton plants
which you think Oliver

Interlaken, Switzerland

July 26. 1869

My dear Wright,

Your kind
favor of June 1. - 27.
has just reached me here
Glad to find everything is
going on so well, also that
you take so much interest
in the Garden. - which is
just what I wish. If
you & Greiner are - who
appear to be getting on
very nicely together - can
go on and take the main
care of it off my mind, it
will leave me opportunity to
think of and do other things.
Glad Greiner is near -
as I thought he might,
that he must have seen

and furniture, and live more
like people, as his family
increases and acquaintance
extends. He has reaped
his little harvest already,
from lodgers, and I have
some reason to think that
G. has laid up something
all the while in savings
bank. - as he ought.

I raised Grenier's wages
a year ago. But then
and when he came I
suppose prices average
higher than now of
almost all he has to buy.

I do not say to you
that I cannot at some
future time raise his
pay. But it is my very
clear duty to hold out no

intimation whatever that
I can do so. When
we come to or towards a
specie basis - as we
shall soon at this rate,
money is going to be ~~scarce~~
scarce and prices much
lower.

The garden account
looks very satisfactory.
But there is the coal
last fall - that usually
comes in - & this probably
the Steward from our friend
must be counted.

I like much that you
look about the grounds
early and late. And please
notice everything out of
order. I have all kept to

and kind regards - Remember
her & our kindest to Lizzie
Stuart in the house. - &
to the Quakers, with
our congratulations on
the birth of a daughter.

Ever Yours

March 28, 1848

Mrs. Gray asks if you have
received from Lizzie the ^{box} bundle
of keys. If Prof. Whitney
keeps the house till we come
home in Nov., all the better, as we
need the rent. But when he
leaves we should be glad to have
you lodge in it - in the blue
chamber. Mrs. G. offers to have
Lizzie stay in it, if she wishes
but does not want to have to
pay her wages, except it were
a matter of 2 or 3 weeks. We
shall see as to all this when we
know about Prof. Whitney's move-
ments and wishes. Enclosed please
give to Lizzie. Good night.
A. G.

or - can solve any
quiddity about, i.e. -
any distinctly predicated
quiddity.

If you see Mrs. Whitney
- Whitney has just written
July 3rd to say that
they like to keep the
house to Oct. or even
most of Nov. If they

do want to keep it on,
of course we shall be
glad every way.

We have had our time
of study (short) and of play
in Australia, and are now
soon to be in Paris for a
fortnight (any quiddity
for you there?), and then
to Ken - the only place to which

As to Hance - his former
letter (received before I left
home) told me of his
sending a valuable box
of plants by the ^{U.S.} Store
Ship Supply - in care
of the Captain, who
was to deliver personally
to me at Cambridge.

Captain's name I
do not remember it
was in the letter. I en-
close his last.

Perhaps you can find
out from Com. Rodgers
at the Navy Yard - when
the Supply got in to his

Station (Charles or)
- who the Captain
was, & write to him.
- or where the ~~the~~ box
of specimens is -
perhaps at Store-house
at Charleston Navy Yard.

A few letters or verbal
enquiries may bring it
to light.

I must hold up here
for to-day - will write
you from Paris - where
I will see about those
papers.

Mrs. May is really
better for Gross's
and work, & sends her
best love to you.

can, - also any other plants in last
ed. of the Manual, and not in the preceding.
Godet has supplied our herbarium
with almost all the plants of the
Jura flora, and will send the rest,
- all critically named.

Thank Greene for his letter of
14th July - but I mean to write to
him. He should have a letter from
me. I have had only one day here,
Saturday, & have not been to the Jardin
des Plantes yet, nor seen any one here.
Mrs. Gray continues to mend. I
hope she will lose nothing ma-
terial from the heat of Paris - which
we shall have to endure a fortnight
- not very bad now; but it is not
Swiss air.

I want to make out a sort of
list of all European plants not in
our herbarium - copies of which I can
supply to European friends, who
promise to supply them. We must
contrive some way of doing it.

Ever, dear Wright -

Yours sincerely, Asa Gray

Have told Jessie Alcock I got her letter of July 15th
1869. I had not since July 26th letter.

Paris, Aug. 1, 1869
Dear Wright

I have only just despatched
a letter to you. On arriving here
I got your favor of June 30 - July
15 - with all the details of Maying and
the usual meteorology. Thanks - Mrs.
Gray says she much enjoys your
letters; they take her right back to
her home.

- Tell Treadwell that I can't find
time to write him now - but expect to
see him before long, and to resume our
amicable squabbles.

Mowing grass & hanks - all right.
My objection was only to mowing ma-
nure, and to mowing native botani-
cal plants, - to which manure is un-
natural. That liquid manure I
have always much relied on.

How may as well check the Am-
erican Naturalist now to herbarium - to
which I will give all the back vols - &
please see that I do not have to
pay any increased price, on account of
delay.

I am glad you sleep in Casa grande -
always - when the Whitneys are
not on hand.

After this you will do better.

write to me direct - to care of Dr.
Hooker, Royal Gardens, Kew.

It will be full time to see now
about the coal.

Call at the Steward's office &
learn what the rate is, on the
College Contract, - and, after con-
fering with Guinness, order the
quantity needed for the Garden. -
Let the bill come to the garden, and
pay it in garden bills, - but not
till after August - so as to come
into next year.

Get also, and duly pay for, what
we need for herbarium.

And engage 10 tons furnace &
8 " range
for my house, but not to be
delivered till Prof Whitney leaves.
- so as to prevent all confusion.

I have been planning some
decided alteration in the treat-
ing of the Herbarium, so as to
get rid of that cloud of dust which
covers things so in the working
room of herbarium, and which, as
you say, even gets into the face

room or sanctum of herbarium itself.
Do you think that we can ~~be~~
extend it downwards, ~~so~~ into the
upper part of our great ash-pit,
- so as to charge it from the cellar,
and have no opening, except into
air chamber, above stairs. But your
mind to the problem, and when I
come home we will see if it can't
be done. I shall not be happy
without it.

Enclosed is a small list of desiderata
given me by my dear old
friend Godefr of Senechal - a
good part of which I have promised to
supply. Now a portion and even
most of them we are sure to find in
that herbarium of Sullivan - lately given
me, and which we laid away into the
under cupboard of the gallery on the
W. side (towards house) of the herbarium.
Some day soon please look up ~~at~~
& take out a specimen of each of
the list which you can find there.
Some of the most important I have
checked off = And then please
forward the list to Mr. Canby -
with explanations, and petition
for a supply of any of the rest.

these things. I do not want
to have pins & costs to pay.
I have had no advice of any
taxes, or notices of taxes.

I have worked hard here
almost one year and spent
my money.

Copy
the
your
letter
I have
nothing
to
write
back
to
you
at
present
I am
too
busy
to
do
so
I
will
write
you
as
soon
as
I
can
I
am
very
truly
yours
C. Wright

Cambridge Nov. Davis, Aug. 16, /69
My Dear Wright

My last from you - a week old -
is July 23'

As to Bolander's bill, I presume
that Bolander has written to Wes-
termann about it, as he did to you.

Of course I wish to pay any
bills of Bolander's which are
certified by him to be all correct.

There is some money which
Brisson is to pay me on Bolander's
account. Brisson was sick and away
when we were at Geneva; so I did
not see him; but he is to pay in England.

Tell Bolander this when you write to
him, as I suppose you do now & then.
He is a main stay of mine for Cali-
fornian plants - so I would never
neglect him.

I have just been buying a few
books for the Herbarium Library.

Did I tell you - no I have
not yet - that I found out
that those plants which Dr.
Engelmann found at Bonanza's
here - all loose & no address.

[Faint, mostly illegible handwritten text, likely bleed-through from the reverse side of the page.]

I have identified as being
one which I sent to M. de
Parasol of Macou, France.
2 years ago - of no great
account. The "Cuba" might
things are nearly about 100
or so of duplicates of your 2^d
Cuba collection. I have
sent them on to destination,
there got to-day notice of their
arrival, so that is done.

Tell Greiner that
Kerlot is away, in vacation,
at Grenoble. I have run
well over the living plants here
at the Jardin - the Hardy ones -
with Decaisne.

I want to ask what of
my U.S. tax-bill this year?
I would have been asked for. I
think, in the spring.

Now what about my State
& town tax-bill. - Probably now
presented. I should like this to
be shown to C. W. Living.
Please enquire with him about

London & Kew.

Aug 23, '41.

Dear Wright

I want to hear from
Dr. Francis Dana who
has charge of Library &c.
of American Academy - about
Academy's things. As he is
never strong and sometimes
unwell and has not responded
to my hint that he should
communicate with me, I
will ask you to hand this to him
and receive & send me the answer
needed - unless he prefers to
write to me direct - in which
case give him the address - i.e.
Royal Gardens, Kew, near London.

Yours

Has the Cambridge
Philosophical Society sent
any publications this year or

Mr. Charles Wright

I have just written to Dr. Gottsche
about the Skepdeia

Put an encl. for Wm. S. Sullivan
Columbus, Ohio in a thick
envelope & post to him.

Last P.S.

Here is a bill for Station, in the
note I have written. Please read it and see
what I mean - and envelope, & send with it a
P.O. money-order for \$5.25 to settle it. - and
see that, after date said Station comes to Cam-
bridge - for your reading if you care for
such. Avery

Or any letter, and if so what
contents?

Furnish me with a
statement of what of our
publications have been supplied
to Cambridge Phil. Society,
- & when & how.

The Secretary of the Society
wrote me last fall that he
found they had only some old
volumes of our memoirs, if I re-
collect aright.

If I am to take up this mat-
ter again, I shall want these
data to go upon.

Ask Dr. Dana, if any
thing has come to hand
from the Institute of
Venice

Ever Yrs,
A. M.

then pray Westminster may
have still been omitted when he
fell sick. If Bolander has a
receipt from Mann, it will be
for Bolander & Mann executors to
settle.

About coal. You probably
will have settled all about it before
this reaches you. But I have
never been able to do better than
to take my coal under the
College contract - tho. I do think
that the College Treasurer has
not done always so well as he
might. It may be so this year,
But under the new President, all
this will be well seen to, & I do
probably have been already.
Laurie has been following
me instructions, and at least
asked & reported to you or me
what the College arrangements
for the year are. I hope to hear
already soon.

Herbarium paper for Mrs. Mann.
I suppose we can supply it - under

invest, if she needs it. But Mann
took, at the time all he said &
wanted, and I do not wish to
spend with any man there is quite
necessary. I do not pay for it.
He can let what he will.
from Mann's bills - you can
from the lumberman account.

That your paper for her
will speak to Charles.

I have paid out a good deal
for herbarium. But - a collection
of specimens, and I have still
mine to pay out - and a long
account to settle before ^{after} I get them

As to Miss Luskins, I retain the
most decided opinion that she ought to
vacate - so that American or
family can have more room. With
more in family they ought not to have
more in such close quarters. And a
little more from you, please. I think
in Paris should be at home, can be
of this and even within the day it
will. But when the time I am
up, I see that the money has
the decision. Now, I am not sure

clude to stay, upon Mrs. G's
propositions. Even if she does
we hope you will sleep in the
house after the Whitneys' leave.
Ever Yours

A. Gray,

If there is anything coming
to you from Harker or Kew
Gardens, that is, - and you
want me to receive it, -
Please make out & send a
set of bill, which will be
Harker's voucher in his account,

A.B.

London. 10th Sept. 1869.

Dear Wright

We are back from visit
in S. & W. of England, and to-morrow
go down to Kew, to stay.
All letters to go to me there.
I write you very lately & have
nothing from you since.

Let me ask of you a favor.
Please give me an accurate
measurement of the room in the
house between my big study & the
entry - "the Library" as we call it, -
We want the dimensions of the
space which the carpet occupies -
i.e. within the painted border of the
floor. Also the dimensions
of my study. Of this please to

Draw a diagram, with the
ins and outs, pretty carefully,
jotting down the lengths of
all the lines. There is a new
material for carpet here, which
I like much, and may provide
here, if I find I can do it.

Mrs. G. has written to Lizzie;
can't afford to pay wages & all
living expenses too for 5-8 weeks.

If Lizzie goes, as perhaps
she will, - I must ask you
to transfer your bed-clothes
to chamber in our house
& sleep there. Get Betty or
some one to keep your room
in order, at my expense.

and please take care of Max.
I should like Guerinian to
supply the Doggie Diet, at
my expense.

Mr. Maritz, must have
been at Ken when we
were away, last week.

Your note of introduction
was sent up here from
Ken yesterday, - but no line
from him. I forgot to
ask after him when I
was at Ken for an hour
or so to-day. Enghnam
is there, for a week or two.

I hope Lizzie may con-

New, 16, Sept. 1869.

Dear Wright, Yours up to Sept. 3
received yesterday. It is not before me
now, being at "Hickory" - but I will
see if any thing to report to specially.
Tell them that all is going on well. Tell
Guinevere that I have written to I have
one of Oppenheimer about end of Portsmouth
Mrs. G. who has had some trouble -
back is nicely again. About the
desiderata for what that Jerry is to
furnish. You will have to nudge
him to get him to attend to it. -
We forgot to post yours.

Marian is not here. Oliver knows
not where now. - may be here soon,
when your Melastom. notes are to
be turned over to him.

I add over a mission to go to

Oliver & Work hand me their respective
tiny notes.

I hope your digestion is all right again.
Probably the package from Hance is in the room.
I thought it was a box. The "Mammals"
heads, are for Prof. Wyman, Museum of
- Archaeology.

Will your late distric. of Cebu plants
be to Straker? or the Fringe?

Metrical system.

As to coal for the Museum —
Of course the last I paid for was in
Jan 1868. Mann must have
ordered the rest, or I did before
I left. And Mann should have
paid for it. And you should have
paid for what you ordered & sent to
Hibernium. I suppose the

Steward of University has paid for it,
and had it charged to his account
on the Treasurer's book. Richardson
is sure to have been paid. I can
see about it all when I come home
meanwhile get coal enough to keep
yourself comfortable, if not enough for
the winter through.

I agree to your suggestions, mainly
about burials, spring, &c. —

But I thought the latter was always
nice, and doubt if the manure would
pay us for the time & cost of removal
& manufacture. I have no objection
to having it piled half full with
abundant earth — all to be taken out
as manure in spring. The symme-
try of the terraces I fear cannot be
preserved, but the banks could be raised,
along with another change, which may
come, & possibly earlier; but not yet. Ever A.B.

Royal Gardens, Kew, Oct 8. 1869.
My Dear Wright.

I believe I had not announced
your letter 7th Sept — and now I
have also of 15th & 23rd. —
Most of it will do to talk over
when we get home.

Mrs. Gray has been to Scotland.
I expect her back to-morrow (Sat-
urday) evening.

"Cambridge Philoponic Society"
That was all for Dr. Dana to see
about, not to bother you with.

I am glad the Garden suffered no
more than you say from the storm.

You might distribute the Ruggled
& Rogers Expedition Tanager to —
But I suppose one set should go
to the Smithsonian — for the heat.
That Parry now has care of; one
set here — would there be duplicates
after that? If so a set for Kew.

By the way Iarker told me to-
day that he supposed Oliver had
given me the money for your Cuban

Phenomena - which he thought
were exceedingly well worth the
price. I shall ask Oliver
about it, and he will give me
the money for you.

Your & Annina deserve much
credit for having managed the
Garden so well & economically.

Well, Mr. Greenman is sick of
Miss Jenkins again; so he has
been before, but when the time
came had rather she should stay.
She must see that we cannot
have her live there all her life.

I gave in for this winter to please
Greenman; but that must be
the limit.

Thanks for your plan of
the rooms. As to account
with Portland, it was all settled
you see, before I left - settled
with Mann. And this check of
Portland's on Wells & Fargo, of Oct. 1,
must of course have been received
by H. Mann. - whose estate must I
suppose settle for it.

Tell Greenman I could bring him
a lot of plants for greenhouse, & but
I know he will not have room for
them this winter; so I shall arrange
for tender things to be sent in spring.
Mrs. Gray will write to Lizzie as soon
as she gets home - may have written already
from Scotland. - Of course we
keep her.

What the Dickens is Mrs. Dickens
mean that he should have our
historical paper? If he uses
it he can't return it, and I
think can't match it. Let
him pay for it; but spare no
pence to any body, except Mrs. Mann,
and I do hope she will want no
more.

I have got scale
with French measures - and with
French inches compared with divisions
of meter. I have been trying
here in vain for what you & I
want; but I have from Oliver an
address that may serve. We shall
soon have these in America in
order to facilitate the introduction of the

Charlton House, New
Oct. 11, 1869.

My Dear Wright

My last from you is of Sept. 25, telling me of your buying the stock of Coal, and reaching me just after I had added a note to my last letter and sent it, asking you to buy coal for our house, and, if you could not do better to get it of Richardson. It needs no apology for your having taken the coal of Parker of the Port. I left the matter to your judgment, and if you are well served and satisfied, I have no call to complain.

I ask Mr. Loring now to stop the Advocate from coming here, and to have it posted to me at Cambridge. This will explain to you the coming of the papers - which please to keep in file that I may look over when we get home. Tell Garrison I have his letter - Good night
Ever
A Gray

Oct 17. is letter to Prof. Loring
from J. C. Marshall (Museum 2.1.14)

Dear Wright, Dr. Masters to-day showed me specimen of
the above *Passiflora* (he is studying the genus), and asked me to
read the indication of locality. I read it "Sung Kong I."
Is that right. He thought it strange such a sp. should come from
Coast of China - being of a *Mollucca* or *Borneo* group. Tell
me in your next any thing you remember or can make out of its
habitat, &c. - I shall write again soon. A.S.

Guerineau

Mr. Thompson of
Ottawa has been much in-
vited - He thought he had written
to acknowledge the receipt of the said
of Parkinson quadriflorus & Juncus
which you sent him - 2 exsicc. -
(By the way, they are handsomely
protected by envelopes). He thanks you
heartily, and this for the small
like given more a rather small
quantity only.

A. G.

Ken. 20th Sept. '61

Wright

Oct. 2.

Boltonia latisquama -

Gathered seed - ripe now -
in bed in front of house - &
Seed to Harker.

Dear W. Mrs. G. -
Just in. Had the storm
did no harm to garden.

The house - can-pot dis-
charges into drain in Garden
St. Is that the one?

So you went off half-cock
about the business with the Nation.

Settle every thing as to coal
& drains, & - according to your
judgment. I will write soon.

Dear Mr. Greenman
As to the hay &
the road - tho we are
going to move the barn
away. I do not mind if
the garden divides the
expense of making the
road with Prof. Whitney.
But the Garden can
hardly afford to lose the
value of all that nice
hay. Settle it as you
can agree about it. Say
take $\frac{1}{2}$ the value of the hay. A. Gray

Mr. Gray is away. But
tell him we must all agree
to his proposal.

A. G.

Nov. 18 Oct. 20

Dear Mr. Galt

In my last to you, I wrote
that Stokes told me he owed
you Mr. Wright, about £30.

On looking at the record in
the herbarium, however, Prof
Oliver finds that it is for 582

Certain plants, - which is only
half that. You wished a
deduction to be made for
duplicates, \$5 - but Oliver
says better not. We shall
receive for these at rate of £2
per 100. Nothing from you
this week.

I have ordered made a rule
for you, with millimeter &
English lines, as many are to be
found ready made. Cost, 2/
Ever Yrs,

W. H. Galt

Chas. W. H. H. H.

W. H. H. H.

Kew, 21, Oct. 1869.

Dear Wright,

Knowest thou this beast?

It is apparently common in Cuba,
but is so rare in Europe, that only
one specimen is known to be in any
Museum. So says Prof. W. H.
Flower, the Curator & Prof. Comp.
Anatomy of Museum & College of
Surgeons (Hunterian Museum) London,
— a very nice & good friend of mine.
This is to let you know about it,
and (as in these troublesome times you
may not go soon to Cuba) to have
set Gurdach at work to catch
some, and send them in spirits to
England, — where 8 or 10 of them wd,
bring a good price — enough to make
it worth Gurdach's while to have
them hunted, — not to speak of
the importance to science. There
only one in Europe is not in England.

A.G.

than a rat.

and
lives in the

Is nocturnal
the ground.

By very

you
che "

"

to

Charles Mayhew
of Port Antonio
Cuba

Solenodon cubanus. Peters. - Rather larger than a rat.
Found on the mountains near Trinidad and
Bayamo (where it is said to be "not rare"), also in the
South and West part of the Isle of Cuba. Is nocturnal
and flesh or insect eating. - Lives on the ground.
According to Poey is called by the natives by very
different names - in the mountains of Bayamo
"Tejon" - in those of Trinidad, "Tacuache".
in Guiza (or Sierra Maestra) "Andarás".

An allied species is found in Hayti -
S. paradoxus Brandt. - there called
"Mirapoane".

I think I
have the way to place
3 sets of the drawings.
You are assured of it.

the following:

I have £10. for you (only)
for Cuba Phragmites plants. When
he came to pay Stokes found
your letter, asking that the \$82
was. he counted as 500, in paying,
and so he gave me 10 pounds -
I would not object - tho' the im-
pression somehow got to me that
you were to receive much more.

Very well; all will be right, in
the long run no doubt, and
you have all you asked, as it is.

Winter is coming on here; pretty
cold already, and the days very
short.

Ever Yours

Albany

Kew, Oct 28. 1869

Dear Wright.

Yours of Oct. 2 - 15 is just
here.

We are as much disappointed as you
at this transposition of Thanks-
giving - as we counted on it for a
week later and shall not reach
Boston till after 18th - I meant
to have 3 or 4 days before I met
my class, now they will be sheep
without shepherd for 2 or 3 days.

You should go home to your
Barn, Thanksgiving of course,
and as much ~~sooner~~ before
the 18th, as you can. No matter
if you are out or had when
we get home. And as to all the
bits of information, it will not
matter - for it will take a
long while to get unpacked and

all to-night. And the arrange-
ment of the Library can be de-
fined till you come back.

Suppose you take pay from the
15th Nov. to 1st December.
And we then sit all to rights in
December. And if you need go
down again for New Year. But
as to going to Cambridge & not
finding you, and pottering on
without you all the end of
November & all December -
I do not think I could
stand it.

I was much afraid it
might turn out that you would
be sending over a box or more
thing here for me to see to.

quite too late, and you have
done it. For I suppose
your box of Fungi will not
reach us here, no doubt, either
after I have gone (a week
from next Monday we start)
or what is just the same for
practical purposes - so crowded
must I be at the last - hands
none the less full now for the
week that is left. And I hate
to trouble Stokes with these de-
tails - tho' he is as well disposed
as man can be. But I will
see him, and I will write to
Paris & elsewhere for purchases
to the Fungi. I have
seen Berkeley and asked them
who would buy Fungi: but
got no information from

Sunday 1. Dec.

Well, dear W.

Here is your letter to-day of
26th Nov. & Dec. 4 -

relieving some anxiety, as I was
fearing that you were sick;
I was expecting you
back on the 1st inst. in
Guerrin's car like you said
to him you were to be back then.
Since the cold came on, I
have not made a
fire in the stove - for the
sake of the Cacti transposed to
the little conservatory, and it
gives me some shelter. But
James Lovett is coming to
act as boy, and that will save

me some better, - But I want
you to train him.

I have such a ^{large} ^{number} of
large class in College that
it absorbs him & brain greatly.
I have got unpacked & my
own quarters nearly into order.
There are things here I can't
find without you. e.g.
The Catalogue of the Library.
- on sheets, in blue book covers.
There is lots to do here, & if
there is no occasion other than
"having a good time" at W.
I think you had better--
Come on, - & help get the
machine in motion. - This
I don't want to spoil your
holiday.

I think it likely you will
have started before this reaches
W.
Ever Yours A. Gray

Friday
Dear Mimi

I am to use the
envelope to-day, after
all.

The envelope came to
me - from ~~the~~
Boston I am at 100 here
which, for supply I
have exchanged for my
check. If that for
Frank charges a cent
for it costing it - You
send it back & I will
keep it the for you. Love
from A. L.

and then to correct, after
our own ideas, later.

The upshot of all is -

If you come on, very
well, I will see that
you are kept full of occu-
pation, in some way.

But, if you come at
all to stay, when you ~~are~~
are there - the spring work
is done - you have done
and I get over the hostility
& can prove it as well to
be kept in all the spring.
I shall be just as well
satisfied. Take your
choice, please, and let me
know.

Very truly,
A. L. G.

Ever truly,
A. L. G.

I have a $\frac{1}{2}$ idea to write
to you. We shall be
that in view of your great
value to the party, I have
voted that you shall not be
hindered, as to all your
plans. I shall be
9th Mo

Dear Wright

I hear of your
advent to the winter
and I have, as desired
sent you letters to you
at W.

I just remember that
you said last fall
you would like to be at
W. in spring - to look
after things. And I
remarked that it was

was just when I could
not spare you.

But if you want
this spring, I should
not object.

Because - 1st we are
crowded here for room.
I have to work these
classes here. Father
has to be here, to look
after them. Mother
has come to Dr. Calif.
Butany. I have ar-
ranged to put him up
stairs. It would be
rather hard to find room
for us all to work at.
advantage in July.

2. The history of
Lecture - now is
to be given, & that
will make more con-
fusion.

3. The laying out of
plans for studies, could
be disposed with till
the students are gone.
i.e. till July. - except
what I could do - so as
to keep Jamie from
idleness.

4. If you could
I should put you mainly
in work out of doors in
new Garden arrangement.
But it might be as
well to let Greenman
patter by himself over it.

May 31, 1871

Dear Wright

I send you two letters
- Parry & Clintons.

Please return Clintons.

Clinton's \$5 I'll pay
in a check, or so per.

Please write at once to
Clinton acknowledging it.
The check, when it comes
back thro' the Bank will
be my voucher.

Now a week from to-
morrow our college work
will be over, except an
examination - and the
Coast will be clear for
if agreeable.

Indeed there will
be little in the way
all next week,

I & Mrs Gray are
going to get away
on the 9th or 10th
June — to be home
again on the 20th.

There is a parcel
I want to send from
Cuba for you — and
a pamphlet, "Emancipation
Artistotle".

Ever Yours
A Gray

May 5 1871

Dear Margaret

Thanks for yours of 1st
just found them an return for
Sunday at 10 o'clock - with
letter for Carter & for
Miss I for also Perry's letter

Will you do up the Sa. Don
plants for 8 o'clock - a p.m.

Shall you be down before
12 - on Saturday - or
not till after 12 get back

Th. 19th or 20th Take your
choice but let me know

If you come & set to work
with me I shall be pleased
& you shall take time to distribute
your own & other plants. If
you stay the night for Perry's
Washington - that will take 1/2
your time for an hour
But 8 o'clock a p.m. for 80
pages or so (will) finally pay
What, please - as it is
work in the - & all

the year would be the same
and help the community just

the people always say
to be with the
best part of it
that is the way
to be the best
the best part of it

expressed. I can get
H. W. this summer —
for this year.

Interrupted — now
& now —

Now again —

Here is your
check

Ever truly
A. Green

June 8. 1877

My Dear Wright

Business first —

I went to Boston this
morning — found the firm
and, as your draft was
at 60 days I thought
best to ask to have
cash paid now, deduc-
ting 60 days interest
which the firm were
ready to do — and
here is the proceeds.
So you can invest.

As to your coming
back before the 2
months expire - or
then, that is as you
please. Except
for "Garden" things,
to look after, it is
no matter; for I
could not begin to train
the new glens yet.

Nothing then for us,
meant on my part
but to tell you the
Coast is so nearly
clear here that

you could do some-
thing, if you wished,
either for Harkness
or for San Domingo
all on your own hook.
I am running the
Garden, and expending
a good lot of money,
and am not sorry to
have to pay my piece
the cash I should have
paid you, if here this
spring. Indeed it is neces-
sary, unless I am out
of pocket personally.
That view will explain
the indifferences I

1871. R.H.
1960

Let me see
My best move now is the
Garden. It is a very good
much seeing to, and I must
never give it another year the
time I work. I have the year.
It's killing, but for the time being, with
business, I may have - and
Does not pay in result. But
I am not clear how to run
the matter, till I can turn out a
pupil who has a penchant for
cultivation as well as botany.

Partly I might do it by getting
another Gardner, who has more
head than Lawrence - but I don't
love the staking character. Another
Gardner, if that could do, B. can
not work under. It must be a
man of a clearly different stamp
who can take up detail, in my
place. How to pay such a
man? The only resource is the
\$900. I have, which being deducted
from my salary for next, is to be

credited to the Garden. I wish
the College allow that last
year - out of which I paid you
for taking the garden with myself.
(I doubt) if I could get it estab-
lished, as a thing to go on. -
but I think it is agreed to. -
This year I shall spend the greater
part of the money for repairs & changes.
but I shall pay you 75 a
month for as many months
as you give me.

I am prepared to be Librarian
Curator, and I wish I could
keep a hist. Curator from it
simple, and it is just in your way.
But the Librarian fund yields
only about 850 dollars - which
is barely all needed to run the
establishment. And I must pay
for most of the aid I could get
out of my own pocket. I could
do something that way, and I
wonder, if only I had the Garden
off my mind. There is the truth.
I do not think you could do
anything with Librarian, as this

1. 2. 3. 4. 5. 6. 7. 8. 9. 10.

Ten Trials -

any other (the culm)

Group

- Artemisia Group

Questions 56, 57 on paper.
You are to work out

Director, Can I find any-
body who can, I think has
botanical knowledge besides?

By the way, I expect to
be away from Cambridge only
from the 10th to the 20th at
least. You won't be coming on then
till a while later unless per-
haps you come to see Perry who
is to be here soon after 20th.
None of anything, though you know
it is well to know that your 2
S. Druggs boxes are in my back
kitchen - and a Cuba paper
parcel is in my study.

'Lemon stippled' for flowers
 May 1864. The first white
 sample for us was to mark
 the difference between stippled
 of Cherry & those of a Rose &c

Thank you for the other little ones
sent by sea last year.

Ever & Son

Shay

Cambridge 1st Dec 18
Dear Mr. Wright

Thank you for the copy of
the book you have sent

from. I am very glad to hear
of it. I am sure it will be
very useful to you.

Well, I am sure that
you will find it a book
of value. I am sure it will
be a great help to you, and
I am sure it will be a great
help to you. I am sure it will
be a great help to you.

I am sure it will be a great
help to you. I am sure it will
be a great help to you. I am
sure it will be a great help to
you. I am sure it will be a
great help to you.

Well, I am sure it will be a
great help to you. I am sure
it will be a great help to you.
I am sure it will be a great
help to you. I am sure it will
be a great help to you.

of the 1st of June - It is
is my 1st. I am, as I
said before, in the care of the
London, & I will soon get
all of it, by some capital
arrangement, which shall
result in the London being
more than before, and
it has been - better than
any of our London money
ever before - I shall
not be comfortable for some
time in writing the London.

I am going to say, if I can
not find a man who will
be responsible for, and pay
me out of his own pocket for
out of London, I shall be
in getting out of the London
funds. This will have to
be paid for work in the London
house - which is the capital
of the London, and it is

all, \$800 - you said
to, that is - for what
has just of all, to pay for
books, paper, fuel, & freight
and my own pocket - in
that sense of it, I am in
all - must have all of
my own pocket - until
I can pay for it, it
will be for a covered up.

Or else I must put
the work in that
in to pay what I have
also - I am not to
be - full of it with
it - and who is not
really enough to make
it.

And then you are
very up to the
point for it.

What you are doing about
the best possible thing
and the best possible place.
The real thing that you
may find, I explain it
in fact that, is a
revolutionary and fresh-
looking new spirit
making in fact about
the old spirit as you are
in a position and also
I have thought that you
could not get better at
an even better old.
Don't be so impatient about it,
and I don't know how
you perhaps want to
which I am very
I only want to take
time to find it out.

The old man in the
lumber and get a better
impression of you, can
about the proposed
man, that, after all, it
is very difficult to see
everybody as you, about
them.

You will have more of
power with you, in the
writing up of your
business. But
you can not be a
travelling case to some
place or there, and
as at this (where they
have a great deal of
power), I suppose you
will get the pretty thing
at the office. How about
it? I hope you are
at the office.

The Pa Capt the
incorporation of the
Rd, On Sunday -
a lot of the H.M. place of
the ... of the
Calyciflora of Gay's
Herb ...

I have written
 a note explaining to you
 the subject, as well as I
 can. (At the same
 got a note from
 at present - as well
 about - but a pro-
 position, that I hope
 there is a problem as yet
 to be solved.

I think likely the
earliest way to kill
it was to put it in

Nov. 27 -

Dear Mr. L.

Yours of 21st.

I have seen Mr. LaChance, it is
very likely to send there is
a small book of poems.

Mr. LaChance is now
in the city of New York
I am of the hope that
of his poems.

I have been in the
city in the city for the
last few days. One night
with the wife of the Mayor
on the way - if they
were called for, of the
city. The LaChance
has printed them.

For next year -
look out

I have been
the same by
but now I am doing
about

The same
same

When had you the the, Will you please

2. That they had an
done a mass

"The gods are still
here"

3. That it is not
you to see, if you
choose, about receiving
a further of your presence

He will be

He will, and you
will in the H. with

My Dear Mr. G. &

May 9, 1871

I have no answer, mind is
unwell - at least is
coming and being,

I want to get off the
ground, and I have
place, which is by
me. That is, I want to
the man and I know of
the person who is here. It
Please let me know it,
that it may be for the
ground and I will be
there it is.

If there be any hitch about
it, please let me know what
it just is.

Dear Mr. [unclear]

May 11 -

I have been
to [unclear] [unclear] [unclear]
the [unclear] [unclear] [unclear]
- the [unclear] [unclear] is [unclear]
[unclear] [unclear] [unclear]

The [unclear] [unclear] of
[unclear] is [unclear] -
[unclear] [unclear] [unclear] [unclear] of it
I [unclear] [unclear] [unclear]

We had the [unclear]; but
[unclear] [unclear] [unclear]

I have arranged to [unclear]
[unclear] in [unclear] the [unclear]
of the [unclear] - [unclear]
[unclear] [unclear] [unclear]

Goodbye to the
to be in front of the
street. Mr. Cohen
Sargent - a gentleman
to be in front of the street.

Mr. Cohen to be in
if I shall really gain
time or lose later.

Cooking things can't
be spent till later
year. - then apply again.

I am in the same year
which - a by chance.

Ever,

A. H. H.

Dear Mr. [unclear]

May 14, 1876

I sent you a Post. Recd.
yesterday - to keep up
your [unclear]

I have at length heard
from Mr. Crook & have
got a fair bit of money
for you - for Cuban
plans. Which I
will send as soon as I
have got the collection -
packed and off to journey.
I am awfully tired every
night but I bear up well.
I am [unclear]

A. Gray

June 4 1872

My Dear Mr. ~~Stewart~~
~~well~~ Wright.

I meant to have
added this to Mr.
Wright's letter.

It is for Miss Cutshaw
for Mr. Brooke -
I send in his name.
Please acknowledge re-
ceipt of same.
Yours truly
Alfred

It lives, in case Prof.
Whitney arranges for it,
as we expect, that work
we see, will not be done
without us.

So, you see, I should
like to have you come
after Thanksgiving - you
could not leave before -
and help us till spring.
I'll pay you as before
\$75 a month, and your
room is saved for you
at the Garden House.

Is that all right?

Mrs. Gray desires
best remembrances to
yourself & sister.
Do you get Prof. Vesting?
Ever yours truly

Asa Gray

(arrived 20. Sept. 72)

Dear Wright

I have been striving
for a day or two to read &
answer your interesting letter
of Sept. 16 telling me -
"What you know about forming
this summer, and other news of
you, which we are always glad to
have."

The important things to
reply to are

1. About apples - Any
you choose to pick and
send will be welcome here,
and I will pay for the
barrels - which they say
are scarcer than the
apples.

2. As to yourself. We
have worked together for a
long while, and I guess
we are likely to do so in
future, perhaps about as

much as you will care
for, considering it is clear
that you will have to
leave the home place
& look after your sisters.

Getting the Garden
now off my hands,
I lose with it the
means with which I
paid you \$75. per
month when you
worked for me. But
this year a slice
from my salary
goes to my college
assistant Prof. Grubbs.
So, I could not keep
you for Herbarium work

much of the time
without financial
embarrassment. More-
over the run of work
here is taken by
Mr. Walms, - who
is Prof. Sargent's aid
in care of garden -
and will help me about
the Herbarium to an
extent equivalent to
my assistance rendered
to him in plant -
raising, &c -
But there is more
Herbarium - work than
we can attend to. And
both Walms and I
want to spare time
so that we can
work on California

16 Oct 1872

My Dear Wright

The Apples came
night before last - and
in very fair condition -
Many thanks to you. They
come in good time & are likely
not come.

It is most likely the
Callichma & the Argemone
are more conditions.

I had also the translation
from Mohr to thank you for.
All well - Tracy - here.

Wright

Tracy

Dear Wright

BOTANIC GARDEN, CAMBRIDGE, MASS.

May 30

1873

Backhouse writes —

"Is *Polygonatum giganteum* easily procurable? If so, 200 or 300 plants would come in well."

It must grow along the Connecticut with its tributary streams, — in alluvial soil.

It would be as good as a crop of beans — & less labor than the honey — if you were to dig a bushel basket of root stalks now — or they are coming up (in the fall you would prefer.) I express a box-full to you here — & I pray you will, on behalf of Backhouse, this same, laughing fellow to dig me what say?

Albion

those Palm-nuts for
Cuba. Please report
what they may be!

We are all pretty
well. Your sister whom
I saw yesterday - looks
bright & happy.

Ever Affly

Did you not run
off with that little
bill of Fard's in
your pocket?

My Dear Wright

BOTANIC GARDEN, CAMBRIDGE, MASS.

June 5 1873

Polygonatum giganteum

is the big one - the only one that grows in intervals - along alluvial banks of rivers & varying from 3 to 5 feet high.

Very strong rootstocks.

If marked now, they could best be dug in Sept. But in meadows they will be mown off, & you can't find them. When

seen they might be dug & put in a damp corner of your garden. A lot of

them wanted, if any.

Let me know if you are likely to get them; otherwise

I must ask elsewhere.
Sorry you lost that
English Pruning Knife.
Mine I lost first year.

Watson reports that
he don't see F. F. &
Gordon Botany living
now. If you don't
find it, I must get
you a new one.

Still cold & ran here -
and I am still driven
spooly. Ever
yours

A Gray

Dear old Micht

BOTANIC GARDEN, CAMBRIDGE, MASS.

July 30 1873

Box of 26 at hand

Your sister Mary says is
down at Marblehead -
and that you sent Mary. I
hear you are coming on
to get her.

Veronica. Yes; we should
like roots of it - better
specimens & live to
cultivate

See if you can find
three styles of it: for length
of stamen & style, Darwin
says it has such.

As to Garden it is now
new affair of mine - Yet
I can't help dabbling,
& helping to get things,
For instance

There is that great
cause Archangelica
alysperperis - in some
of your low meadows by
fence corners.

Walsen has painted a
beautiful label for
it - which was stuck
to a Pencebarn - I want
to save it & have the real
thing. - if you cannot
a cross it, I can dig the
big roots.

As to the Polygmatum
signatum, it is much
best to dig them as late
as Oct. or end of Sept.,
at least. - or sooner if
the tops begin to die off.

As to whether large plants
or young ones are best -
I would say, _____

1. Get all the big ones
you can conveniently -
2. Then all the young
ones. The more the
better. Fill a box
full of them & send
to me by Express?

It is just - I am
just sitting down to
write. But still just -
being with Class to
help Grubbs - but
not much.

Mrs Gray sends
kind remembrance

Ever A Gray

Dear Wright

BOTANIC GARDEN, CAMBRIDGE, MASS.

28 Aug. 1873

By this time you
have another Cuban
letter I forwarded, & a
copy of Tiller & Rudge to
List.

Now there is puzzle.

It was ~~and~~ end on p. 216.

"Orchidacea" & Rudge be-
gin on p. 215. - end on p.
324.

What comes between?

Where is it?

Bentham writes me that
he is re-manographing the
Miscell - asks questions
about some of yours - Says
their copy of "Sauratles" list
is incomplete - has not the

sheet containing the
Mimosa, having a
chance to send — I
send the "Index &c" &
— from an "incomplete
copy" found here. I take
the Mimosa sheet
for him — to fill the
deficiency

I want to find my
copy. So tell me —
is there a real hiatus
between p. 216 & 225.

Ever truly

Albany

Nov. 1, 1873.

Dear Wright

Just got my
copy of Cubensis
bound up, when
along comes a lot
of sheets like this -
- explaining the hiatus,
- and greatly tempting
me to make some
curious remarks.

I take 1 -
send to Ken 1
" you 1 -
The rest put in your file,
Ever, Wm.

My Dear Wright,

BOTANIC GARDEN, CAMBRIDGE, MASS.

Nov. 28

1874.

We shall see your
pleasant face here soon,
I suppose - or I may
write a brief line.

I cannot complain that
love for home, and the
demands of home duties
~~prevent~~ prevail.

Nothing more has come
from Kew, and there is
nothing here at all pressing
for you to do. What most
reconciles me to your absence
is that I have nothing
to pay you with this year,
if you should come.

Old supplies gone, & cur-
rent ~~resources~~ resources all employed.

We are pretty well off
for apples - thank you,
- But bring a few of the
finest as specimens.
Also a few chestnuts.

I have to send the
Inkman now to a
snowed-up man in
the Sierra of California.

So you had best
take the Weekly

Ever truly
A. Gray

Dear Wright

HERBARIUM OF HARVARD UNIVERSITY,

BOTANIC GARDEN, CAMBRIDGE, MASS.

Oct. 6 1883

Not you - who has been off
2 weeks or more - returning to-
day - handed me yours of the
1st with scraps & notes on the
2 Briders!

I, too, know the 2 species better
than I did, and I think
that the way they are in the
publ. of the new Flora will meet
your view. — I must send

you proof when I come to it

I have already sent to the
printer the 1st sheets of copy
of the part from Coprinifolia
to Compositae!

I wish you could help me
read the proofs - a great pity
but I can't afford to hire any
one to look off this labor. For
the part published 4 1/2 years

ago - cost me \$2000 - &
I have got back hardly
 $\frac{2}{3}$ of it.

We are pretty well -
except I am at the big
end of a horrid bad cold.

Yours ever

Albany

Sept. 30 1884

Dear Wright

Some at length,
 Find 2 grasses - of no date.

No. 7, I take to be *Ceratophyllum*

Blend with those *Leavis*
 stolons. Why not make

specimens leaving them on,

but into nice *Crantzia*

Quid? no 6 = *Monarda* (Junk)
peplodes L.

Spartina. Can't say
 anything about now. The
 2 sp. likely run together.
 Yet generally diff. enough.

I find other *Monarda*, roots &
 red leaves: the same.

No doubt you are right

about Trilisa - as an
anagram of Lietus, I
was stupid. I'll leave L
Witstein, who is witless
I will note it in Am.
Inv. Sci. - with my
warmest apologies.

I am too old, ought
to stop.

I don't trouble off May-
loads, I don't wink
Be lazy and you
will be happy

Ever

A Gray

May 13 1881

My Dear Wright

I think I wrote to
you from El Paso.This is to say that this
afternoon Mrs. Gray & I ended
over $3\frac{1}{3}$ months' journeying by
returning home.I found your letter of
Feb. 9th lying here all the
time.As we passed the house we
saw black crows out at
the house of the Parkers &
had heard that one died
yesterday in a carriage —
the other this morning!!
How happy to go together.

I have not yet heard
from the friend is -
probably day after tomorrow.

If you come, we will
find you a bed room with
us - the the person is in
disorder.

Yours great friend
Sincerely Yours

Asa May
